

# 2010 FUSE ACCESSORIES PRODUCT GUIDE

**THIS IS OUR PROVING GROUND.**

# THIS IS OUR PROOF.

At FUSE, we understand what motivates you, what drives you day in and day out, all season long. We know how hard you hunt – how hard you work to achieve your goals. And we know you can't get there with mediocre, unreliable gear. Meet the 2010 line of high-end, purpose-built FUSE accessories. Engineered by hardcore bowhunters to address and eliminate the problems that can plague an otherwise epic hunt – things like shot-compromising noise and vibration – innovative FUSE accessories deliver

pro-quality performance and unparalleled craftsmanship to make you a more effective bowhunter. No gimmicks. No fancy marketing lingo. Just high-tech, durable, reliable, high-quality, hunter-approved accessories designed specifically for serious bowhunters. If you're tired of putting up with anything less than the best, it's time to take your hunt to the next level. It's time to complement your bow with the industry's most high-end, hardcore accessories. It's time for FUSE.

# SIGHTS

## SIGHTS ARE BETTER SEEN THAN HEARD.

When it comes to sights, all the bells and whistles in the world are meaningless if the pin isn't where it belongs at the moment of truth. That's why we build FUSE sights with premium hardware, advanced engineering and the tightest tolerances. FUSE Pilot Series Sights feature Shock Rod damping, extra bright and durable pins, armored fiber optic material, and precision mounts. They feature easy to grip knobs and a protective housing that fully shields the armored fiber optic for total reliability. Whether you choose a 3, 5 or 7 pin sight, pin configuration options include a bright .029 top pin for fast target acquisition at close distances and .019 bottom pins for precision aiming at longer distances or, optionally, all .019 pins. Whether it's filling your freezer or stepping to the top of the podium, Pilot Series Sights are the ultimate in precision accuracy.

	PIN DIAMETER		COLOR OPTIONS

**NEW PILOT G-SERIES™**

**NEW PILOT M-SERIES™**

**NEW PILOT COMP™**  
available in .019" pins only

**PILOT COMP DOVETAIL-MOUNT SIGHT**

The all-new Pilot Comp is the sight that 3D shooters and technical bowhunters have been waiting for. Pilot Comp features a precision-aligned dovetail mounting bracket offering total repeatability and sight radius adjustment, for an ideal sight picture with your peep sight. Other high-end features include precision .019 pins, super-fine adjustment and gapping capability, lighting capability and a super strong, ultra-lightweight design. For ultimate accuracy over varied terrain, Pilot Comp also boasts second and third axis adjustment with rock-solid lockdown capability. Available in 5-Pin.

**PILOT G-SERIES SIGHT**

The Pilot G-Series offers bowhunters total function and easy adjustment in the field or on the range. Available in 3 and 5-pin configurations, they feature slender, yet durable pins, allowing for an unobstructed view of your target. Featuring convenient gang adjustment and adjustable leveling, Pilot G-Series also offers a strategically placed sight light location for extra utility in tough field conditions.

**PILOT M-SERIES SIGHT**

The Pilot M-Series Sights offer bowhunters and competitive archers a high-precision, lightweight sight packed with industry leading innovation and technology. The easy-to-use micro-adjust design, allows for extremely precise adjustments. In your choice of a 3, 5 or 7-pin setup featuring second and third axis adjustment and a strategically placed sight light location. The Pilot M-Series are versatile, top-of-the-line sights for bowhunters and bowhunting class target competitors.

**SHOCK ROD TECHNOLOGY**

FUSE accessories feature exclusive Shock Rod Technology for the ultimate in stealth and rattle-free performance. Absorbing vibrations across the frequency spectrum, Shock Rod Technology reduces noise, including high-frequency noise that can alert game. Tests show that bows accessorized with FUSE Shock Rod-equipped gear dampen noise 32% faster than bows with ordinary accessories. And, not only does Shock Rod Technology reduce noise, it also helps prevent adjustment changes and loose screws that plague ordinary gear.

# STABILIZERS

## CARBON CONNEXION

FUSE Carbon ConneXion stabilizers have quickly become a top choice of dedicated bowhunters everywhere. Made of lightweight carbon fiber and aluminum components as well as Doinker and Shock Rod Technologies, they deliver big-time balance and smoothness that aid both treestand and spot-and-stalk bowhunters. Complement your bow with the stylish good looks and enviable technology that only Carbon ConneXion stabilizers offer.

**CARBON CONNEXION  
HUNTER™ 6.5"**  
weight: 5.4 oz.

**CARBON CONNEXION  
HUNTER™ 8"**  
weight: 6.2 oz.

**DOINKer**

The new innovative Enduro is engineered with a single, practical purpose: to demolish noise and vibration and produce a quieter, more consistent shot. Lightweight and budget-friendly, its unique, elastomeric design delivers incredible results and functionality at a price you won't believe.

**ENDURO™ 5.25"**  
weight: 4.4 oz.  
color options: black or camo

# AXIUM™

**AXIUM 4"**  
weight: 6 oz.

**AXIUM 6"**  
weight: 7 oz.

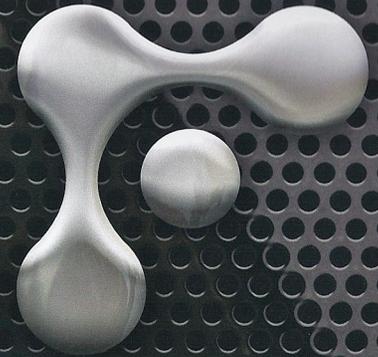

**AXIUM 10"**  
weight: 8.5 oz.

**AXIUM 2"**  
weight: 3.5 oz.

**AXIUM SIDEKICK**  
weight: 12 oz.

Axium stabilizers need no introduction. A household name in hunting camps worldwide, they're renowned for their proven design and performance. Technology-packed and complete with Shock Rod and Doinker technologies, the versatile Axium line offers world-class weight distribution and superior noise and vibration dampening. Available in a variety of lengths and weights - including our innovative, offset Sidekick model.

**CARBON  
CONNEXION™**

**CARBON CONNEXION™**

Options: 12", 27.5", 30" & 34.5"

Today's top tournament circuits demand unparalleled precision and consistency. There's simply no place for mediocre gear. Enter the shooter-approved FUSE Carbon ConneXion stabilizers and side rods. Constructed of lightweight yet sturdy carbon fiber and sporting strategically placed Shock Rods and

**CARBON CONNEXION™ SIDE RODS**

Available Lengths: 8" & 10"

Doinkers, these popular podium toppers offer unsurpassed vibration dampening and optimal weight distribution for the utmost in smooth, consistent, medal-winning performance. With a variety of lengths available, there's sure to be a Carbon ConneXion stabilizer waiting to propel you to the podium.

**CARBON CONNEXION™ 12"**

The Carbon ConneXion 12" stabilizer offers the same innovative engineering and design as the longer Carbon ConneXion models, but with 3-D shooters in mind. Ideal for archers who prefer a more compact set-up, this delivers world-class results in a smaller package. It makes use of lightweight, super strong carbon components and proven Shock Rod and Doinker technologies to keep your bow balanced and shock-free.

**AVAILABLE LENGTHS**

	34.5"	30"	27.5"	12"
CARBON CONNEXION STABILIZER				
CARBON CONNEXION SIDE RODS	10"	8"		
CARBON VFR STABILIZER	33.5"	29"	26"	
CARBON VFR SIDE RODS	12"	10"	8"	
CARBON VFR EXTENSION	5"	4"	3"	

All rods come with weights as shown. Additional weights sold separately.

# CARBON VFR

## CARBON VFR™ STABILIZERS

Available Lengths: 26", 29" & 33.5"

## CARBON VFR™ SIDE RODS

Available Lengths: 8", 10" & 12"

**DOINKER**

Light and sleek, strong and stable, FUSE Carbon VFR stabilizers and side rods offer streamlined performance and tight tolerances that lesser stabilizers only dream of. Utilizing proven FUSE technologies, pro-caliber Doinker® components and an exclusive Internal-Fit Ferrule System, Carbon VFR's are a favorite among discerning target archers who demand tack-driving consistency and record breaking results.

## CARBON VFR™ LIMB ROD

Available Length: 2"

The FUSE VFR Limb Rod is an ideal recurve top-rod specifically engineered to absorb vibration and increase inertia during the critical arrow launch sequence. Low in overall mass, the VFR Limb Rod is particularly well suited to bows using the new Paralever Limb Mounting System. Equipped with an intermediate durometer damper and a single weight, the design allows mass adjustment flexibility for discerning shooters.

## V-BAR ADAPTER

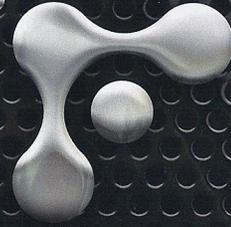

Machined from solid aluminum and anodized for durability and a clean finish, the FUSE V-Bar adapter allows you to perfectly balance your bow utilizing a stabilizer and side rods.

## CARBON VFR™ EXTENSION

Available Lengths: 3", 4" and 5"

The FUSE VFR extension uses a high-modulus carbon rod, and high-strength end couplers which are mechanically locked to each other, providing high stiffness with low mass. This unique design increases reliability and provides for one of the strongest extensions ever.

**FUSE WHISKER BISCUIT®**

Rookie and veteran bowhunters alike count on the Whisker Biscuit for whisper-quiet consistency and ease-of-use. Shock Rod Technology assures an ultra-consistent launch, and the Quick Shot design guarantees fast, snag-free arrow loading – whether you shoot aluminum or carbon arrows. Shoot the Whisker Biscuit and focus on the hunt, not your equipment.

**ACCULAUNCH™ PRONG**

The AccuLaunch Prong is all business and no fluff. A true workhorse that delivers proven, effective design, solid performance and unbeatable precision, AccuLaunch Prong and its Micro Adjust technology promise to boost your accuracy and make you a more effective hunter.

**ACCULAUNCH FALL-AWAY**

Say good-bye to fletching clearance issues and inconsistent shots. AccuLaunch Fall Away's user-friendly, precision-mounted design means hassle-free function and amazingly accurate groups. It attaches to your bow quickly and is easily adjusted in the woods or on the range.

**ACCULAUNCH BLADE**

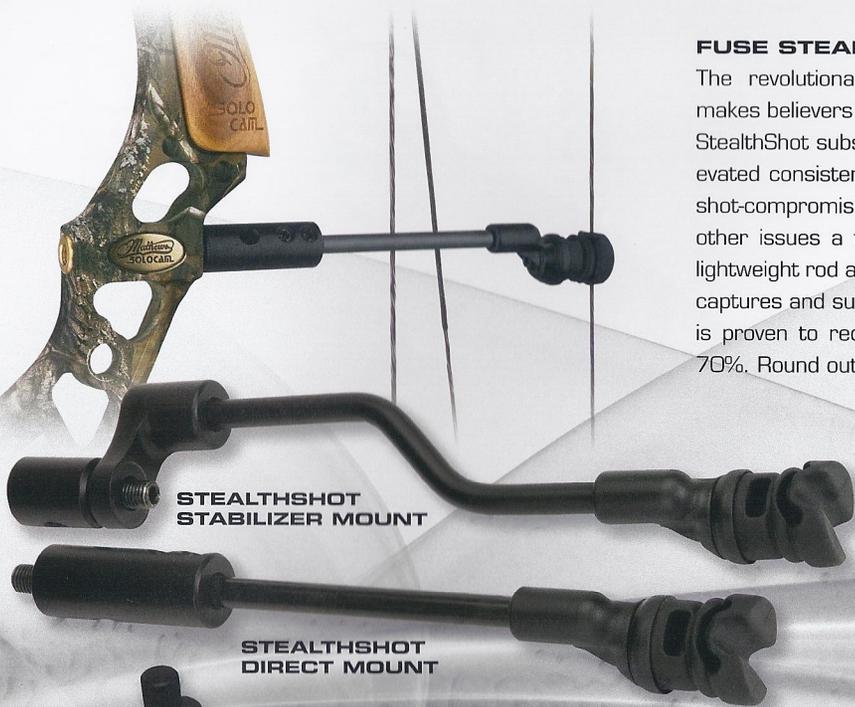

The popular AccuLaunch Blade with Micro Adjust offers increased consistency and reliability for serious target archers. A dominant force in tournament competition since its introduction two years ago, this innovative, high-performance design yields ultra-consistent results that help more archers shred the X-ring.

### FUSE STEALTHSHOT™

The revolutionary StealthShot String Suppression System™ makes believers out of even the most experienced bowhunters. StealthShot substantially minimizes shot noise and recoil for elevated consistency and quiet, vibration-free shooting – making shot-compromising problems like “arm slap,” “string buzz” and other issues a thing of the past. It features an ultra-strong, lightweight rod attached to a custom VersaFlex component that captures and suppresses the string after the shot. StealthShot is proven to reduce string movement and oscillation by over 70%. Round out your rig with a FUSE StealthShot today.

**Options:** Direct Mount or Stabilizer Mount. Available for most major bow makes and models. See your local dealer for more information.

**STEALTHSHOT  
STABILIZER MOUNT**

**STEALTHSHOT  
DIRECT MOUNT**

### FUSE CUSTOM STRINGS™

FUSE Custom Strings are built with a high-performance string material and come equipped with string silencers. Utilizing FUSE CTT (Continuous Tension Technology), each string is built with an incredible 700 pounds of pre-load for top-of-the-line, no-creep performance. The result is a highly efficient and effective custom string.

### STRING COLOR OPTIONS:

Gray/White, Blue/Black, Spruce Green/Black, Orange/Black, Pink/Black, Red/Black, Yellow/Black, Green/Black, Green/Ivory, Gray/Black, Black/Bronze

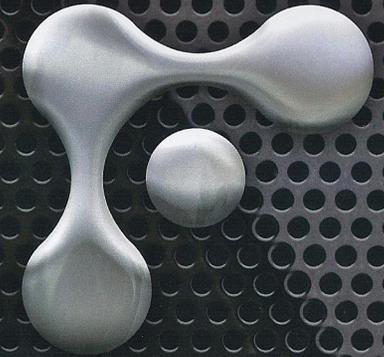

### SIGHT LITE™

The Fuse LED Sight Lite brightens up your sight's fibers, making it perfect when hunting in ground blinds or other low light conditions. The Sight Lite is compatible on all sights that accept a 3/8-24 NF thread.

### FUSE QUIVER CADDY™

The FUSE Quiver Caddy is the ideal accessory for treestand bowhunters. It's a simple yet functional tree screw with a quiver bracket that lets you hang your quiver within arm's reach to give you a more comfortable, versatile set-up. Fits all 2009 and 2010 Ventura and Satori One-Piece and Shorty quivers.

### WWW.FUSEARCHERY.COM

BILL JORDAN'S  
**REALTREE**

**INTREPID™ 60"**

The beautifully crafted FUSE Intrepid features European craftsmanship, select exotic wood laminates and high-tech glass power elements that match the highest performance and craftsmanship standards for traditional bows. This elegant, fast, easy-handling 60" recurve comes in 30-60# ATA standard weights in 5 pound increments, and features a full complement of ATA standard accessory mounts including a stabilizer mount. Intrepid is a beautiful, shootable bow for the true traditionalist.

**FOCUS™ 62" & 66"**

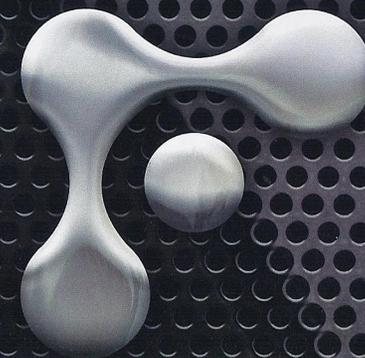

FUSE Focus Series bows are the ideal starter bow for your family or aspiring JOAD shooter. These easy-handling, low mass-weight recurve bows feature quality European construction combined with the best materials and high-performance design at an affordable price. 12-28# ATA weights make for an ideal starter to intermediate bow. Standard accessory mounting points for stabilizers and sights let Focus series bows perform in your backyard or in competition.

**FOCUS JR.™ 48"**

The wait is over. Focus Jr. is the ideal starter recurve for young shooters. Featuring high-quality glass and wood construction, the Focus Jr. is the ideal way to get your kid started in archery right – with a bow that fits them and at a draw weight they can handle.

SPEC CHART	INTREPID DRAW WEIGHT
