REVOLUTIONARY. EFFECTIVE. FUSE.

Like you, we know that bowhunting isn't just a pastime. It's a lifestyle. And to live it to the fullest, you can't waste your precious time on gear that can't keep pace. That's why we engineer FUSE custom accessories – to deliver cutting-edge technology and unshakable performance equaled only by your commitment to excel.

Bowhunting is extremely tough and demanding – so, tip the odds in your favor. Outfit your bow with confidence. Conquer the hunt with FUSE.

CARBONBLADE

NEW CARBON BLADE History has been made. Stabilizer technology will never be the same. The new FUSE Carbon Blade transcends ordinary stabilizers with capabilities and benefits unmatched by any other stabilizer system. Period.

NEW CLINCH SERIES RELEASES When FUSE enters a new product category, we do it right. We only consider the very best in design, function, materials and craftsmanship. The all-new FUSE Clinch Series epitomizes this drive for excellence.

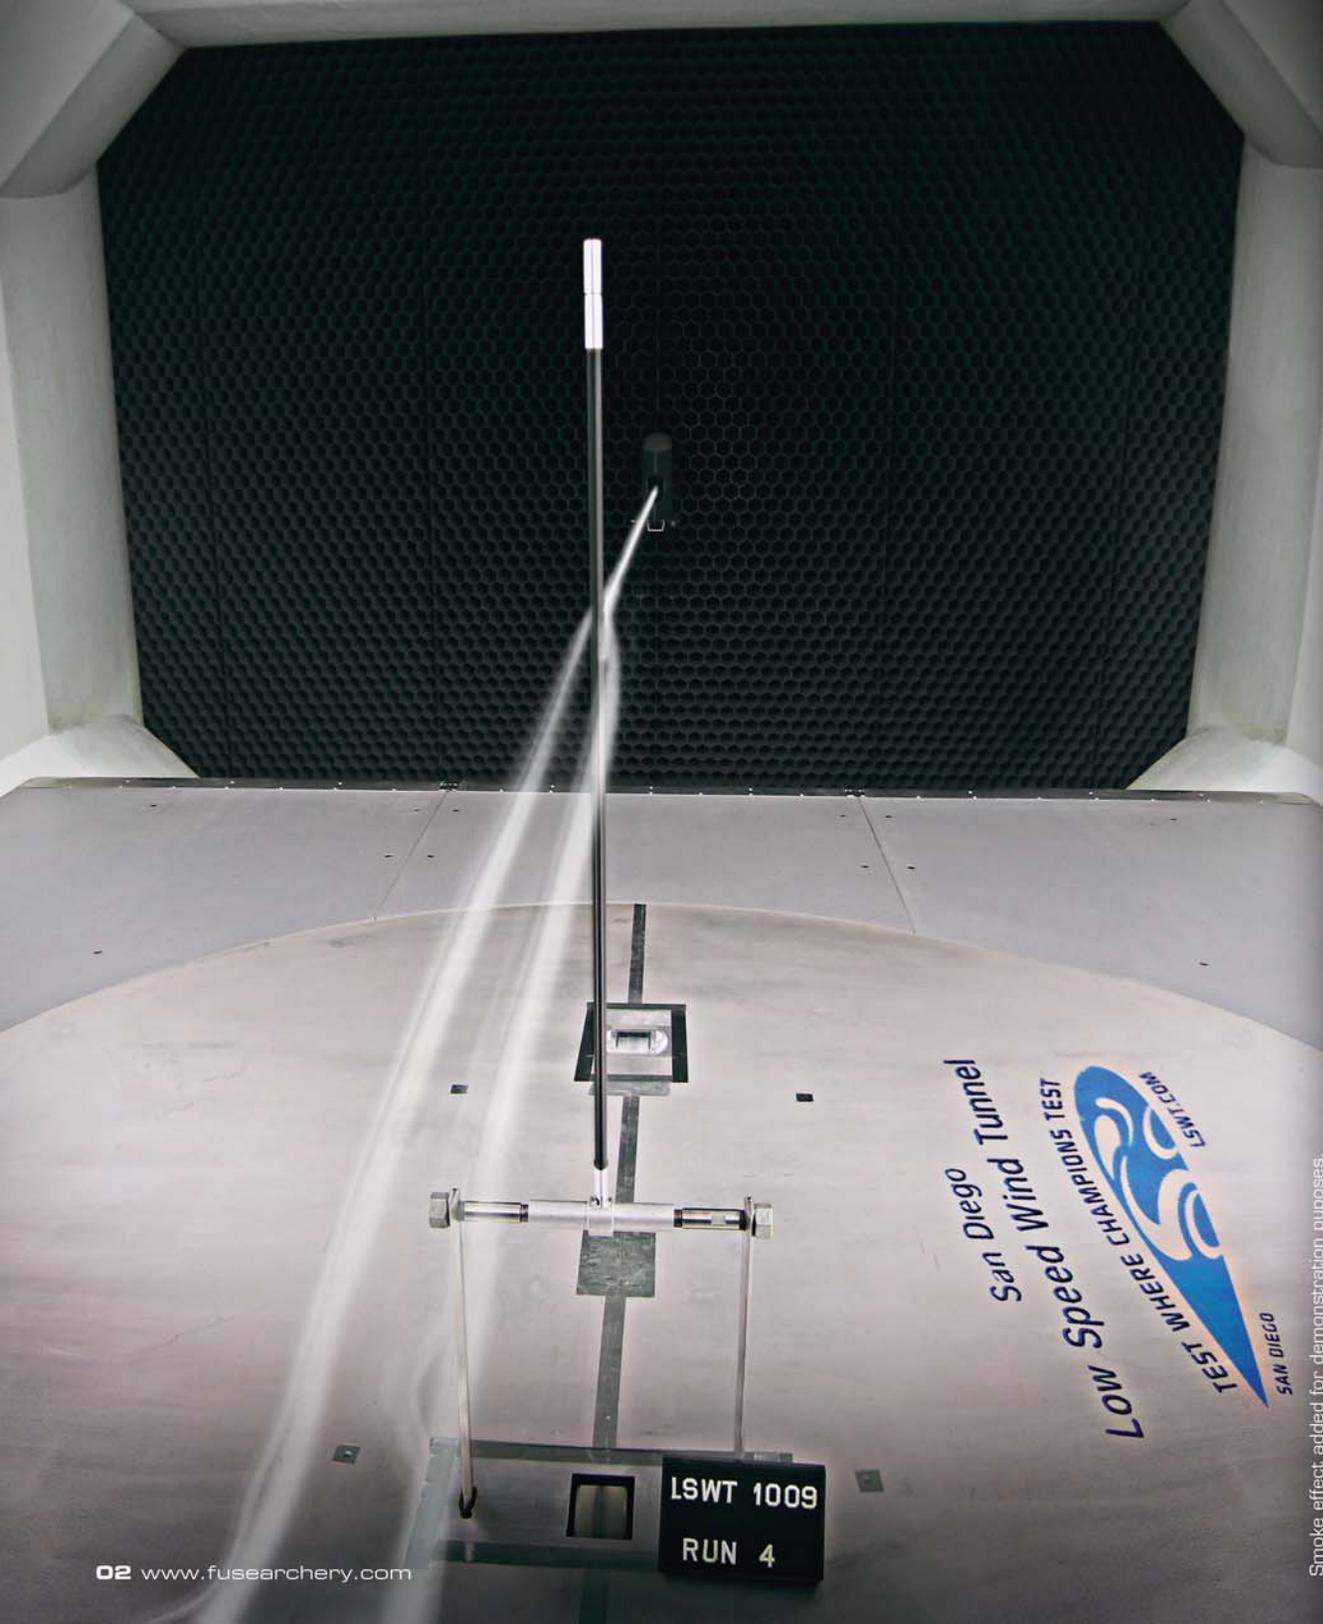

NEW CARBON PILOT SIGHTS Another first of its kind, the new FUSE Carbon Pilot Sight Series is at the forefront of cutting edge bowhunting design and technology. We've optimized structural carbon components to bring precision, lightweight sights to a whole new level.

ULTRAREST

NEW ULTRA REST™ The critical barrier between success and failure is your arrow rest. Enter the all-new FUSE Ultra Rest. Featuring trusted, reliable patented technology to ensure ultimate accuracy and success on the hunt.

WIND-TUNNEL TESTED FUSE engineers used sophisticated real world wind tunnel testing to prove that Carbon Blade generates up to a 70% reduction in crosswind drag, promoting a far faster target acquisition, hold, and shot execution in windy conditions than any other available stabilizer.

The FUSE Carbon Blade custom stainless-steel weights are an integral part of the total performance of the Blade stabilizer system, with the unique nested shape promoting even less drag at the critical far end. The included custom Doinker® damping unit is also aerodynamically shaped to work in harmony with the Carbon Blade system.

**"IN THEORY" WASN'T GOOD ENOUGH.
WE TESTED. THEN TESTED AGAIN.**

FUSE Engineers traveled to the world-renowned San Diego Wind Tunnel to fine tune Carbon Blade's innovative design, solidify their theories, gather critical data and quantify the improved performance of this amazing new system. The results were astonishing. A measured 70% reduction in drag at wind velocities commonly encountered in outdoor tournament competition, with virtually no change in wind drag all the way past 40 miles per hour. Ordinary stabilizers created more than 4 times more drag force in only a 20 mile per hour wind gust. This amazing difference directly translates to higher scores.

Smoke effect added for demonstration purposes.

A SIMPLE CONCEPT THAT WILL CHANGE ARCHERY FOREVER.

Completely unique. Completely effective. FUSE completely redefines the stabilizer with the all-new Carbon Blade. Never before has a stabilizer made this much difference.

EXTRA STIFFNESS IN THE CRITICAL HORIZONTAL PLANE Through rigorous lab and field testing, and direct feedback from some of the world's best archers, FUSE engineers have optimized the flex pattern of Carbon Blade. The engineered flex pattern maximizes horizontal plane stiffness to improve aiming and take total control of the critical launch phase of the shot, the short time when the bow riser must remain stationary while the arrow is departing the bow. Higher effective inertia due to this supreme horizontal plane stiffness improves clearance, consistency and eases tuning. And, horizontal plane stiffness also reduces target "float", allowing a more confident, shorter aim time shot, even indoors when you're not fighting the wind. On the other hand, through feedback and testing, it was apparent that top shooters require a more vertically flexible pattern in order to prevent severe recoil, vibration and noise created after the arrow has already left the bow. Carbon Blade's custom flex tuning is the only stabilizer design to address both requirements.

BLADE

WORLD CHAMPION REO WILDE ON THE NEW CARBON BLADE:

"This new Carbon Blade is incredible! I'm able to hold steadier than ever and execute the shot without getting blown around in the wind. Sometimes the difference between making the podium or not can be just 1 point... This is a stabilizer system that will up your score card!"

CARBONBLADE™

CARBON BLADE STABILIZERS

Options: 24", 27", 30" & 33"

Carbon Blade is the most advanced stabilizer ever. FUSE engineers solved the inherent de-stabilizing effects of wind on ordinary target stabilizers, while greatly enhancing the chief function of any stabilizer, holding the bow dead still during the launch phase of the arrow. The asymmetric engineered flex pattern of the Carbon Blade also enhances vibration and recoil absorption in the vertical plane, and maximizes horizontal plane stiffness to maintain total control of the arrow launch. The optimized, aerodynamic shape dramatically reduces wind drag up to 70%, resulting in a dead steady hold in even the toughest windy conditions, yielding higher scores. (Doinker® and 3 x 1 oz. weights included with each rod.)

CARBON BLADE SIDE RODS

Available Lengths: 8", 10", 12" & 15"

Carbon Blade side rods provide the ideal counterbalance while maintaining the aerodynamics of the Carbon Blade System. This ensures minimum wind drag and optimal inertial control. Custom Blade stainless steel weights allow for custom weight distribution. (Side Rods sold individually. Doinker® and 3 x 1 oz. weights included.)

BOWHUNTER FREESTYLE STABILIZERS

Available Lengths: 10" & 12" Available weights: 8, 11, 14 & 17 oz.

Engineered specifically for archers competing in Bowhunter Freestyle Divisions or those archers looking for a shorter, high-inertia setup, the new Carbon Blade BHFS stabilizer incorporates all of the Carbon Blade advantages, with a uniquely designed perimeter weight system. Two available lengths and four available weight options provide for a true custom setup.

CARBON BLADE EXTENSION

Available Lengths: 3", 4" & 5"

Carbon Blade reinforced extensions allow custom balancing of V-Bar systems.

CARBON BLADE V-BARS & SIDE ROD ADAPTER

Carbon Blade V-Bars are available in 40 x 0 degree and 40 x 10 degree angles. Side Rod Adapter provides a single offset 2-way adjustable mounting point for counterbalance purposes on either side of the bow.

CARBON BLADE WEIGHTS

1 oz. custom stainless steel weights are an integral part of the overall aerodynamic and functional performance of the Carbon Blade System. (Sold in single packs and 3 packs). See chart on next page for appropriate connector bolt lengths based on number of weights used. Bolts sold separately.

CARBON CONNEXION

CARBON CONNEXION™

Options: 27.5", 30" & 34.5"

Today's top tournament circuits demand unparalleled precision and consistency. There's simply no place for mediocre gear. Enter the shooter-approved FUSE Carbon ConneXion stabilizers and side rods. Constructed of lightweight yet sturdy carbon fiber and sporting strategically placed Shock Rods and Doinkers, these popular podium toppers offer unsurpassed vibration damping and optimal weight distribution for the utmost in smooth, consistent, medal-winning performance. With a variety of lengths available, there's sure to be a Carbon ConneXion stabilizer waiting to propel you to the podium.

DOINKER

CARBON CONNEXION™ SIDE RODS

Available Lengths: 8" & 10" (Sold individually.)

CARBON VFR™ LIMB ROD

Available Length: 2"

The FUSE VFR Limb Rod is an ideal recurve top-rod specifically engineered to absorb vibration and increase inertia during the critical arrow launch sequence. Low in overall mass, the VFR Limb Rod is particularly well suited to bows using the new Paralever Limb Mounting System™. Equipped with an intermediate durometer damper and a single weight, the design allows mass adjustment flexibility for discerning shooters. (Also available as Blade version with Blade Doinker and 2 Blade system weights.)

CARBON BLADE

Introducing the all-new FUSE Carbon Blade Hunter Series. The pinnacle of our latest industry-advancing stabilization technology. Featuring a radical new design built around an aerodynamic, incredibly strong, lightweight carbon fiber structure, this sleek new shape produces up to 70% less wind drag than ordinary stabilizers – a benefit you'll appreciate when hunting in even the toughest weather conditions.

This stiff carbon structure is the ideal platform for exclusive FUSE vibration damping technologies. Offered in a full range of lengths and weights, FUSE Carbon Blade stabilizers are the perfect complement to any serious hunting bow, and are available in Blackout, Realtree® AP™ or Max-1™.

CARBON BLADE 11.5"
weight: 8 oz.

CARBON BLADE 10"

weight: 7.2 oz.

CARBON BLADE 6.5"
weight: 4.6 oz.

DOINK-er

PURPOSE BUILT FOR THE FIELD.

SHOCK-ROD
TECHNOLOGY

A well designed hunting stabilizer is a key component of your overall bow-hunting system. FUSE high-performance hunting stabilizers integrate with your compound bow to absorb vibration, deaden noise and increase bow inertia and proper balance to minimize the effects of bow hand-torque in different shooting conditions. High performance components such as carbon structures and elastomeric dampers radically reduce noise and induced vibration without adding excess weight. That's why FUSE stabilizers are custom built with so many high-tech materials, and are world renowned for their design and effectiveness.

CARBON CONNEXION

CARBON CONNEXION
HUNTER 6.5"
weight: 5.4 oz.

DOINKER

CARBON CONNEXION
HUNTER 8"
weight: 6.2 oz.

FUSE Carbon ConneXion dominates in hunting stabilizer design and performance. Optimized for unbeatable balance, Carbon ConneXion is the choice of serious bowhunters worldwide. Crafted from the finest carbon fiber and CNC components, Carbon ConneXion uses Doinker® and Shock Rod™ technologies for enhanced performance. Offered in your choice of Blackout, Realtree® AP™ or Max-1™.

ENDURO 5.25"
weight: 4.4 oz.

AXIUM

FUSE Axiom Stabilizers are renowned for their proven performance and quality. Like all FUSE stabilizers, the Axiom line boasts vibration-killing design and whisper quiet performance with Doinker® and Shock Rod innovation. Available in a wide range of lengths and weights. Offered in your choice of Blackout, Realtree® AP™ or Max-1™.

AXIUM 2"
weight: 3.5 oz.

AXIUM 4"
weight: 6 oz.

AXIUM 6"
weight: 7 oz.

SHOCK ROD TECHNOLOGY

ENDURO

The proven FUSE Enduro is the leading elastomeric stabilizer on the market. Small in stature but engineered for big-time results, Enduro shatters noise and vibration thanks to its unique, custom "tuning fork" design. Lightweight and budget-friendly, Enduro packs industry-advancing technology into a small but functional design. Available in black or camo.

Clinch the shot. The all-new FUSE Clinch Series Releases are the ultimate connection between you and your string. Let your arrows fly with precision, confidence and ultimate accuracy. Featuring a smooth, crisp trigger action with zero creep for total shot control. Clinch's proven, all-weather, reliable In-Line Design features hand-honed, high grade steel components. The Advanced Radius jaw reduces shot-compromising string pinch and prolongs D-Loop or string life. The forward, knurled trigger promotes a slip-free, positive engagement and the no-sweat strap with a high quality alloy buckle means security, consistency and total comfort. In those high-pressure moments, clinch the shot with a FUSE Clinch Series release.

CLINCH BARREL

The FUSE Clinch Barrel model releases feature a patented, reliable, three-hole hardware adjustment system and a solid in-line path from string to trigger, to fine tune your individual draw length. Available in both black and Realtree® AP™ camo.

DON'T FLINCH. CLINCH.

Good trigger control is a critical component of ultimate accuracy. Whether one is using a firearm or archery gear, a crisp, clean "glass-break" trigger is critical to avoiding anticipation and interference with a clean shot. The superb Clinch Series sear components and mechanism provide this critical crisp trigger break, enhancing accuracy and shooter confidence.

NO-SWEAT BUCKLE STRAP

ADJUSTABLE REACH FOR PERFECT FIT

CRISP, CREEP-FREE TRIGGER

CLINCH CFT™

Clinch Custom Fit Technology (CFT) releases feature a proven and patented high strength nylon connector that allows for precision length adjustment. This creates a perfect fit and reliable and repeatable anchor, critical to consistent and accurate shooting. Available in both black and Realtree® AP™ camo.

FUSE PILOT COMP & CARBON PILOT SIGHTS We're proud to introduce the all-new Carbon Pilot Series. The heart of the new Carbon Pilot is an ultra light yet rock solid carbon sight rail extension. Combined with other core Pilot features such as durable sight housings, precision mounts and incredibly bright fiber optic pins. Carbon Pilot brings you peak performance, whether you're in the woods or in the heat of competition. Low-maintenance and user-friendly, Carbon Pilot is the most customizable, performance-driven sight series available today.

The new Carbon Pilot Series Sights feature an adjustable, high-performance carbon rod extension design that allows you to fully customize your sight position for perfect alignment of your peep to sight housing.

LIGHT 'EM UP.

The perfect shot often presents itself in less-than-ideal conditions. When hunting from a ground blind or in other low-light situations, trust the FUSE Sight Lite to dramatically brighten your sight pins – giving you the confidence you need to make the shot. Sight Lite is compatible with any sight that accepts a 3/8-24 NF or 1/4-28 NF thread sight light.

CARBON PILOT G-SERIES

CARBON PILOT G-SERIES™

The Carbon Pilot G-Series gives bowhunters the advantages of convenient gang adjustment and customizable leveling for total control and consistent performance. Ultra-light and slender yet tough and durable carbon fiber components combine with incredibly bright fiber optic pins and a highly effective, optional LED Sight Lite for a clearer sight picture. Carbon Pilot G-Series guarantees to maximize your hunt in even the most demanding conditions.

CARBON PILOT M-SERIES

CARBON PILOT M-SERIES™

Carbon Pilot M-Series sights give diehard bowhunters and discerning target archers the accuracy-boosting benefits of amazingly precise and repeatable micro-adjustment. With all the innovative carbon construction and features of the G-Series sights, plus the added benefits of second and third axis leveling for pinpoint accuracy, the Carbon Pilot M-Series is an innovative, customizable choice for serious hunters and competitors. Also available is a hunter configuration that features an .029" top pin and .019" descending pins for precision aiming at longer distances and fast target acquisition up close.

PILOT COMP

PILOT COMP™

The Pilot Comp delivers high standards of design and performance for top 3-D shooters and technical bowhunters. A precision-aligned dovetail mounting bracket assures unfailing performance and optimal sight radius adjustment. Precise .019 pins, super strong yet amazingly lightweight alloy components, solid lockdown capability and second and third axis adjustment give this innovative, proven sight incredible levels of tack-driving accuracy. Elevate your game and enhance your hunt with Pilot Comp.

SHOCK-ROD
TECHNOLOGY

EPT
EJECTOR PIN TECHNOLOGY

The EPT quick release system features an automatic snap-lock lever that engages when the EPT is depressed and the quiver is mounted. The innovative mounting system allows for quick and simple removal and re-attachment in the field.

SECURES YOUR ARROWS. QUIETLY.

Ventera's exclusive one-piece, co-molded hood means the rubber insert is actually molded into the hood. The insert will never shake, rattle or fall out. It's truly the utmost in quiet, tough, vibration-free performance.

Shorty's unique design is unlike traditional quick detach models. It mounts to your upper quiver mounting hole - not your sight mount. Shorty is compact, lightweight and versatile.

All Ventura and Satori quivers are available in Blackout, Realtree® AP™ and Max-1™ camo. FUSE Quivers fit most major brands including Hoyt®, PSE®, Bowtech®, Elite Archery® and Mathews®.

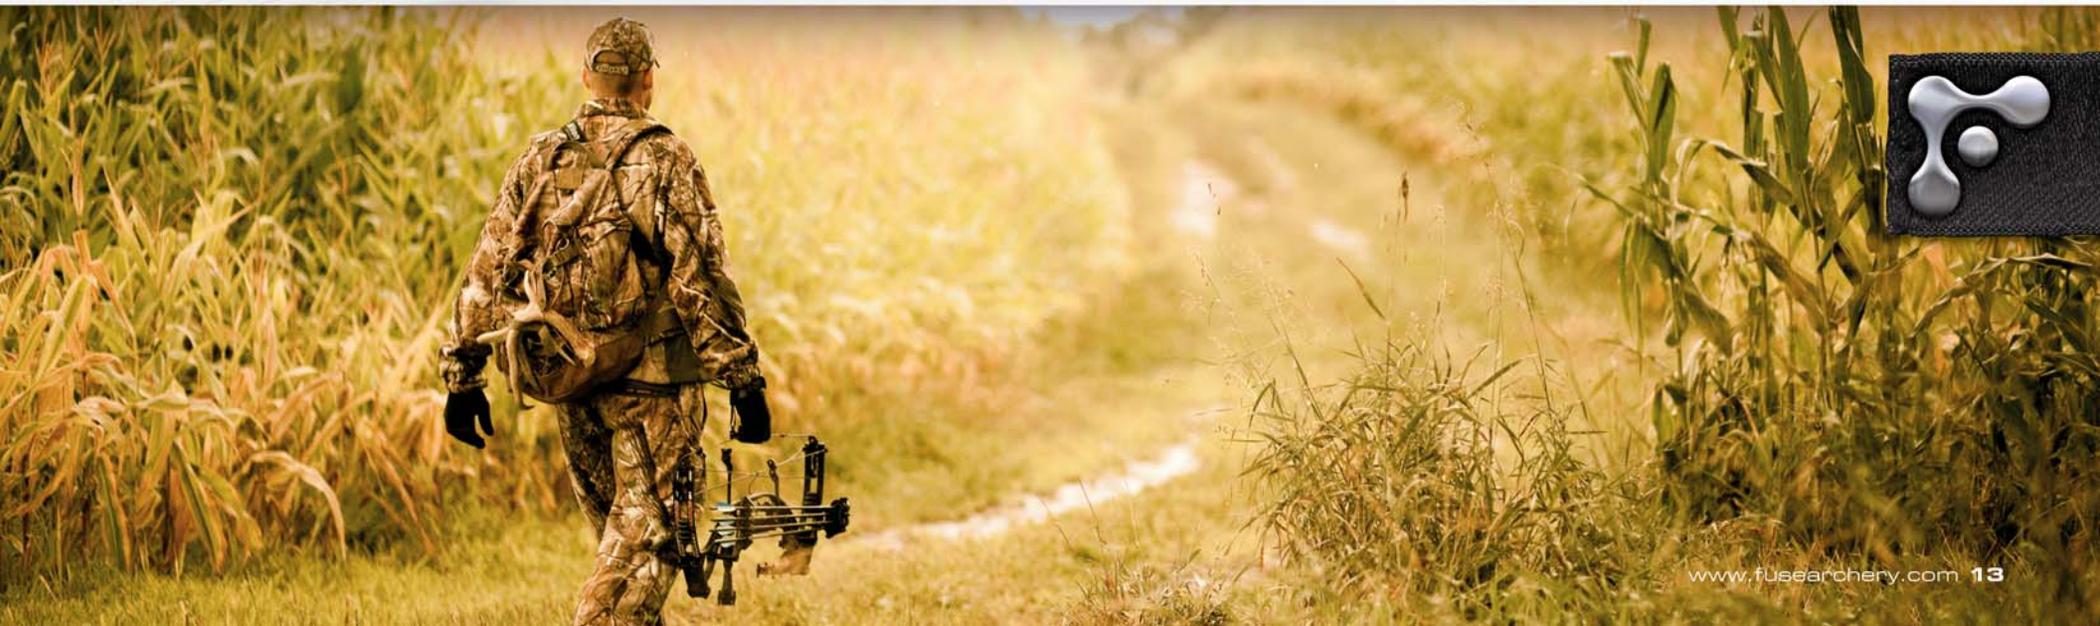

VENTERA™ QUIVERS

FUSE Ventura quivers offer serious bowhunters radical design, innovative technologies and rock-solid arrow protection. The popular Ventura Series includes both One-Piece and Two-Piece designs, with each model featuring our double arrow gripper and exclusive EPT Quick Mount System. The Quick-Detach equipped, compact and light Shorty model attaches to the upper quiver-mounting hole. The Ventura Lite model offers a budget-friendly alternative. Available in your choice of a custom 3-arrow or 5-arrow configuration, and in Blackout, or the ever-popular Realtree® AP™ and Max-1™ camo patterns to keep you concealed no matter where you hunt.

SATORI™ QUIVERS

Bowhunters trust Satori quivers for field-ready function and uncompromising reliability. With an extensive line to accommodate any style of bowhunting, there's sure to be a Satori to fit your needs.

The lightweight, versatile Satori Two-Piece offers four inches of vertical travel. The popular Satori One-Piece with EPT Quick Disconnect is lightweight and strong and features six Shock-Rods for an amazingly quiet shot – and exclusive Ejector Pin Technology for simple removal and installation. Satori Shorty with EPT Quick Disconnect is light and compact and mounts to the upper quiver mounting hole. Satori Lite is a value-priced model that offers innovation and dependable performance at a budget-friendly price. Available in 4 or 6 arrow configuration.

SHOCK-ROD
TECHNOLOGY

FUSE WHISKER BISCUIT®

The versatile FUSE Whisker Biscuit is a trusted choice for both rookie and veteran bowhunters due to its simple, yet highly effective design and its ultra-quiet, reliable performance. Custom Shock Rod Technology deadens noise, and the Biscuit's unique Quick Shot design guarantees simple, snag-free loading of both carbon and aluminum arrows.

ACCULAUNCH™ BLADE

The ever-popular FUSE AccuLaunch Blade remains a top choice of serious target archers worldwide. Its precise Micro Adjust Technology promises tournament-winning accuracy, reliability and consistency. The laser-machined .010 spring steel launcher provides for a clean arrow launch and perfect tuning performance. Simple and reliable, the FUSE AccuLaunch Blade is your key to victory.

ACCULAUNCH PRONG

Serious bowhunters trust the all-business, no-frills FUSE AccuLaunch Prong for proven performance in the clutch. Whether you outwit trophy whitetails in Midwestern treestands or chase mule deer across Rocky Mountain ridgelines, trust the AccuLaunch Prong to deliver the utmost in precision and durability.

ACCULAUNCH FALL-AWAY

Bowhunters and target shooters know they can count on the FUSE AccuLaunch Fall-Away for unflinching performance in the woods and on the range. Engineered specifically to eliminate fletching clearance issues and inconsistency, this rest offers the highest standards of accuracy, precision and all-around versatility.

ULTRAREST™

Reliability, quality and effectiveness are the hallmarks of the new FUSE Ultra Rest. This patented and proven design features Velocity Drop-away Technology, allowing the rest to drop only when the bow is actually fired.

When stalking, drawing your bow, or letting down, Ultra Rest totally captures the arrow, even upside down, so it always remains in total control – even in the most challenging and intense bowhunting situations. The key to this is a patented internal cam/brake design, which also offers total silence. The convenient, extended thumb lever allows you to cock the rest into a full capture position, where it will remain, giving you complete control of your arrow whether you are drawing or letting down.

Ultra Rest is bowhunting's premium choice in fall-away rest selection.

FUSE STEALTHSHOT™

The accuracy-boosting, noise and vibration reduction benefits of our StealthShot String Suppression System are well-known. Bowhunters trust StealthShot for amazingly consistent performance hunt after hunt. Meticulously engineered to create a clean release of the arrow from the string while destroying noise and vibration, StealthShot's recoil-reducing action can mean the difference between eating tag soup or tenderloins. Featuring a super strong, incredibly lightweight carbon rod affixed to an improved, low-durometer elastomeric component, StealthShot also eliminates arm slap.

STEALTHSHOT STABILIZER MOUNT

STEALTHSHOT DIRECT MOUNT

Options: Direct Mount or Stabilizer Mount. Available for most major bow makes and models. See your local dealer for more information.

FUSE QUIVER CADDY™

Treestand hunters trust the FUSE Quiver Caddy to anchor their quivers quickly and effectively. No more fumbling around trying to hang your quiver in a convenient spot. Quiver Caddy utilizes a simple, yet highly effective design to maximize your setup and let you focus on your hunt, not your gear. Fits all 2009-2011 FUSE Ventura and Satori One-Piece and Shorty quivers.

FUSE
CUSTOM STRINGS™

FUSE CUSTOM STRINGS™ & CABLES

FUSE Custom strings and cables go far beyond ordinary string construction methods and exceed all industry standards and capabilities for the most demanding archers and bowhunters. FUSE strings and cables are constructed, twisted and served under a preload of hundreds of pounds on computer controlled, custom built FUSE Continuous Tension Technology™ string machines, providing a level of performance unattainable with ordinary construction techniques – with finishing touches performed by hand craftsmen. FUSE string and cable material selections are rigorously tested and custom formulated to provide the ultimate shooting system for your bow.

STRING COLOR OPTIONS:

Gray/White, Blue/Black, Spruce Green/Black, Orange/Black, Pink/Black, Red/Black, Yellow/Black, Green/Black, Green/Ivory, Gray/Black, Black/Bronze, Brown/Bronze

Freestyle™

There's no better way to give beginning shooters a fun introduction to archery than with the versatile FUSE Freestyle. Its lightweight design and user-friendly function promise to help you enjoy your time outdoors and on the range. Available in camo or pink camo, Freestyle assures that you and your family will make great memories and develop into safe, skilled, confident archers. Tomorrow's diehards begin today with the FUSE Freestyle.

THE FREESTYLE™ PACKAGE

The FUSE Freestyle Kit includes everything shooters need to get started, including a 2-piece, 4-arrow quiver, a lightweight yet functional arm guard, a 3-pin fiber optic sight, a full-capture arrow rest, a brass nock set and three arrows. (Available in camo or pink camo.)

- Quiver
- Arrows
- Arm Guard
- Fiber Optic Sight
- Pro Rest
- Brass Nock Set

GROWS WITH YOU.

Freestyle features simple, modular draw length adjustment in 1/2-inch increments without the need of a bow press ensuring proper fit for a wide range of shooters.

29"	6½"	2.3 lbs.
Axle-to-Axle	Brace Height	Mass Weight
10-25+	14-24" (½" increments)	
Draw Weight Ranges (lbs.)	Available Draw Lengths	

FUSE recurves are a range of bows offering a fun, safe introduction to the world of recurve shooting and traditional archery for both kids and adults. Delivering reliable, consistent performance, incredible accuracy and lightweight design, FUSE recurves will start you on the right path. Every bow in the FUSE lineup boasts stylish good looks and high-quality Italian craftsmanship for top notch fit and finish. Choose FUSE for your recurve needs and experience incredible results.

INTREPID™ 60"

A true masterpiece of design and performance, the beautifully sculpted 60" FUSE Intrepid is a favorite among traditional archers who demand elegant design and fast, smooth-shooting, consistent performance. Crafted from exotic wood laminates and high-tech glass elements and featuring an extensive lineup of ATA standard accessory mounts – including a stabilizer mount – Intrepid is an ideal choice for shooters who crave classic design, accuracy and easy handling. Offered in 30-60# ATA standard weights in five-pound increments.

FOCUS™ 62" & 66"

Need a great starter bow for backyard family fun or an aspiring JOAD shooter? Look no further than the FUSE Focus. Offering low mass weight, custom craftsmanship, the highest quality components, standard accessory mounts for sights and stabilizers, easy-handling performance and wallet-friendly value, the FUSE Focus series is the clear choice for backyard fun or competitive shooting. Focus is available in 12-28# and lengths of 62" and 66" to give shooters customizable options when looking for the ideal starter or intermediate bow.

FOCUS JR.™ 48"

The wait is over. Focus Jr. is the ideal starter recurve for young shooters. Featuring high-quality glass and wood construction, the Focus Jr. is the ideal way to get your kids started in archery right – with a bow that fits them at a draw weight they can handle.
