ALL ABOUT QUALITY

From the beginning, we have been committed to engineering the most advanced products, utilizing the most state-of-the-art technology. Over the years, we have become trailblazers in the industry, producing the most effective noise and vibration-dampening technology.

Always pushing for advancement, we are constantly researching and testing new technologies, materials and designs. We believe that the best products are born from hard work and determination.

We believe in being a self-sufficient, American-made company. 99% of LimbSaver products are proudly engineered and handmade in the United States. The quality of our work is of utmost importance to us. We are proud to be a company that is positively affecting our community and helping to rebuild the American economy.

"PRODUCTS THAT WORK!"

Over the past two decades we have gotten an overwhelming amount of positive feedback from our consumers. Our products are so revolutionary that over and over we hear "Wow! LimbSaver really does make products that work!" Our slogan is simply a quote from many of our customers over the years.

We'd love to hear from you. Please send your feedback, product reviews, photos and success stories to feedback@limbsaver.com. If we feature your story, you may be eligible to receive giveaway prizes.

LIMBSAVER

UNDENIABLY THE BEST

Engineering the best and most effective archery, firearms, and crossbow products is our job #1. We spend thousands of hours designing and testing our products to ensure that our customers are getting the quality gear that they have come to expect from us. Other companies have tried to mimic the look of our products, but none have succeeded in even coming close to our products' performance and reliability.

NAVCOM MATERIAL

We have been developing and using our LimbSaver proprietary NAVCOM (Noise and Vibration Control Material) since the beginning. This one material takes many forms. The durometer, or hardness, of the material is adapted to suit different applications. That's why, for example, you can feel a distinct difference between the hardness of our slings – which contour your shoulder and relieve stress from weight, and our S-Coil Stabilizers – which absorb and dissipate energy and vibration. When designing our Broadband LimbSavers, we purposefully used two different durometers of NAVCOM, to dissipate a wide range of vibration frequencies. It's not magic, it's science... really, really good science.

ALL-WEATHER & DURABLE

Our products are built to be used outdoors in harsh environments. Since the beginning, we have been researching, developing, and improving upon materials we use to build our products to make them more durable and longer lasting.

We are passionate about making products that work and products that last. Year after year, we have proven that our products are in a league of their own in terms of function, durability, and longevity.

NOISE REDUCING

One of the hallmarks of our products is the amazing ability to silence and deaden archery gear. Taking ordinary, off-the-shelf bows and turning them into silent and deadly tools is really the mission of our archery line of products.

With something as important as noise and vibration dampening, you can trust that LimbSaver has got you covered.

»»» EASY TO INSTALL

When we create our products, we have our customers in mind. We want to make the best-functioning products that we can. Part of that functionality is ease of installation.

We realize that not everyone has a garage full of archery-specific tools or expertise. That's why we strive to create products that are quick and simple to install.

»»» SCIENTIFIC TESTING

We test all of our products against our competition using the best and latest, state-of-the-art equipment to ensure that our products are the best available.

THE RESULTS SPEAK FOR THEMSELVES.

BRAND-X
 LIMBSAVER

»»» NO-SLIP

Some of our products are designed with No-Slip surface. For instance, when using our slings, it is important that the sling stays put on your shoulder so you don't have to fuss with and constantly readjust.

»»» ULTRA-LIGHTWEIGHT

Most of our products fall into what would be considered a lightweight category, but we have designed a select number of products to be ultra-lightweight. These products are for engineers with the hunters in mind who count every ounce that goes on their bow and use the bare minimum to keep it light and portable.

SILENT »» QUIVER

////// The Silent Quiver features an innovative low profile and lightweight design. The hood, made out of our proprietary NAVCOM®, ensures absolute silence. Its universal design fits most fixed and expandable broadheads. The durable NAVCOM® double grippers ensure your arrows stay put, and fit a wide spectrum of shaft sizes. It also has an innovative quick-attachment mechanism that is smooth to operate but built tough to withstand the harshest environments. Whether you hang your quiver in your treestand or shoot with it attached to your bow, it will be the quietest quiver you have ever used.

»»» Durable hood is made out of Flexible NAVCOM material

LS HUNTER STABILIZER

New Product

When it comes to vibration dampening and performance-boosting stabilizers, the LS Hunter is top of its class. The sleek, carbon fiber frame is packed full of vibration dampening technology designed to knock out noise and hand shock. The removable Broadband node neutralizes vibration, helps to reduce bow jump, and improves your bow's balance. Consider vibration, noise, and hand shock a thing of the past with the new LS Hunter stabilizer.

AWS MODULAR STABILIZER

The AWS (Adjustable Weight System) Modular Stabilizer is proven to be our best, most effective, dynamic-stabilizing system. It has a skeletonized NAVCOM® design which achieves the highest level of vibration and noise control in the industry today. This system includes an innovative sliding weight for fine tuning the balance point of your bow, and the weight section is designed to move anywhere on the stabilizer frame. The modular design allows you to reconfigure the elements by removing or adding nodes for customizing length, weight preferences, and personal look. If you are looking for the best-performing and most adaptable stabilizer, the AWS Modular Stabilizer is undeniably it.

6.5 INCH

The 6.5 inch AWS Modular Stabilizer is compact and highly effective.

9.5 INCH

The 9.5 inch AWS Modular Stabilizer is perfect for archers who prefer added length, weight, and adjustability.

AWS NODES

Primarily designed as an additional component for the AWS Modular Stabilizer System, the Modular Nodes are great for adding extra weight and customization. Whether you are a hunter or target shooter, the unsurpassed versatility of the nodes will fit all your needs.

AWS STABILIZER ENHANCER

The AWS Stabilizer Enhancer provides superior noise and vibration dampening with minimal weight and length. This stabilizer component is designed to manage high amplitude shock and bow vibration in a compact form factor. It screws into any 5/16" thread. It can be used by itself or as a base for the AWS Modular Stabilizer to screw into for added performance. The AWS Enhancer is black with your choice of ring patterns. Weighs only 4.4oz. 3.3" long, 2.38" diameter.

S-COIL STABILIZERS

The design of the S-Coil Stabilizer independently isolates and dampens a wide range of vibration frequencies. It is tuned to be amplitude-specific by utilizing different-sized sections. You will notice a smoother feel and a quieter shooting experience. The S-Coil weighs in at 3.7 ounces, with an overall length of 4.5." It is remarkably balanced for superior performance.

S-Coil Stabilizers are our best-selling compound bow stabilizers.

TARGET STABILIZER DAMPENER

Upgrade any target stabilizer to a dynamic stabilizer with the Target Stabilizer Dampener. It boosts performance by minimizing whip and vibration in the stabilizer. The Target Stabilizer Dampener cuts out much of the unwanted hand shock and noise for a smoother shot. It also reduces stabilizer wobble to decrease stress on the archer. It is designed to be positionable on most stabilizers to maximize performance tuning. Two sizes are available to fit a wide range of stabilizers.

BROADBAND LIMBSAVERS

LIMB DAMPENERS

Limb Dampeners

Our Broadband LimbSavers have been voted best limb dampeners in the industry in 2014 by Bowhunting World and BowHunterPlanet.com. We created the original limb dampeners and have continued to be trailblazers with our scientific development and advancement of limb dampeners throughout the years. Don't be fooled by imitations, our Broadband LimbSavers are the best limb-mounted dampeners ever created. They are engineered to reduce up to 70% of vibration at wide frequency levels. This means that they greatly reduce the vibration frequencies that cause vibration from your limbs as well as unwanted audible noise. You will notice a much smoother and quieter shot. Broadbands are available for split- or solid-limb compound bows. Easily customize the look of your bow with your choice of 9 different interchangeable ring colors.

RECURVE / YOUTH BROADBAND LIMBSAVERS

Recurve and Youth Broadband LimbSavers are the hot new addition to the outstanding Broadband line of limb dampeners. These low-profile feature similar vibration dampening properties as the compound bow Broadbands, but are developed to meet the needs of our recurve shooters. They also work great for youth solid limb compound bows. They are designed with a smaller adhesive base that will fit narrow and wide recurve bow limbs. The Recurve and Youth Broadbands only weigh 0.3 ounces each and have a diameter of 1 3/8". Don't let their small size fool you - these little LimbSavers pack a punch. They reduce limb vibration and knock out unwanted noise. Simply stick them on the inside of your limbs and immediately feel and hear the difference.

Reduces limb vibration

SUPERQUAD

SPLIT-LIMB DAMPENERS

LimbSaver SuperQuad split-limb dampeners reduce noise and vibration. They are designed to be universal fitting for 95% of all standard & wide split limb bows, regardless of the limb thickness or distance between the limbs. Can be installed in two orientations for either wide or narrow spaced limbs. These SuperQuad limb dampeners are the quick and effective solution for rattle and vibration in split-limb compound bows. They dampen out up to 70% of limb-vibration for a quieter and smoother-feeling shot.

RISER DAMPENER FOR MATHEWS® BOWS

Hot on the market are our LimbSaver Riser Dampeners for Mathews® Bows. The Riser Dampeners are specifically designed to replace existing Mathews® parts. They provide greatly improved performance in vibration control with reduced weight compared to OEM riser dampeners. Limbsaver Riser Dampeners help to reduce stress on the archers hands and arms while shooting. Simply snap Riser Dampeners into damper holes and you'll feel the difference on your first shot.

KODIAK-LITE COMPOUND BOW SLING

The Kodiak-Lite Compound Bow Sling is designed to be comfortably lightweight. The non-slip material ensures the bow stays in place while the ergonomically-designed hand grip provides absolute comfort and control. LimbSaver's proprietary NAVCOM® material helps to evenly distribute the weight of the bow over a larger area, relieving shoulder fatigue. The length can be easily adjusted for a perfect fit. It can be used on any compound bow with simple, one-click installation. Available in our classic black and camo colors and now in popular HD Camo patterns.

STRING DECELERATOR

New Product

The newly re-designed String Decelerator Node uses a progressive resistance pillar to slow the string to a stop, minimizing slapping noise. The String Decelerator will help prevent your wrists from getting slapped when you shoot. The universal mounting system fits most bows and mounts to front or rear stabilizer accessory holes, while allowing you to still use your current stabilizer. Cable rod, String Decelerator Node (black), mounting brackets and clamp are included in String Decelerator kit. Nodes are designed to fit all 3/8" cable rods. Colored nodes are sold separately.

Universal mounting system fits most bows

Nodes are designed to fit all 3/8" cable rods

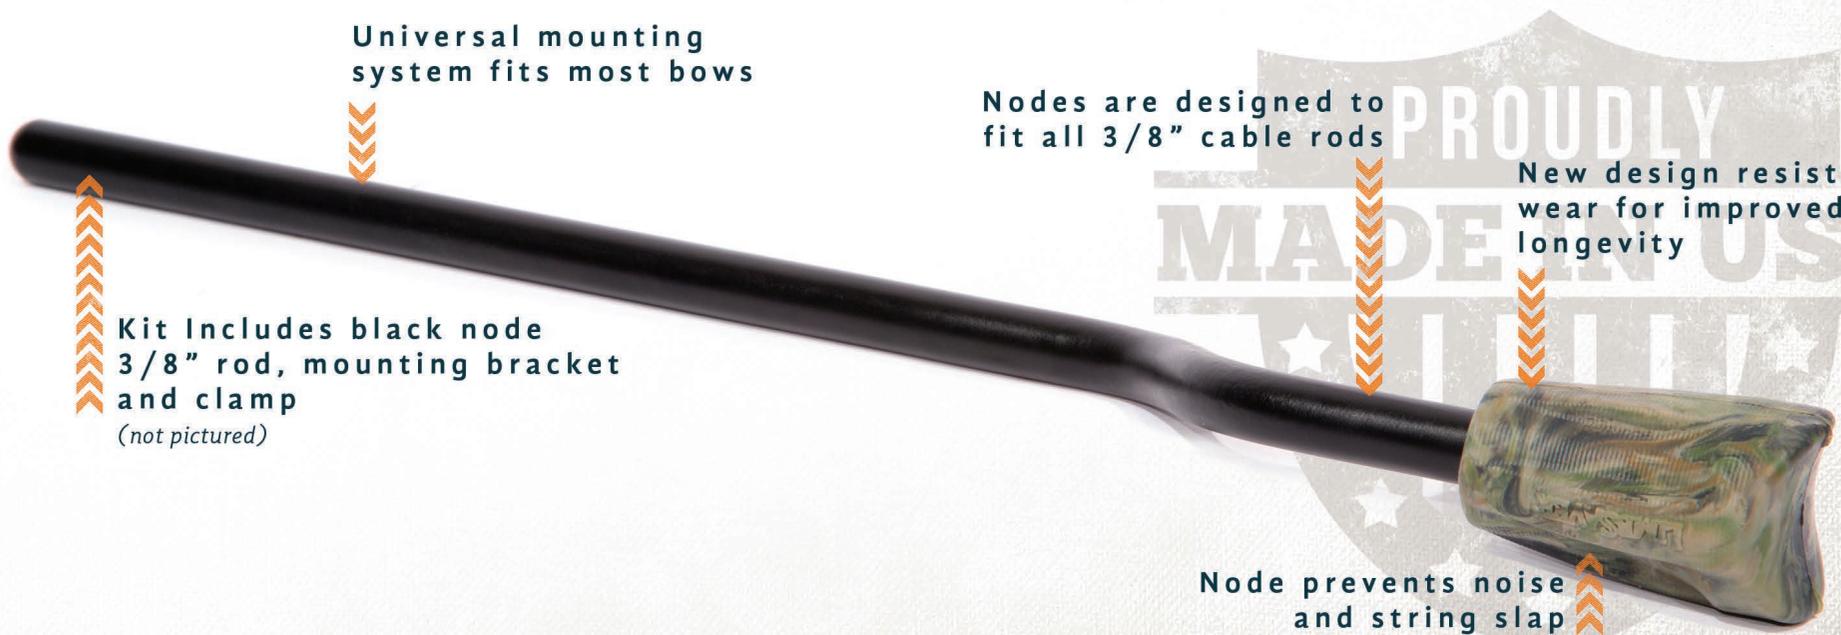

New design resists wear for improved longevity

Kit Includes black node 3/8" rod, mounting bracket and clamp

EVERLAST STRING LEECH

Our Everlast String Leeches truly are the best on the market. They won gold in the 2014 Bowhunting World Readers Choice Awards for being the most effective in the industry. Everlast String Leeches are an essential addition to your bow. They help to stop string oscillation and reduce up to 90% of string noise. This helps to keep your shots quiet and smooth. The Everlast String Leeches are designed to give you both unparalleled performance and unsurpassed durability. They will exceed your expectations of performance and will last shot after shot. You can now get them in 8 great colors to match your bow accents. They are available in 2 or 4 packs. Bow press or string separator required for installation.

FALL-AWAY ARROW REST

The LimbSaver Fall-Away Arrow Rest has been updated for peak performance. Its sleek new body has been redesigned with reduced size and weight. It is engineered to operate smoothly with a balanced twin-bearing system that provides a quiet, stable platform that falls rapidly with perfect timing. The spring arm makes it easier to get the timing right without putting extra stress on the buss cable, which can potentially pull the bow out of time. This new arrow rest includes two lightweight launcher arms – straight and curved – to suit the archer's preference. These launcher arms are designed to have low inertia for quick fall and no bounce to eliminate interference with the shot. This updated Fall-Away Arrow Rest is smoother than ever. It comes with two launcher arms, Fall-Away Drop Pad, and Arrow Holder.

Newly designed launcher arm is lighter than ever

Improved, smaller and lighter body

Includes both popular launcher arm styles

Arrow holder keeps arrow quiet and in place

Fall-Away Drop Pad minimizes launcher arm bounce and noise

» **FALL-AWAY DROP PAD**

The Fall-Away Drop Pad reduces impact noise and the “trampoline effect” using NAVCOM® technology to slow any launcher arm to a stop.

» **ARROW HOLDER**

The LimbSaver Arrow Holder has been updated to hold your arrow securely so it will not drop out of place. This self-adhesive arrow holder mounts easily to any arrow shelf to help keep your arrow quietly aligned on your shelf. This specially-designed NAVCOM® arrow holder keeps your arrow quiet when your arrow is at rest, or during the initial draw with any fall-away arrow rest. By helping to center the arrow to your riser, you can draw your bow more confidently knowing that the arrow is always in the perfect position for a flawless draw every time.

PRISM-LITE BOW SIGHTS

LimbSaver Prism-Lite Sights incorporate an innovative light-trap collection technology to efficiently load ambient light into the Prism Sight's fiber optic material. This innovative technology intensifies pin brightness during all light conditions, dawn to dusk! Prism-Lite Sights are now available with 3 or 5 pins in 0.010 or 0.019 sizes. Although it is made out of heavy-duty aluminum and poly-carbonate, it remains lightweight, weighing in at only 4.4oz. It is solar powered with a non-reflecting sight housing. It can be used with the L.E.D. Light System for low-light situations.

Unique fiber-optic housing for optimum light collection

Proton LS3

Archery Products

*"UNLIKE OTHER BOW MANUFACTURERS,
OUR CAMS ARE OPTIMIZED FOR EACH
DRAW LENGTH, WHICH IS WHY OUR
BOW IS THE MOST SHOOTABLE BOW
ON THE PLANET!"*

Σ SIGMACAM™

PROTON LS3

COMPOUND BOW

Introducing the Proton LS3, the latest in the evolution of our Proton compound bow line. For 2015, we have completely redesigned the cam system, our new **SigmaCam**, which has an even smoother draw, generous valley, and rock-solid back wall than previous generation bows. The IBO rating of 332fps is up from the previous generation, fast enough to compete with the fastest bows on the planet.

This is the most dead-in-hand bow you can shoot, thanks to its rock-solid straight riser design and the addition of the top-of-the-line vibration-dampening extras that come standard on the new **LS3**, like **Broadband LimbSavers**, the all-new **HD S-Coil**, **Super String Leeches**, **Cable Guard Dampener**, and much more.

No other bow on the planet can offer as much performance and silencing technology right out of the box. If you are looking for the bow that beats them all, you've come to the right page.

332fps IBO | 4.2lbs Bare | 32" Axle-to-Axle | 75/80% Let-Off | 7-Position Posi-Lock Poundage System | SigmaCam | 50/60/70lbs Draw Weights | 7" Brace Height | 24-32 inch Draw Length

SUPER-SMOOTH DRAW GENEROUS VALLEY ROCK-SOLID BACK WALL

READY **2** SHOOT

Everything you need to start shooting is in the box.*

Proton LS3 kit includes:

- Proton LS3 compound bow
- Broadband LimbSavers
- LimbSaver String Leeches
- LimbSaver Silent Quiver
- LimbSaver HD S-Coil
- LimbSaver Prism Lite Sight
- And much more!

See the next page for more details...

» SIGMACAM «««««

For 2015, we are introducing the pinnacle of operational enhancements, our all-new **SigmaCam**. Many hours of R&D and countless hours of field testing and abusing these new cams have payed off. Our new SigmaCam is the best cam we have ever produced, and the finest and most forgiving cam we have ever tested.

Our **Sigma Cams** provide the smoothest draw, extra-generous valley, and rock-solid back wall that hunters and sportsmen have been looking for in a bow, while our proprietary **Dual Track** system virtually eliminates cam lean and wobble. Paired with our patented **7-position Posi-Lock Poundage System**, which allows for effortless poundage adjustment, the new **Proton LS3** is a force to be reckoned with.

Once you draw back our **Proton LS3**, you will know exactly why industry experts are scrambling to get their hands on this bow.

Σ SIGMACAM™

- ✓ Rock-solid back wall
- ✓ Super-smooth draw
- ✓ Extra-generous valley

to your strings**

STRING WAX

Protect your bow and crossbow strings with LimbSaver String Wax. This formula is not your everyday wax. It contains elements to remove seals out moisture, reduce friction, and keep your strings in excellent shape for thousands of shots. Can be used from -10°F to 145°F.

ARCHERY OIL PEN

EcoSafe Archery Oil is specially formulated to perform in the harshest of conditions protecting your gear from rust and corrosion. The needle applicator allows you to get the oil in the tightest spots with no mess. EcoSafe Oil keeps moisture out to prevent rusting and outperforms every other brand.

CROSSBOW RAIL LUBE

Premium Rail Lubricant increases string life and reduces friction between the rail and string for improved performance. The special formula provides an odorless protectant that locks out moisture and creates a 100% sealed barrier that is completely invisible.

Also available in a kit with String Wax.

CROSSBOW BROADBAND LIMB DAMPENERS

Product Update

Crossbows are extremely loud due to the incredible amount of energy and impact during the shot. LimbSaver has specially designed the Crossbow Broadbands to counter the loud crack produced from a high-powered crossbow firing. The design cuts out both vibration and noise for a smoother, less disruptive shot. These Crossbow Broadbands are larger than the original model for compound bows, and are designed to withstand the immense power and energy that crossbows produce. They are available for split or solid limb crossbows in 9 band colors.

Unique design cuts out noise and vibration on multi-frequency levels

Made out of vibration dampening NAVCOM® material

9 ring colors available

NEWLY UPDATED split limb Broadbands with rubber washers for optimum silence and zero rattle and limb damage

Solid limb Broadbands install easily and securely with industrial strength 3M Adhesive

Easily attaches to solid limb crossbows with high-grade self adhesive

SPLIT LIMB

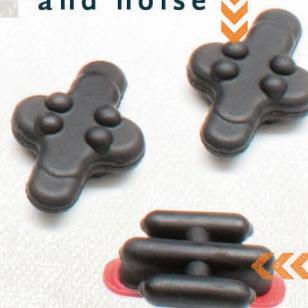

Securely mounts to split limb crossbows. Only requires an Allen tool to install.

Stirrup Dampeners dampen vibration from stirrup

Super String Leeches reduce string oscillation and noise

CROSSBOW SILENCING KIT

Cuts out vibration and noise coming from the limbs, stirrup, strings, and bolt retaining spring.

Bolt Retention Dampener silences the bolt retaining spring

Product Update

CROSSBOW SLINGS see pages 82-87

CROSSBOW SILENCING KIT

This kit attacks vibration and noise at the source. The Crossbow Broadbands dampen limb vibration. The Stirrup Dampeners attach to almost any foot stirrup to quiet the extra clatter. Also in the kit is the Bolt Retention Dampener that helps to quiet the bolt retaining spring. Super String Leeches complete the Crossbow Silencing Kit and reduce string noise. A bow press is required for leech installation.

LIMBSAVER®

By  SIMS VIBRATION LABORATORY

LIMBSAVER

UNDENIABLY THE BEST

Engineering the best and most effective archery, firearms, and crossbow products is our job #1. We spend thousands of hours designing and testing our products to ensure that our customers are getting the quality gear that they have come to expect from us. Other companies have tried to mimic the look of our products, but none have succeeded in even coming close to our products' performance and reliability.

Technology

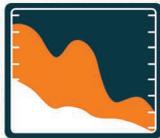

NAVCOM MATERIAL

We have been developing and using our LimbSaver proprietary NAVCOM (Noise and Vibration Control Material) since the beginning. This one material takes many forms. The durometer, or hardness, of the material is adapted to suit different applications. That's why, for example, you can feel a distinct difference between the hardness of our slings – which contour your shoulder and relieve stress from weight, and our recoil pads – which absorb and dissipate energy and vibration.

RECOIL REDUCING

GREATLY REDUCES
FELT RECOIL

LimbSaver recoil pads are the best in the industry. They are designed with atmospheric chambers which use uniform energy dissipation to greatly reduce felt recoil.

Each specific pad model is tested with the highest caliber firearms that the pad will fit to ensure maximum performance. Thickness, rigidity, and overall design of each style is optimized to ensure high-end-class felt recoil reduction. The result is a line of recoil pads that consistently outperform the competition.

ALL-WEATHER & DURABLE

ALL WEATHER

EXTRA TOUGH

Our products are built to be used outdoors in harsh environments. Since the beginning, we have been researching, developing, and improving upon materials we use to build our products to make them more durable and longer lasting.

We are passionate about making products that work and products that last. Year after year, we have proven that our products are in a league of their own in terms of function, durability, and longevity.

EASY TO INSTALL

»»» EASY TO INSTALL

When we create our products, we have our customers in mind. We want to make the best-functioning products that we can. Part of that functionality is ease of installation.

We realize that not everyone has a garage full of archery-specific tools or expertise. That's why we strive to create products that are quick and simple to install.

»»» SCIENTIFIC TESTING

We test all of our products against our competition using the best and latest, state-of-the-art equipment to ensure that our products are the best available.

ANTI-SLIP SURFACE

»»» NO-SLIP

Some of our products are designed with No-Slip surface. For instance, when using our slings, it is important that the sling stays put on your shoulder so you don't have to fuss with and constantly readjust.

TIGHTEN GROUPS

»»» TIGHTER GROUPINGS

We are proud to offer products that have been designed and tested to quickly improve accuracy and tighten groups.

Our line of Dead Center shotgun sights feature industry-leading fiber-in-fiber technology that gather light from even darkest environments, and our Sharpshooter X-Ring barrel deresonator works to delay barrel whip and tighten groupings.

THE RESULTS SPEAK FOR THEMSELVES.

AIRTECH PRECISION FIT RECOIL PAD

The AirTech is the most advanced recoil pad in the world. The redesigned atmospheric chambers produce a substantial increase in performance through uniform energy dissipation. With cutting-edge technology and proprietary design, the new AirTech recoil system dominates the market. Each AirTech Precision-Fit recoil pad model is custom designed to fit specific firearm models. Because of the urgent demand, we are continually adding new models to our AirTech Precision-fit line of recoil pads. Please see the reference guide and template guide in the back of this catalog for specific sizing and product numbers.

▶▶▶ AIRTECH SLIP-ON RECOIL PAD

The world's most advanced recoil pad is now available as a slip-on option for most rifles, shotguns and muzzleloaders. It features advanced atmospheric chambers which produce a substantial increase in performance through uniform energy dissipation. No installation necessary; just slip over the end of your firearm stock and feel the difference immediately.

The slip-on pads are designed to slip over existing firearm stocks without any modifications. We recommend taking off factory butt pads, but it will work without removal.

CLASSIC RECOIL PADS

PRECISION FIT • GRIND-TO-FIT • SLIP-ON

Upgrade the value of your firearm with our Classic Recoil Pads. They reduce up to 70% of felt-recoil and dramatically reduce muzzle jump. That means you will not only be more comfortable while shooting but you will be able to shoot longer with less discomfort. All LimbSaver recoil pads are specially tuned for maximum performance. We take into account the thickness, rigidity, and overall design to give you best-in-class felt recoil reduction for your favorite rifle, shotgun or muzzleloader. That is why our pads have been proven to consistently outperform every other brand of recoil pad.

Precision-Fit: Designed to specifically fit many firearm popular models. Easy to install - all that's required is a screw driver *Please see back of book for sizing and templates.*

Slip-On: Designed for maximum compatibility and ease of use. We recommend taking off existing butt pad, but can be used without removing it. *Please see back of book for sizing and templates.*

Grind-to-Fit: No other recoil pad is this customizable. They can be tailored to perfectly fit your stock using a belt grinder. We recommend that professional shops modify and install these pads. *Please see back of book for sizing and templates.*

KODIAK PRO **LEATHER FIREARM / CROSSBOW SLING**

The Kodiak Pro Firearm/Crossbow Sling enables you to carry your firearm or crossbow longer in the field without the common discomfort or pain. It is made out of soft suede and LimbSaver's proprietary NAVCOM® material which evenly distributes the weight of the firearm over a larger area, so that your shoulder will not fatigue even after long-term use.

The sling features multi-directional self-balancing system that is designed to balance the sling to any angle or shoulder contour. It also features non-slip grippers so that your sling rest securely on your shoulder. Ergonomically-designed, adjustable NAVCOM hand grip provides absolute comfort and control.

Jim Shockey
 Professional Hunter and TV Host

SHARPSHOOTER X-RING

The Sharpshooter X-Ring is a unique barrel dampener manufactured from NAVCOM® that tunes the vibration waves that affect shot grouping. Each of these individual waves negatively affects the barrel and the Sharpshooter X-Ring is specifically designed to control them. By reducing this energy and tuning the dampening characteristics to a specific location on the barrel, you can consistently control muzzle movement during lock-up time which translates to greater accuracy.

Standard Size Fits 1/2" to 7/8" Barrel Diameter
Bull Barrel Size Fits 3/4" - 1 1/8" Barrel Diameter

SHOOTING PAD

Our shooting pad is ideal for individuals who are especially sensitive to the fierce kickback of their firearm can use it in addition to a LimbSaver recoil pad for maximum recoil reduction. Simply slip it over your shoulder, clip it on, and fire away! It is especially useful for extended shooting sessions, or when using a variety of firearms without recoil pads. It is built for use in all weather conditions, so use it rain or shine. Straps adjust for a secure fit. The pad is reversible for right or left-handed shooters.

TAC-10

AR-15/M4 STOCK

LimbSaver has brought the new Tac-10 replacement stock to their line of incredible recoil pads. It is designed as a drop-in replacement for AR-15 / M4 A1 & A2 rifle stocks, utilizing standard rifle-length receiver extension buffer tube. It is engineered with an unheard of 10 micro-length of pull adjustment positions. The Tac-10 buttstock features two unique dual integral receiver mounting points for standard quick-detach hardware, perfect for right or left hand use. Standard sling attachment point is also included.

LimbSaver's legendary recoil pad is pre-mounted to the Tac-10. It will reduce up to 70% of felt recoil and substantially reduce muzzle jump for heightened accuracy. Its snag-free design won't hinder quick rifle positioning. It truly is an impeccable design. Quick detach hardware not included.

TACTICAL SNAP-ON

AR-15/M4 SNAP-ON RECOIL PAD

This recoil pad securely snaps onto most six-position AR-15 / M4 tactical stocks. It is a great asset to your platform. It reduces felt recoil by up to 50% while controlling muzzle jump. The non-slip NAVCOM® material keeps your rifle in place for comfort and accuracy.

AR-15/M4 SYSTEM

The AR-15 / M4 System includes three products to give you unparalleled control and heightened accuracy.

- The Snap-on Recoil Pad reduces recoil and helps keep your rifle securely positioned against your shoulder.
- The Small/Tac Pro Grip is designed to provide you with maximum comfort and grip for a smoother, more controlled shot.
- The Sharpshooter X-Ring improves your accuracy helps tighten your groups by dampening barrel whip.

PRO GRIPS FOR HANDGUNS / TACTICAL RIFLES

New Product

The Pro Handgun and AR-15 Rifle Grips are designed to provide maximum reduction of muzzle jump and felt recoil for a smoother, more accurate shot. Multiple impact nodes are located on the inside of the grip, isolating the shooter's hand from the firearm. These nodes are designed to collapse – referred to as 'break away' – as the firearm is discharged, ultimately reducing the pain and discomfort associated with handgun recoil. It features a protection lip that isolates the user's thumb from the hammer guard's contact point during recoil.

The hand grips have a universal-fitting stretch contour design, ensuring they stay in place during use. The non-slip NAVCOM® material maintains secure grip control while dampening out felt recoil. Choose from four popular sizes.

Thursdays - 9PM EST

Shawn Michaels & Keith Mark

WWE fighting legend Shawn Michaels and renowned hunter Keith Mark have teamed up for the show MRA Hunting. They promote their faith, family values, and their love of hunting and the great outdoors. Follow along as they take you through their hunting season and talk about some of the more controversial issues in the hunting industry.

Shawn and Keith have been supporters of LimbSaver products for years. They use our Proton bow, as well as many of our noise and vibration-dampening products.

Brad Miller

After spending more than 14 years in the NBA, Brad Miller is excited to be focusing all his time and energy on the next greatest thing: his leisure hunting lifestyle as a good ol' country boy. He's worked hard for his toys, and now he's ready to play!

Tune in to the Sportsman Channel to join Brad as he travels the world doing what he loves: "Whackin' and Stackin' baby!"

Brad has been sporting our Proton DT along with many of our other products.

Pass'n it on Outdoors

David Hinceman and Brandon Currin take their audience on hunting adventures in the Midwest, USA. They have a passion for hunting and the outdoors, and they are all about passin' on that passion to others.

They use hunting and the outdoors as a way to reach out to their community and make a difference. They love to give others, especially children, a chance to experience the wild outdoors.

David and Brandon use the LimbSaver Proton DT, stabilizers, limb dampeners, and leeches.

Check out their show at
passinitonoutdoors.com

Raised Hunting

David and Karin Holder are passionate about hunting and raising their two boys – Warren and Easton – with a love and respect for wildlife and the outdoors. Their brand new show Raised Hunting follows their lives as a hunting family, and supplies viewers with trusted information for hunters.

Bob Fromme

Bob Fromme is a world-famous hunting legend and industry specialist. He is one of only a few people to have killed all North American big game with a bow. He is an enthusiastic hunter and outdoorsman as well as a patient teacher. He has long been a friend of ours here at LimbSaver.

He has been supporting the LimbSaver brand and using our vibration dampening products for years. He uses our bow stabilizers along with our limb dampeners.

Check out his website at

LIMBSAVER GALLERY

I rely on a full range of Limbsaver products on all of my hunting adventures across the west. From slings and recoil pads to vibration dampeners and much more, these great products make me a more comfortable and accurate hunter giving me the edge I need to be successful chasing my dreams. The best part about it is that all Limbsaver products are made in the USA.

RECOIL PAD

REFERENCE GUIDE

RECOIL PAD TEMPLATE GUIDE

Precision-Fit
Recoil Pad Templates

Firearms Products

Why we recommend using templates:

Many manufacturers modify their stock dimensions yearly, making it difficult for us to keep one specific model available for one specific manufacturer. You also may have a less common gun that we do not list in our Recoil Pad Reference Guide, but you may find a pad that works great. For those reasons we have provided these templates to help you match your gun buttstock.

Other options:

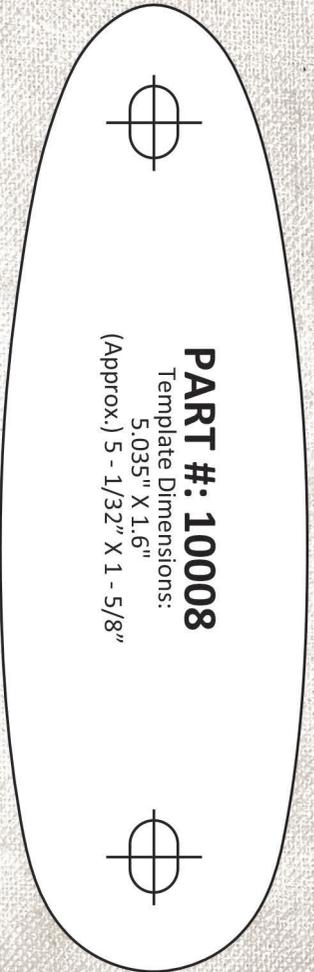

If you have a synthetic stock and a Precision-Fit recoil pad is not possible, you can utilize our **SLIP-ON** pads which deliver the same felt recoil reduction as the Precision-Fit pad. Removal of existing pad is recommended, but not required. You may also utilize our **GRIND-TO-FIT** recoil pads, but these may require a visit to your local gunsmith.

Template instructions:

1. Simply remove the existing recoil pad or plate from your butt stock by unscrewing. If your recoil pad is glued on, it may require gunsmithing.
2. Place the gun stock on top of each template until you have found a match. Cut template out and place on stock to check for perfect fit and to determine screw hole location. If the screw holes do not line up, you can slot or elongate the screw holes on the bottom of our plate an additional 3/16" or more towards the heel or the toe and 1/16" towards the center of the pad (use a Dremel® tool with sanding attachment) to match the holes in your stock. This is regardless of wood or synthetic stocks. Please note: This only refers to the template recoil pads that are not already elongated or slotted.
3. Once a match is found, the product number will be on that specific template so you will know which one to order.

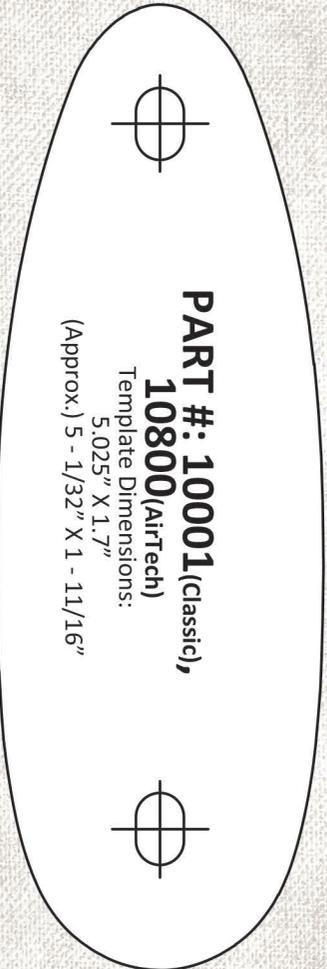

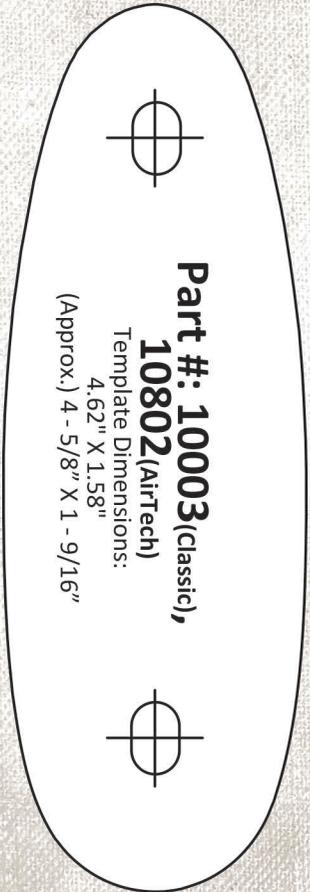

PRECISION-FIT TEMPLATES

^ STOCK SIDE ^

This pad fits a specific make of synthetic stock. To accomplish as accurate a fit as possible, many of the synthetic recoil pad plates have profiles that snap inside the cavities of the stock. While most plates can be altered by grinding off protruding plastic on the plate, this plate CANNOT be altered.

PRECISION-FIT TEMPLATES

GRIND-TO-FIT TEMPLATE GUIDE

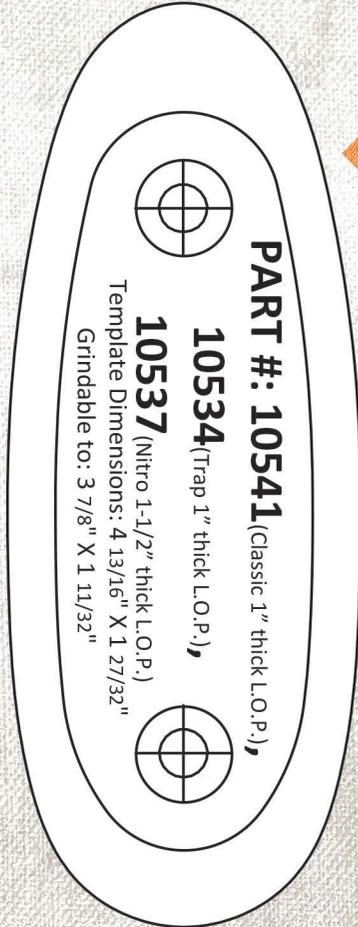

About Grind-to-Fit recoil pads

The following Grind-to-Fit Recoil Pads are shown with two profile lines. The outer line is the actual size of the pad. The inner line is the "Max" Grind line. In order for our technology to function properly, the interior air chamber must remain intact with enough wall thickness to contain the pressure during the firing of the weapon. By not grinding past this line, you ensure your pad will be in perfect working order. To determine which Grind-to-Fit Recoil Pad is right for you, remove your existing pad, and place your flat stock on the templates. Choose the pad that shows the full outer line of the template, and none of the interior line. For further instructions, see inside of our packaging, or go to www.LimbSaver.com.
