

2014 PRODUCT GUIDE

WHEN YOU GROW UP BOWHUNTING, IT GETS IN YOUR BLOOD.

One of life's greatest gifts to a child is the gift of hunting in the outdoors. There's no greater example of this than Hoyt President, Randy Walk, shown in the photo at the left (far right) at the age of 2 with his father Jay and his brother Ron. Randy's father and mother have been passionate archers and bowhunters throughout their lives and have instilled that unwavering passion and tradition in their children who have since passed that along to their children. Deep rooted traditions run deep.

Hoyt President, Randy Walk, with his Kansas Whitetail giant. From the age of 2 flinging arrows out of an old stick bow to today helping design and engineer the most advanced bows in the world, archery and bowhunting have always been a way of life.

AMERICAN HERITAGE

Hunting is a strong American tradition passed down from our forefathers. To celebrate this tradition, and our American Heritage, we are pleased to offer a custom American Heritage Edition package on our new Carbon Spyder and Faktor Series bows. A portion of the proceeds from purchases of these bows will be donated by Hoyt to assist those who have been wounded and risked everything to protect these precious freedoms we enjoy.

OUR TRADITIONS ARE WHAT MAKE US WHO WE ARE.

TOM DRIFILL
Manager, Customer Service

ZAK KURTZHALS
Manager, Product Engineering

Tradition is defined as the transmission of customs or beliefs from generation to generation. For years, bowhunting has been an American tradition passed down from one generation to the next. Memories made around a campfire, on a mountain top, or in a treestand, hunting with friends and family, are some of life's choicest memories. They are memories that are forever burned into our minds, never to be forgotten, always to be cherished.

At Hoyt, traditions run deep. Like you, hunting and the outdoors have always been a way of life for us and our families. It's who we are. Traditions not only define individuals, they define brands. There is no stronger example of this than the Hoyt brand. Since 1931, Hoyt has had rich traditions passed down from generation to generation. Traditions of industry leading innovation, cutting edge technology, supreme quality and rock solid dependability.

For 2014, we are continuing these long-standing Hoyt traditions stronger than ever. Never before have we introduced a lineup of bows as innovative, advanced and cutting edge as the new 2014 models. People always ask how we do it year in and year out. It's quite simple. Just like our love for the outdoors and bowhunting, it's in our blood. It's what we do. It's the Hoyt tradition.

Welcome to the Hoyt family.

Our most advanced cam to-date designed for exceptional smoothness, speed and increased let-off.

SHOCK-ROD™ TECHNOLOGY

Strategically placed Shock Rod dampers in the riser eliminate excess noise and vibration for ultimate stealth.

NEW CARBON RISER DESIGN

The all-new Helical Flex-Tuned Hollow Carbon Riser Design featured on the Carbon Spyder Series, reduces vibration, increases stiffness at strategic points, and enhances accuracy while reducing overall surface area for a super sleek, lightweight high-performance design.

30
INCH
AXLE-TO-AXLE

30 INCH AXLE-TO-AXLE

A deadly 30 inch axle-to-axle design for superior maneuverability, faster arrow delivery and more sheer performance. This is the bow you have been waiting for - Hoyt's first ever 30 inch carbon performance machine.

TRUE CARBON CONSTRUCTION

Stronger, lighter and quieter, thousands of discerning bowhunters around the globe settle for nothing less than a genuine Hoyt crafted Carbon bow. Although imitators have tried, there's nothing else that even compares. Not even close. Once you have shot and handled one you will immediately know the difference.

CARBON SPYDER™

NEW

The next generation of Hoyt carbon.
Ultimate high-performance in our
most compact configuration ever.

AIRESHOTX

Our proven limb suppression system
absolutely kills noise and vibration.

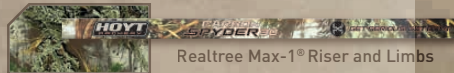

BECAUSE EVERY SPECIES MUST EVOLVE TO SURVIVE.

In the bowhunting world where prey have all the sensory advantages; speed, sight and sound are critical to bowhunting success. We've changed the game. Introducing the all-new, industry-leading flagship Carbon Spyder Series. A new and highly-evolved predator that will change bowhunting forever.

CARBON SPYDER LONG DRAW OPTION AVAILABLE. Speed +/- 2 FPS. See inside back cover for complete specs and color options.

NEW

HOLLOW CARBON TUBES

Less flex. Three complex multi-layer tubes are designed with variable stiffness, cross-section and wall thickness and interlocked to optimize stiffness – resulting in ultimate consistency, accuracy and durability.

WARM TO THE TOUCH

Hoyt carbon bows feel much warmer in cold hunting conditions for increased comfort and shootability, a feature you'll really appreciate on those cold hunts.

REDUCED VIBRATION

Hoyt R&D tests prove Hoyt carbon bow's noise and vibration are less than half of those created by leading competitor's premier aluminum bows.

NEW

FAKTOR™

More punch with less bite. Z5 is liquid smooth and brutally fast.

AIRSHOX

Limb vibration suppression unlike anything in the industry. Works seamlessly with Hoyt's ARC Split Limb Technology.

IN THE HUNT, THERE'S ALWAYS ONE FAKTOR THAT CHANGES EVERYTHING.

And this is it. Faktor is Hoyt's premier aircraft grade aluminum hunting machine for 2014. An engineering triumph designed for blistering speed, ultimate strength, vibration-killing smoothness and both visual and auditory stealth. All the factors for bowhunting success, in one incredible package.

Our lightest, strongest and most fluid aluminum riser design to date.

Proven Shock Rod Technology integrated into the riser eliminates unwanted noise and vibration.

STEALTH FACTOR

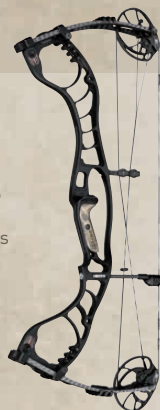

Low-profile, low sound and low vibration. Nothing gives an edge in nature like disappearing.

ACCURACY FACTOR

Blistering speed in a perfectly balanced, controlled torsion, low-drag and high rigidity riser design. This is what delivers the perfect shot. *Every single time.*

ERGONOMIC FACTOR

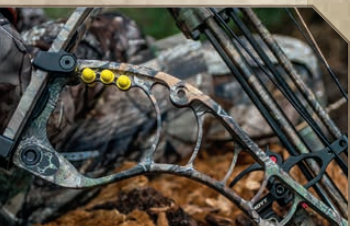

Lightweight design, ultra-low shot vibration, a correctly designed grip and a smooth, velvety draw with a solid wall. This is what it feels like to fill tags.

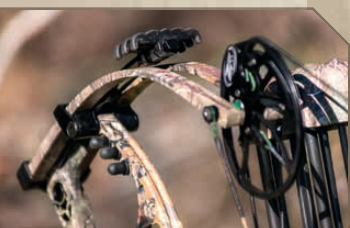

Z5 CAM & 1/2 PERFORMANCE SYSTEM

The next level of smooth and fast, the Z5 cam is engineered for a comfortable draw cycle, a forgiving shot and deadly speed.

SHOCK ROD TECHNOLOGY

Held in a mid-point cantilevered position, Shock Rods move freely in any direction, soaking up excess vibration and noise for ultimate shot silence. (Custom colors available)

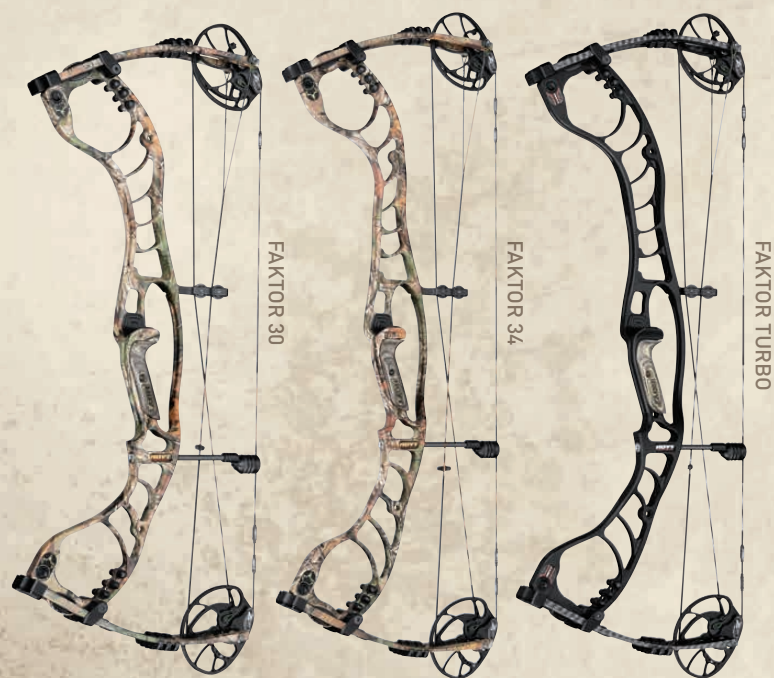

AIRSHOX LIMB SUPPRESSION

Technology that makes a difference. AirShox kill noise and vibration without being attached to the limbs to rob speed and efficiency. (Custom colors available)

FAKTOR

THE GAME-CHANGING FAKTOR SERIES IS AVAILABLE IN THREE DISTINCT CONFIGURATIONS, EACH WITH A SPECIFIC BALANCE OF PERFORMANCE FEATURES TO FIT YOUR BOW GEOMETRY PREFERENCE. WITH 30 AND 34 INCH CONFIGURATIONS FOR IDEAL FIT, AND A BLAZING FAST FAKTOR TURBO CONFIGURATION THAT LAUNCHES ARROWS AT 340 FPS, ALL CONFIGURATIONS FEATURE THE UNBELIEVABLY SLIM AND STABLE FAKTOR RISER AND ALL OF THE HOYT TECHNOLOGY FACTORS FOR SUCCESS.

VICXEN SERIES BOWS

At Hoyt, we are dedicated to dedicated women bowhunters. As a way to express their passion and love for bowhunting, we offer the Vicki Cianciarulo, Vicxen Signature Series graphic package available on a number of bow models. Because we know that not all women bowhunters are built the same or have the same budget, we offer the Vicxen Series across a very broad spectrum of bows allowing women to choose the bow geometry and price point that fits them best. The Vicxen Edition bows provide drop-dead gorgeous looks with serious, rugged tough attitude. Women bowhunters across the globe show your pride and unity with a Vicxen Signature Series bow. See your dealer for details.

PARALLEL SPLIT LIMBS

Provide a more stable and durable limb system by eliminating weak and vulnerable v-grooves and limb bolt holes.

ULTIMATE DRAW LENGTH ADJUSTMENT

Adjustable from 19 to 30 inches means the Ignite will fit bowhunters of all ages and sizes and keep up with even the fastest growing archers.

ULTIMATE DRAW WEIGHT ADJUSTMENT

Buying new limbs is a thing of the past. Adjustable from 15-70 pounds all in one bow, Ignite will match your strength and shooting needs in the field and on the range.

NEW

IGNITE

IGNITE™ IS THE PERFECT HOYT BOW THAT DOES IT ALL FOR THAT GROWING BOWHUNTER. IGNITE FEATURES AN INCREDIBLE 19 TO 30 INCH DRAW RANGE WITH ONE CAM AND AN ASTOUNDING 15 TO 70 POUNDS DRAW WEIGHT, ALL IN ONE BOW. LEGENDARY HOYT RELIABILITY. LOW-TORQUE GRIP. TEC RISER AND SPLIT LIMB TECHNOLOGY. IGNITE IS PACKED WITH FEATURES TO START THEM RIGHT, SHOOT THEIR BEST AND KEEP UP AS THEY GROW - ALL AT AN UNBELIEVABLE PRICE. LET YOUR ARCHERY PASSION CATCH FIRE WITH IGNITE.

IGNITE PACKAGE

Also available as a package bow equipped with exclusive FUSE Accessories. Includes a ProFire 3 pin sight, Vector 4 arrow quick detach quiver and the popular Whisker Biscuit arrow rest. Everything you need for the hunt.

6.5 INCH

ARROW RACK™ QUIVER SYSTEM

Arrow Rack quivers are extremely light weight and designed to fit close and tight to your bow for a compact and well-balanced set up. The In-Line and Double Gripper models are universal quick-detach quivers that will fit on any bow, are available in 4-arrow and 6-arrow options and are designed for ultimate arrow security. The Shorty Quick Detach and 2-piece* quivers mount directly to the bow riser for a compact fit on Hoyt bows and are available in 4-arrow and 6 arrow configurations. All Arrow Rack quivers are compatible with both fixed-blade and mechanical broadheads. Colors: Realtree Xtra, Max-1, AP Snow and Black Out.

*2-Piece quiver available for all 2012 and newer carbon bows and all Hoyt bows with a Hexagon quiver mount. Shorty quivers fit all Hoyt bows with a Hexagon quiver mount. In-Line and Double Gripper models are compatible with all bows.

ARROW RACK IN-LINE

ARROW RACK DOUBLE GRIPPER

ARROW RACK SHORTY

ARROW RACK 2-PIECE

CARBON EDGE STABILIZERS Three incredibly strong, individual carbon composite tubes are the backbone of Hoyt's new Carbon Edge stabilizers. Smaller diameter tubes on the outer edges and a slightly larger tube in the middle create an aerodynamic effect to go along with the sleek shape and functionality of the Edge series stabilizers. Available in 6.5 and 8.5 inch lengths. Colors: Realtree Xtra, Max-1, AP Snow and Black Out.

HOYT ULTRA RESTS The Hoyt Ultra Rest features a Hoyt patented design for a zero-tolerance lock down on Hoyt bows. With the best of both worlds, the Hoyt Ultra Rest provides for total arrow capture to keep your arrow in place while in the stand or making a stalk, and complete draw away for an interference free shot for maximum accuracy. Comes standard with multiple launchers for various arrow sizes. Colors: Anodized Realtree Camo, Black, Red, Blue, Green, Orange, Purple and Pink.

CUSTOM COLOR ACCESSORIES Go bold or go home. Make your bow all you with custom colored Stealth Shots, AirShox, Shock Rods and Pro Fit Wood Grips. Components sold separately and in a custom 10-piece accessory kit.

HOYT WRIST SLINGS Choose from three custom options of genuine Hoyt wrist slings. Custom Deluxe with dual-color, bendable braided rope and quick adjust, the bendable Custom Wrist sling or the Hoyt Wrist sling (neoprene).

PRO-FIT CUSTOM GRIPS Designed to promote proper form and enhance accuracy and comfort. ProFit grips are available in wood, side plates and the 180 elastomeric grip in multiple finishes/color options.

Pro Edge Elite XT Comp Limbs

PRO EDGE ELITE

FAST, SLEEK AND PINPOINT ACCURATE, PROEDGE ELITE™ IS WHAT PRECISION 50M ROUND, FIELD ARCHERS, AND SERIOUS 3D COMPETITORS HAVE BEEN WAITING FOR. WITH RANGE-ERROR, WIND TAMING SPEED AND TAKE-NO-PRISONERS PERFORMANCE, THE INTRICATELY MACHINED PROEDGE ELITE WITH NEW STEALTH BLACK HARDWARE FEATURES THE ALL-NEW Z5 CAM & ½ SYSTEM FOR PEAK PERFORMANCE, EXTREME SMOOTHNESS, EASY TUNING AND ROCK-SOLID RELIABILITY. SHOCK ROD TECHNOLOGY, PRO SERIES XT COMP LIMBS AND DEAD-IN-HAND PARALLEL LIMB GEOMETRY FURTHER DEFINE THIS PRECISION PERFORMER. TAKE YOUR PERFORMANCE RIGHT TO THE BLEEDING EDGE WITH PROEDGE ELITE.

THE NEXT GENERATION SHOOT-THRU RISER

The racy shoot-thru TEC riser design is as aggressive in performance as it is in looks. It features increased spacing for rest tuning and larger vane size options while providing a super rigid platform for ultimate consistency and accuracy.

2003-2013 FIRST PLACE TOURNAMENT RESULTS

Hoyt shooters continued their domination in 2013 racking up incredible win after incredible win. Not only did Hoyt shooters top the podium, they dominated the entire podium at many events including the most prestigious indoor events in the world, Vegas and Nimes. Hoyt shooters also smashed records including Kristina Berger's 1418 World Record, Sara Lopez's 150 match World Record and Jesse Broadwater's unbelievable course record of 1539/1540 in Redding. Once again, another year of plain and simple truth that Hoyt bows are the most accurate bows in the world.

Based on Men's Open Pro World Archery, NFAA, USAA, ASA & IBO 3D tournament circuits.

THE NEW QUATTRO LIMBS: HARNESS THE FULL POWER OF CARBON.

QUATTRO™ SERIES LIMBS Never before has Hoyt unleashed a competition recurve limb like the all-new Carbon Quattro. Engineered with new, high-performance, triaxial all-carbon power elements developed by our Engineers, and a strategically optimized layup for dimensional stability and top-level efficiency, the Carbon Quattro is 40% more torsionally stable than any Hoyt recurve limb ever built. Along with the increased stability comes increased speed - and a lot of it. An enhanced force draw curve for an improved feel through the clicker and an ultra-fast damping and low vibration design rounds out the premier features that make this the most advanced recurve limb in our history. (Carbon Quattro available in both Formula and Grand Prix configurations)

EXTREME STIFFNESS // STABILITY // SPEED

NEW FOR 2014: EXTRA SHORT LIMB OPTIONS At Hoyt we are always striving to ensure that shooters can get the best possible fit from our bows. That's why we are introducing an extra-short limb option on all limb models for 2014. On a 25" riser, an extra-short limb yields a 64" bow length, suitable for shooters between 21 and 26 inches in draw length. With a 27" riser, the resulting 66" bow provides more speed and a very snappy shot reaction for shooters looking for maximum performance at up to 27 inches draw. Extra short limbs are a great option for shorter draw shooters.

es

LIMB DAMPING BUSHING

Formula Series Limb Damping Bushing allows the use of accessories like the FUSE Limb Blade (shown here) or even a simple Do-iner® suppression mount – to absorb vibration before it gets to the riser. This Hoyt patent pending feature is exclusive to the Formula Series.

FORMULA SERIES™

The pundits like to say that "nothing succeeds like success" (pundits like to be obvious). With nothing but success right from the start more than four years ago, Hoyt's Formula series is the most-winning new bow design in modern history. From World titles to Olympic Gold, Formula bows have set World, American, European, and Korean records time and time again. The Formula for Success is back and ready for the future. Are you ready? The future is now. Come join us for the journey.

FORMULA ION-X™ Surgeon, meet scalpel. The ultra-precise, advanced geometry ION-X continues to prove its technical superiority with a new Korean National record and World Cup Grand Final Gold, Olympic Champion OH Jin Hyek, and a growing list of victories and records for countless shooters across the globe. Sleek TEC design, lightweight, in two lengths for a custom fit, and full compatibility with all Hoyt Formula limbs including the stunning new Quattro Series limbs.

FORMULA HPX™ Out of the bow box and directly onto the top step in London, HPX has more than proven its advanced geometry is as forgiving as it is fast, crisp and laser-accurate. The history-making HPX is available in two winning lengths and features Dynamic Flex Control technology and patent-pending pro Series Limb bolts with all of the other proven technologies and features that make Hoyt risers sought after the world over.

FORMULA RX™ The bow that started the Formula Revolution. Traditional Hoyt geometry merges with cutting-edge Formula precision and forgiveness for a sweet-shooting, razor-sharp handling bow with all of the features you expect from a premiere Hoyt recurve.

FORMULA EXCEL PRO™ & EXCEL™ Putting the Formula system in easy reach of every shooter, Excel Pro features a machined aluminum, ultra-precise riser with all the features- Pro Series limb bolt, custom wood grip, adjustable clicker plate and high-polish anodized finish. The machined aluminum Excel features a high-quality painted finish and standard Formula hardware. Both models come standard with a reliable and simple alignment system.

NEW FOR 2014: HIGH WRIST WOOD RECURVE GRIP AVAILABLE IN THESE CUSTOM COLORS.

Note: All Formula model risers are compatible with all current Hoyt Recurve Formula limbs and Hoyt Recurve grips. See back color chart for color options.

NEW

FORMULA QUATTRO Hoyt engineers set out to design the most torsionally-rigid, accurate, high performance limb in our history. Not only did they succeed, they absolutely broke the limits. Quattro series limbs feature more torsional stiffness than any commercially available limb made today. More speed. Less noise and vibration. A feel like no other, and responsiveness that is instantly obvious on the first shot. The new technology leader. Extra-short, short, medium and long, 22-50 lbs in 2 lb increments.

FORMULA F7 In the hands of London 2012 Champion OH, Jin-hyek, Formula F7 limbs made history, bringing Korea their first ever Men's Olympic Individual Gold Medal. Triaxial Carbon Technology, a choice of multilaminate rock maple or Syntactic Foam cores, incredible reliability and accuracy. Extra-short, short, medium and long, 22-50 lbs in 2 lb increments.

FORMULA CARBON 720 Aerospace carbon and sweet shooting rock maple cores yield a smooth, high-performance combination. Feel, durability, and uncompromising accuracy make Formula Carbon 720 a great choice for the intermediate to expert shooter. Extra-short, short, medium and long, 22-50 lbs in 2 lb increments.

FORMULA EXCEL Top coaches like to tell beginners to buy a good riser and affordable limbs to start out. We agree. So we made sure that Formula Excel limbs are highly affordable - without compromising accuracy, durability or shootability. Start the journey right. Extra-short, short, medium and long, 20-40 lbs in 2 lb increments.

Excel weight based on 21" length. 23" length is 2.2 lbs. (997 grams). See inside back cover for color options.

CUSTOM GRIP OPTIONS All current Hoyt recurve risers are compatible with the following grips:

- A. HIGH WRIST WOOD GRIP**
(standard on ION-X, HPX, Formula Excel Pro, Horizon Pro)
- B. MEDIUM WRIST WOOD GRIP**
(standard on GMX, Formula RX)
- C. STANDARD PLASTIC/ERGO GRIP**
(standard on Formula Excel, Horizon, Excel)
- D. STANDARD WOOD/ERGO GRIP**
- E. MEDIUM - HIGH WRIST/ORTHO WOOD GRIP**

GRAND PRIX SERIES™

Hoyt invented the takedown system used by virtually all other makers today. Still the best and original, Hoyt's Grand Prix system provides durability and dead-on alignment each and every time. That's why for 30 years now, our brilliant Grand Prix alignment dovetail systems have been accepted- and copied- across the world.

GRAND PRIX XTREME: GPX™ No one builds modern takedown risers like the company that invented the category- Hoyt. And for 2014, the 30th anniversary of the first Olympic Gold for Hoyt's Grand Prix system, we raise the stakes with the sleek, all-new, Grand Prix Xtreme. The GPX features the High Performance Geometry of the 2012 Olympic Games winning HPX with the World-dominating 2013 TEC design of the ION-X, and is fully Grand Prix limb compatible, including the all-new Quattro Series Grand Prix models. Balanced, sleek, smooth, stable and laser-accurate. The pinnacle of the Grand Prix Series.

GOLD MEDALIST XTREME: GMX™ Hoyt's modern classic, with original Hoyt geometry harkening back to the bow that defined the modern takedown recurve 30 years ago, the original Hoyt Gold Medalist. GMX packs world and Olympic winning proven performance with the best fit, finish and straightness in the industry. The Gold Standard.

HORIZON PRO™ A proven and popular choice for Grand Prix system devotees who want a lighter yet still high quality option, Horizon Pro features a polished anodized finish, patent pending Pro Series Limb Bolts, custom wood grip and more. High performance features at an affordable price.

HORIZON/EXCEL™ Horizon is the 25", affordably priced alignment-adjustable starter bow while Excel caters to shorter-draw and younger shooters at 21" and 23" options.

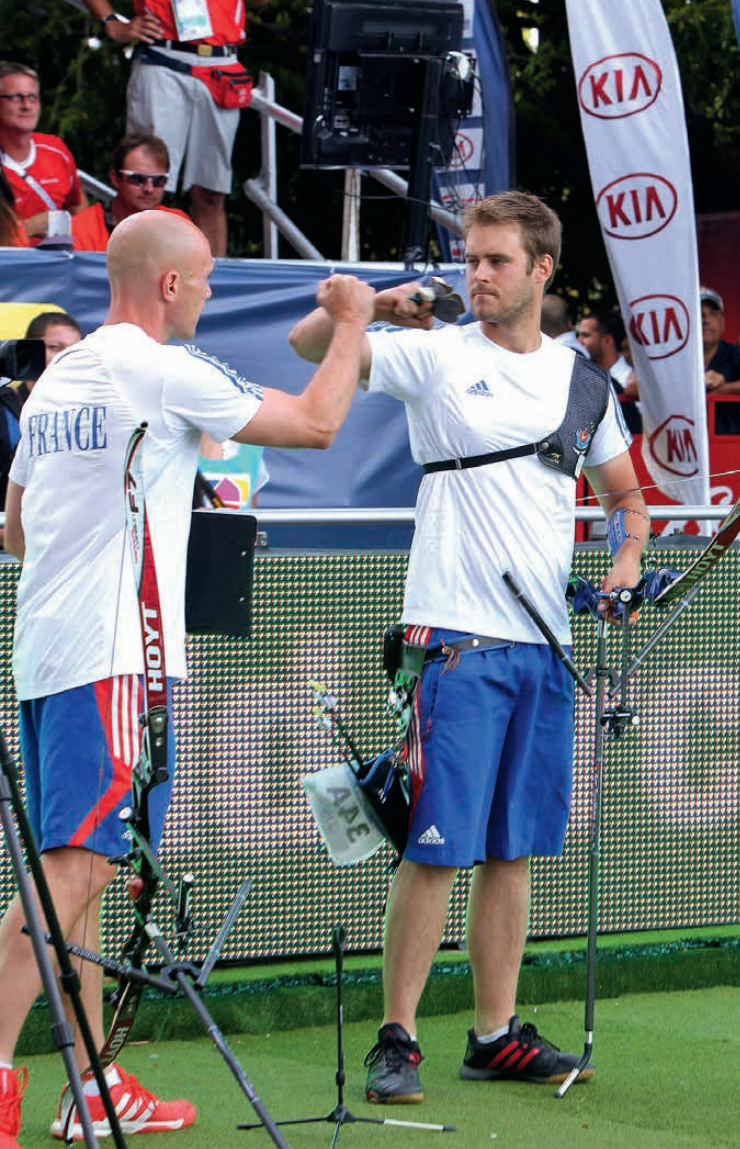

NEW FOR 2014: HIGH WRIST WOOD RECURVE GRIP AVAILABLE IN THESE CUSTOM COLORS.

★★★★★
