K7

100% Pure Carbon Riser

Carbon is an increasingly popular non-metallic material commonly used for Archery Bows. Although expensive, it is light-weight, corrosion-resistant and strong, and can be formed into almost any shape desired. The result is the **K7 Carbon Riser** that can be fine-tuned for specific strength where it is needed. KAYA K7 Carbon Riser is designed with feature of vibration damping that is strong in any shootings and forms. The ability to design a 100% pure carbon with properties that vary by orientation cannot be accomplished with any metal risers. This carbon material provides light weight as well as high strength. It has also suggested a long period of time.

Grip Band 2015 NEW

Grip Band #1

Grip Band #2

Compound Bow Press

The KAYA Bow Press is design to work on all compound bows that do not have a beyond parallel limb designs

1.Portable Bow Press 2.Light Weight-4.5kg(9.9lbs) 3.Fast,easy to use 4.Unique design 5.Affordable Price

1 TAKE THE PRESS OUT OF THE CASE, PLACE ON A STURDY TABLE OR COUNTER TOP WITH THE HANDLE TO THE RIGHT.

2 PLACE THE BOW LIMBS WITHIN THE LIMB SUPPORT RODS AS SHOWN IN THE ILLUSTRATION. ADJUST THE DISTANCE BETWEEN THE ARMS SO THEY ARE AT A 90 DEGREE ANGLE TO THE CENTER ROD.

3 ROTATE THE LIMB SUPPORT RODS SO THEY ARE SECURELY HOLDING THE BOW LIMBS IN POSITION. THE OUTER MOST ROD OF EACH SUPPORT ARM SHOULD BE APROXIMATELY 1 - 2" FROM THE CAM

4 TWIST THE LENGTH ADJUSTMENT HANDLE SO THE PRESS ARMS ARE DRAWING CLOSER TO EACH OTHER.

5 CONTINUE TWISTING THE HANDLE UNTIL ENOUGH TENSION IS RELEASED FROM THE STRING AND CABLES TO PERFORM THE DESIRED WORK.
