GET SERIOUS. GET HOYT. // GET SERIOUS. GET HOYT. // GET SERIOUS. GET HOYT. // GET SERIOUS. GET HOYT.

GET SERIOUS. GET HOYT.

85 YEARS IN THE MAKING. A NEW ERA OF ADVANCED CARBON. BOLD AND UNRIVALED NEW RISERS, LIMBS, CAMS AND POCKET SYSTEMS. HOYT 2016 IS HERE.

HOYT CARBON: CARBON DONE RIGHT.

50+ CUSTOM CARBON LAYERS

CARBON: PURPOSE-BUILT FOR PINPOINT ACCURACY AND DEADLY STEALTH. Each individual hand-laid carbon component is precision-tuned for structural optimization. Each riser is purpose-built for enhanced stiffness and reduced vibration.

3 DISTINCT HOLLOW CARBON TUBES

3 distinct hollow carbon tubes are strategically woven together, creating full structural stiffness optimization throughout the entire riser platform.

11X STIFFNESS TO WEIGHT RATIO

Carbon has 11 times the stiffness to weight ratio of aluminum. Our thermoset carbon endures more force without bending or twisting, eliminating riser vibration and increasing consistency and repeatability.

1,500 DRY-FIRE TEST

No Hoyt Carbon riser design is approved until surviving our brutal 1,500 dry fire test. Each dry fire delivers more than 104 foot pounds of kinetic energy, sourced from 80 lbs. of draw weight at a 30" draw.

7X TOUGHER THAN ALUMINUM

Compared to aluminum, carbon can absorb seven times more energy without permanent deformation. As an example, what happens when you park a 6,115 pound truck on a Hoyt carbon riser and an aluminum riser? The carbon riser has the ability to absorb the weight and energy and return to its original state without any permanent deformation, while the aluminum riser yields and remains bent.

53% LIGHTER

Hoyt's carbon tubes are hollow, weighing 53% less than solid versions. In spite of being drastically lighter, our hollow carbon tubes maintain 97% the stiffness and strength of a completely solid version.

208x MORE EFFECTIVE THERMAL INSULATION

Carbon provides 208 times more effective thermal insulation than aluminum. What does this mean to you? It means your carbon riser won't suck the life out of you on cold weather hunts, making you a more alert and effective hunter.

THE NEW ULTRAFLEX LIMB SYSTEM:

- » Utilizes entire length of limb, for increased efficiency, through our patent-pending pivoting pocket design.
- » Past-parallel design creates less limb movement, resulting in a quiet, vibration-free shot

NEW DFX CAM TECHNOLOGY:

- MAXIMIZES EFFECTIVE STRING ANGLE**
 - » Creates a longer axle-to-axle at full draw, increasing accuracy and stability (see diagram below).
 - » Encourages a more comfortable and accurate head position.
 - » Gives the maneuverability benefits of a short bow in your ground blind or tree stand, while providing the advantages of a longer axle-to-axle bow.
 - » DFX Cam Design creates less limb movement, resulting in a quiet, vibration-free shot.
- OPTIMIZES PEEP POSITION**
 - » Creates a more direct string angle and brings the peep closer to your eye, increasing peep-to-sight distance and maximizing accuracy (see diag. below).
- MORE COMFORTABLE AND CONSISTENT ANCHOR AND ALIGNMENT**
 - » Eliminates "head tilt" at anchor, by bringing the string to your nose, promoting proper head position and form.
 - » Reduced facial contact and string pressure results in more accurate and consistent arrow flight.

- OPTIONAL LIMB STOP**
 - » For those seeking an even stiffer back wall experience than already afforded by the new dual cable stops, our new DFX cams also come with a limb stop option. If you are after that zero-play feeling at full draw, our first-ever optional limb stop brings a new definition of rock-solid rigidity to the Hoyt back wall.

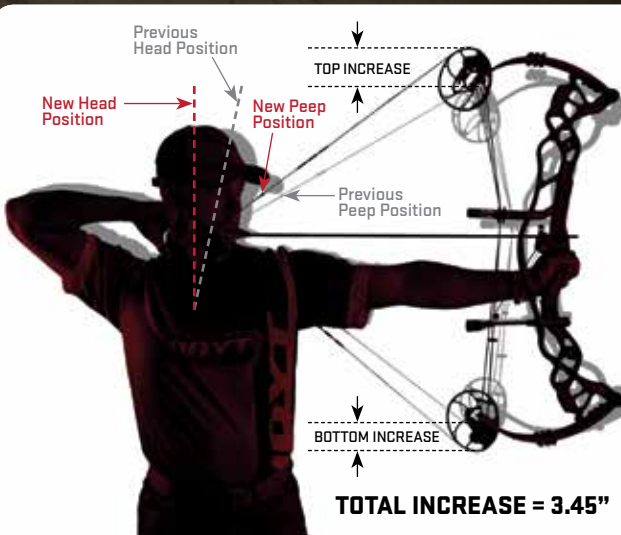

EFFECTIVE STRING POSITION AT FULL DRAW:

Head position is vital to the consistency and accuracy of your shot. Our new UltraFlex Limb and DFX Cam Systems work together to deliver a dramatically broader string angle, an increased full-draw axle-to-axle measurement and a more optimal peep position. These innovations allow a more relaxed, strain-free posture at full draw, and reduce facial contact, string pressure, and eye fatigue at anchor.

The result is a 2016 30.5-inch bow that feels and performs like last year's 34-inch equivalent. Yes, you read that right, your compact tree-stand or ground blind bow will feel and perform like a stable and forgiving 34-inch bow, and your 34-inch bow will perform like a 37-inch target dream bow. If the numbers don't convince you, your experience at full-draw and your tightened arrow groups will.

ULTRA FLEX LIMB SYSTEM

DFX cam 6 1/2

(All dry-fire testing is done by trained technicians with proper equipment. Dry firing (drawing and releasing your bow string without an arrow) is extremely dangerous and should never be done. Hoyt's 1,500 dry fire test and standard is for Hoyt risers. The truck torture test was done under controlled conditions, and should not be attempted in any other circumstances. If your bow is run over by a vehicle, do not shoot it. Take it directly to your dealer for full inspection. Running over your bow may void Hoyt's warranty policy.)

NEW

CARBON DEFIANT SERIES™ PEERLESS. FEARLESS. PURELY DEFIANT.

On or off the mountain, you don't hesitate to defy norms. The industry's only hand-laid hollow carbon riser mirrors your deviant swagger. Packed with innovative new cam, pocket and limb technologies, the sleek Carbon Defiant is designed to deliver unmatched forgiveness, accuracy and efficiency. Hoyt's Carbon Defiant Series continues to push boundaries as the flagship of the Hoyt line, and the premier series of the archery world. Get Serious. Get Defiant.

ULTRA FLEX
LIMB SYSTEM™

The industry's only pure carbon risers. Temperature stability, lightweight design and unrivaled strength for comfort and confidence in the field.

CARBON SPYDER **FX**

CARBON SPYDER FX™ COMPACT DESIGN. DEADLY BITE.

Spiders hide in the smallest spaces striking unsuspecting prey. The new 2016 Carbon Spyder FX is no different. Built off the ever-popular Carbon Spyder ZT platform, the FX features Hoyt's new DFX cam creating an ultra-compact 28-inch axle to axle, high-performance hunting rig with a lethal bite. Although extremely compact, it boasts the same effective string angle and shootability as its 30-inch predecessor thanks to the new DFX cam. With a deadly array of other Hoyt technologies, the Carbon Spyder FX brings a whole new level to compact tree-stand, ground-blind or backcountry maneuverability.

NEW

DEFIANT SERIES

DEFIANT SERIES™ DEFYING ALL ODDS

You are bowhunting bred. You know there are easier ways to hunt, common ways that require less stealth, precision and passion. But you are not common; you live to defy odds. The Defiant will give you a sharp, odds-defying edge. Like its carbon brother, the Defiant boasts the new dual-rocker pocket system and UltraFlex limbs, along with aggressive new DFX cams featuring the first ever Hoyt limb-stop option. Turn every head but that bruiser buck's. Deviate with Defiant.

TRIBUTE™ RAW CONNECTION

Archery is more to you than just the tightest groups, highest scores, and latest technology. It's about embracing challenge, owning your results, and the raw connection to your bow; it's about pushing natural ability to the next level. Here is our Tribute to you finger shooters out there: 8 inches of brace height and 45 inches of comfortable, consistent, forgiving Hoyt quality.

NITRUM™ EDITOR'S CHOICE

The Outdoor Life Bow of the Year is back for a curtain call. The Nitrum fuses two game-changing technologies for an lethal, dead-in-hand, award-winning shooting experience. Its Offset Riser Design introduces a new dimension of stiffness, obliterating vibration, while the Zero Torque Cable Guard System balances side load forces, eradicating torque. Put more meat on the heat with Nitrum.

RUCKUS™ &

Young archers know the meaning of can't-sleep anticipation better than anyone. Don't risk big-moment disappointment by starting them on anything less than a Hoyt. Engineered to grow with developing shooters, the Ruckus and Ruckus Jr. ensure that your young archer has a reliable, properly fitted bow for that anticipated moment, whether it's in the back yard, on the range, or at your side on the hunt. These bows bring broad draw weight and draw length customization to the table, along with the proven, peak-performance technologies that Hoyt engineering is known for. Get them off to a serious start, get them Hoyt.

TRADITIONAL
ARCHERY SINCE 1931

TIBURON™ & BUFFALO™ TRADITIONAL FORMULA

These traditional recurves are icons to the traditional archery world. The advanced Tiburon, derived from the Spanish word for “shark”, is a sure predator, featuring Hoyt’s world podium-dominating Tec-Lite riser and Formula limb systems. The Buffalo, known as the go-to bow for on-screen superheroes and their deep-woods counterparts, alike, is also sure to deliver. This Fred Eichler Signature Series bow utilizes the Formula Limb System to deliver the smooth draw and exceptional performance you expect from a Hoyt.

DORADO™ & GAMEMASTER II™ THE ORIGINAL PIONEERS

These two bows combine custom-grade craftsmanship and cutting-edge Hoyt technologies for a high-performance traditional hunting experience. Both feature custom wood core recurve limbs for top-grade efficiency and smoothness, and disassemble into a compact carry-case containing everything needed for assembly in the field. The Dorado and GameMaster II bring solid performance for traditional shooters of all levels.

NEW

FORMULA QUATTRO LIMBS

Whether you are holding the iconic Buffalo or the advanced Tiburon, now your recurve rig can take on an especially lethal edge when paired with the torsional stability of Hoyt’s world-renowned, podium-topping Carbon Quattro limbs. Available in 35, 40, 45, 50 and 55 pound increments.

QUATTRO™

CARRYING CASE

Every Hoyt Traditional recurve comes complete with a rugged and stylish protective case with individual pockets for your limbs and riser.

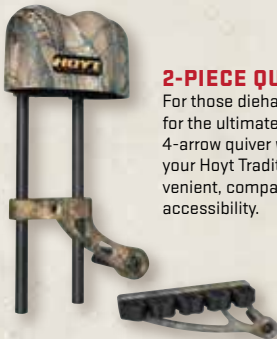

TIBURON BLACK OUT W/BLACK OUT LIMBS

BRACE HEIGHT: 7-8" // RISER LENGTH: 21"
BOW LENGTH: 60, 62, 64" // MASS WEIGHT: 3.2 lbs.
DRAW WEIGHT: 35, 40, 45, 50, 55, 60, 65

BUFFALO BLACK OUT W/XTRA LIMBS

BRACE HEIGHT: 7-8" // RISER LENGTH: 19"
BOW LENGTH: 58, 60, 62" // MASS WEIGHT: 3.2 lbs.
DRAW WEIGHT: 35, 40, 45, 50, 55, 60, 65

Tiburon and Buffalo come standard with a custom, hand-made Flemish string, calf hair string silencers, string leeches, rug rest, calf hair side plate, bow stringer and carrying case.

2-PIECE QUIVER

For those diehard hunters looking for the ultimate hunting quiver, this 4-arrow quiver works perfectly with your Hoyt Traditional bow for convenient, compact, and quiet arrow accessibility.

DORADO BLACK OUT W/MAPLE LIMBS

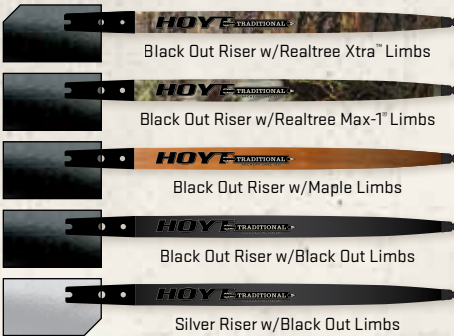

BRACE HEIGHT: 7-8" // RISER LENGTH: 19"
BOW LENGTH: 58, 60" // MASS WEIGHT: 2.5 lbs.
DRAW WEIGHT: 35, 40, 45, 50, 55, 60, 65

GAMEMASTER II BLACK OUT W/BLACK OUT LIMBS

BRACE HEIGHT: 7-8" // RISER LENGTH: 21"
BOW LENGTH: 60, 62" // MASS WEIGHT: 2.9 lbs.
DRAW WEIGHT: 35, 40, 45, 50, 55, 60, 65

Dorado and GameMaster II come standard with a custom, hand-made Flemish string, string leeches, rug rest and side plate, bow stringer and carrying case.

TRADITIONAL BOW COLOR OPTIONS:

GENUINE HOYT HUNTING ACCESSORIES

Precision, balance and convenience will make or break your hunt. Out on the bowhunting battlefield, you rely on your accessories to deliver, even after they have taken a beating. Hoyt accessories are engineered for quality and durability. When you've run the gauntlet and it's down to the wire, Hoyt accessories will deliver. Get Serious. Get Hoyt.

Arrow Rack In-Line shown in Max-1

ARROW RACK QUIVER SYSTEM

- » Proven Shock Rod Technology
- » Extremely lightweight
- » Fits close and tight to your bow for a compact, well-balanced setup
- » In-line and Double Gripper are universal quick-detach quivers
- » Shorty quick-detach and 2-piece mount directly to the bow
- » Compatible with both fixed blade and mechanical broadheads
- » Available in Realtree Xtra, Max-1, Realtree AP Snow, Under Armour Ridge Reaper and Black Out

SHOCK ROD COLOR OPTIONS

Sights, quivers and stabilizers are available in 9 different shock rod color options. See your dealer for details.

TEAM HOYT COMPOUND RUTHLESS WORLDWIDE DOMINATION

Every year, Hoyt bows ruthlessly dominate at major tournaments worldwide and pulverize World Records. In Men's Pro events, Hoyt bows have taken the top podium spot more often than all the other 30+ bow companies combined. Beyond that, 7 World Records were shattered by Hoyt shooters in 2015 alone. Let those feats sink in. Every year, the story is the same: no other bow company comes close. Want results? Get Serious. Get Hoyt.

Chart based on the premier Men's Pro Category in World Archery, USA Archery, NFAA, ASA and IBO tournament circuits.

NEW

HYPEREDGE

HYPEREDGE™ STEADY PERFORMANCE. PURE SUCCESS.

Building upon the success of its ProEdge predecessor, the HyperEdge brings enough performance-enhancing upgrades to make any medal-seeking shooter hyper. The HyperEdge adds the all-new UltraFlex limbs, DFX Cams, with optional limb stop, and proven Zero Torque Cable Guard System to a dominant array of existing Hoyt Technologies. That means a high-power, torque-free shooting experience with the stability of a broad string angle and a rock-solid back wall. Hyperventilating? You should be. HyperEdge.

HYPEREDGE TECHNOLOGY

DFX CAM 6 1/2

The all-new DFX Cam and 1/2 delivers optimized string position and a longer axle-to-axle measurement at full draw, promoting correct head position for repeatability and accuracy. This cam also features dual cable stops, and an optional limb stop, for a rock-solid back wall experience. If you want smooth draw cycles, great speed and unsurpassed comfort and consistency, you want DFX cams.

MODULAR GRIP SYSTEM

Our patent-pending modular grip system makes it easy to fine-tune your grip pressure by adjusting the grip angle on your bow. Standard with 4 grip modules to choose from, the HyperEdge gives you the freedom to choose a 0, +2, +4, or +6 degree grip angle, for a dead-center hold.

LIMB STOP

For those seeking an even harder back wall than already provided by the HyperEdge's dual cable stop, we have included a limb stop option. If you are seeking a new standard of back wall rigidity, our first-ever limb stop option delivers.

PODIUM X ELITE™ WORLD RECORD COLLECTOR

The Podium X Elite has proven worthy of its name by sweeping podiums, racking up golds, and leaving smashed world and national records in its wake. That's what you get when you lock the world's premier engineers in a room with its best archers: a dominant species of target bow, capable of breaking 6 World Records in its first season. Podium X Elite is the most tunable and accurate target bow series ever produced, boasting a modular grip system, adjustable cable guard bar and loaded with proven Hoyt technology and innovation from cam to cam. Claim your place on the podium.

PRO COMP ELITE FX™

Purpose-built to bring faster arrow speeds and elite tournament-grade performance to short-draw shooters, this 35-inch bow packs real fire. Its blazing speed and compact, light-weight nature have also made this fireball a fast favorite of top-tier 3-D competitors. The FX sports your choice of the smooth GTX Cam or the dynamic Spiral Pro Cam, paired with XT 2000 limbs. The short draw model brings the GTX Cam with XT 1000 limbs. Which-ever your choice, this compact, medal-winning rig will bring you full-size, competition-torching performance.

FREESTYLE™ IT ALL BEGINS HERE

Engineered to pack maximal performance into a minimal price tag, the Freestyle brings legendary Hoyt craftsmanship, classic Hoyt styling and a myriad of features to the field. This full-blown adjustable target bow bears the best technology of our premier bows: a fully-machined riser, a low-torque self-grip, a split limb design and our smooth-drawing GTX Cam 6 1/2[®] System. The Freestyle is bar-none the best value target bow on the market, delivering Hoyt needle-point accuracy on a budget.

DRAW LENGTH ADJUSTABILITY

Freestyle is available in a wide range of draw lengths and features the GTX Cam 6 1/2 System that can be adjusted in half-inch increments without the use of a bow press for the perfect draw length fit.

FREESTYLE™

FREESTYLE CHAMPIONSHIP RED & COBALT BLUE

AXLE-TO-AXLE: 39" // FPS (ATA): 308 // BRACE HEIGHT: 7" // MASS WEIGHT: 4.2 lbs.

Speed +/- 2 fps. See inside back cover for complete specs and color options.

PRODIGY™ TECHNOLOGY

PRO SERIES LIMB ADJUSTMENT DOWELS
Our revolutionary, patent-pending Pro Series Limb Adjustment Dowels feature our standard left and right adjustability and now a new Independent Limb Tuning Technology allows for micro adjustments to the limbs, ensuring they always stay centered and balanced throughout the draw cycle.

VERTATUNE™ CLICKER PLATES
Each Prodigy Series riser comes with 3 machined aluminum VertaTune clicker plates for a low, medium and high rest/plunger position. This technology allows for 6mm of overall adjustment for fine tuning to your preference and setup.

“Hoyt’s Recurve Stealth Shot is an absolute game changer.”
– Jake Kaminski (USA)
Olympic Silver Medalist

FORMULA™ THE EQUATION FOR DOMINANCE

85 years of relentless innovation has culminated in the Formula Series: hands down the winningest system in recent history. Each Formula Series riser features the elongated Hoyt Paralever pocket system, delivering unparalleled precision to limb-riser alignment and a stone-stable shooting platform. This durable, vibration-killing system also delivers an ultra-smooth limb flex pattern, free of hot spots. This is the Formula for a consistent, surgically accurate shot; the proven Formula for success.

RECURVE STEALTH SHOT™

The Hoyt Recurve Stealthshot is compatible with Prodigy and ION-X target recurve risers and the Tiburon Traditional recurve bow. Scan the QR code to see our YouTube video of the Recurve Stealth Shot in action.

GRAND PRIX™ RISERS

Experience the dead-on alignment and durability of Hoyt's Grand Prix Series risers and you will instantly understand why it is the most imitated system in recurve history. When we invented the dovetail system more than 30 years ago, it was immediately adopted as the international standard for recurves. In the three decades since then, this system has been unsuccessfully imitated by companies the world over. Their efforts have proven one thing: no one does it like Hoyt.

PRO SERIES CUSTOM COLORS

Pro Series Tiller Bolts and High Wrist Wood Recurve Grips available in 8 custom colors (compatible with all current Hoyt target recurves).

FORMULA/GRAND PRIX LIMBS

We pride ourselves on an unrivaled line of recurve limbs that deliver speed, fluidity and dynamic accuracy at a level never matched. This philosophy has delivered elite shooter performance, and swept podiums around the world. Whether you are a world-renowned competitor or picking up a recurve for the first time, we have a riser and limb combo engineered specifically for you. Our most recent addition is the premier Carbon Quattro model, which, after years of intense R&D, has created a class all of its own.

FORMULA/GRAND PRIX LIMBS

FORMULA/GRAND PRIX CARBON QUATTRO™

The Quattro raised the stakes on high-performance limbs. More torsional stiffness than any limb we've ever built, the Quattro offers better dynamic limb straightness and string tracking, ultimately leading to a faster, more accurate limb with decreased vibration. Shoot this once, and then again and again and again. A feeling you won't want to let go. Available in short, medium and long, 22-50 lbs in 2 lb increments.

FORMULA/GRAND PRIX CARBON ACE™

Never before have we introduced a high-end limb at this kind of price. The Carbon Ace, handcrafted in the USA, is loaded with high-performance design and materials such as Hoyt's exclusive Syntactic Foam and Triaxial Carbon Cores. Fast, smooth and accurate, Carbon Ace will blow your mind without blowing your budget. Available in short, medium and long, 22-50 lbs in 2 lb increments.

FORMULA/GRAND PRIX CARBON 720™

An optimum limb choice for intermediate archers, the Carbon 720 combines aerospace carbon and rock maple cores for a smooth, accurate limb with great performance and feel. Available in short, medium and long, 22-50 lbs in 2 lb increments.

FORMULA/GRAND PRIX EXCEL™

An affordable option for entry level archers looking to start the journey with quality equipment. Hand-crafted reliability at an affordable price. Available in short, medium and long, 20-40 lbs in 2 lb increments.

GENUINE HOYT MEN'S APPAREL

Bowhunting is not a hobby; you don't invest 4:00 mornings, weekends, and holidays in a hobby. It is a way of life and an identity to be proud of. Wear that pride on your sleeve, literally. From hoodies and hats to jerseys and t-shirts, Hoyt has daily apparel that makes a statement.

AMERICAN HERITAGE PATRIOTIC AND PROUD

When all service men and women give so much, and so many give all, it's impossible to adequately honor the warriors who protect our freedoms. The American Heritage Edition bow symbolizes gratitude for these heroes, and love for this great country. Each year, a portion of the proceeds from American Heritage bows are donated to Sportsmen for Warriors, providing some of our nation's finest with bows and all-expenses-paid hunts. We are honored to team up with each of you in this gesture of gratitude. God bless America.

In 2015, Hoyt donated funds from the sale of American Heritage bows to Sportsmen for Warriors to take five warriors on all-expenses paid whitetail hunts. Scan the QR code below for more details.

Available on Carbon Defiant, Defiant and Carbon Spyder Series bows.

Vicki Cianciarulo

New for 2016: Vicxen now available with purple accents.

VICXEN™ SEDUCTIVE AND DEADLY.

You know there are few things more attractive than a woman with a bow in her hand, but that's irrelevant; you don't shoot for approval, you shoot because you love it. For years, women have used Vicki Cianciarulo's Signature Series bows to prove their independence and their bowhunting skills. These seductively deadly bows come in a variety of geometries and price points, because women bowhunters are anything but cookie-cutter. Join the bold, passionate sisterhood. Shoot Vicxen.
