

DINKER®

2011

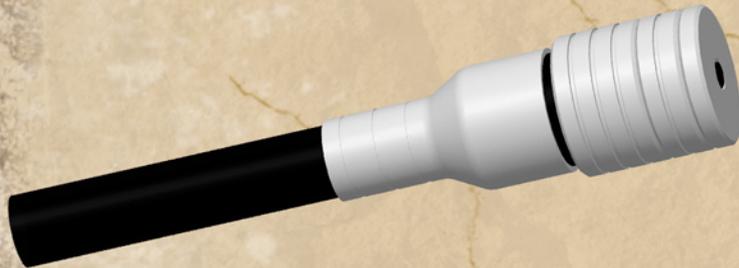

AHEAD OF IT'S TIME

DOINKER®

The Doinker Supreme is the most advanced Doinker ever produced due to it's ability that allows the archer to fully adjust the Flex/Tension of the Doinker and be able to convert the Doinker to use other Doinker technologies such as the Doinker D.I.S.H. and the all new GEN 5 Doinker for endless combinations of dampening and weight placement.

DD7/8
7/8" Doinker Supreme
1/4-20 Thread (F), 0.7oz

DS1
1 1/8" Doinker Supreme
5/16-24 Thread (F), 1.1oz

when these logos are present near an item on a page it means that stabilizer is currently using that technology or can convert to use those products.

DOINKER®

PLATINUM HI-MOD STABILIZERS

421 WEIGHT INCLUDED

The NEW Platinum Hi-MOD is our most advanced tournament stabilizer system to date. It is already the choice of Top Pro-Archers world wide due to its Ultra-Stiff High Modulus Carbon rods ability to not only transfer the residual energy left over from the shot efficiently to the end of the stabilizer but it also holds 15 + ounces of weight with little flex in the carbon rod. At the distal end the energy is absorbed by the minimal flex of the weights via it's removable, fully adjustable, 1-1/8" Doinker Supreme. All of this while keeping wind drag down to a minimum with it's .750 thousands of an inch out side diameter carbon rod. Other features that put the Platinum Hi-Mod in a class of its own include: a complete set of the low profile, one once increment stainless steel 421 Weights, a Doinker thumb spur hole at the base of the stabilizer to help assist in a solid connection to the bowmount and the Doinker Thumb Spur tool. (Thumb Spur tool included on front stabilizers only)

QFV12

12" Quadra-Flex
V-Bar set, 11.2oz

The Quadra-flex is the next step in Multi-rod Technology and is perfect for the compound or re-curve archer that wants an Ultra light stabilizer with a very soft feeling shot. It utilizes Smoke tinted Lexan connections in which incorporate our ITP Sleeves.

The ITP sleeves completely surround and hold the four rods in place under the connected pressure. With the combination of these ITP Sleeves placed at every connecting Lexan point, the Q.F's fully adjustable 1-1/8" Doinker Supreme with aluminum Universal weights at the end, allows this stabilizer to be the softest shooting, feeling, stabilizer we offer for the Olympic Recurve or Compound archer.

ELITE DOINKER SUPREME STABILIZERS

ALUMINUM WEIGHT INCLUDED
(ALSO AVAILABLE IN BLACK)

Elite
L.D.S.

The carbon Elite has been the stabilizer of choice from top compound Pro archers around the world for many years. This is due to all its design features that not only help you hold steady on a windy day but also take out vibration at the shot. The Carbon Elite features a .640 Thousands of an Inch Carbon Grid Rod. A built in Suppression mount at the base of the stabilizer which has a weight rod suspended internally by our ITP material. The ITP material at opposing ends, helps to eliminate vibration, and features a fully adjustable 1-1/8" Doinker Supreme with Universal Stack weights. The benefit of the Doinker supreme is, it allows you to tune the flex of the Doinker in order to get that perfect feel.

AVANCEE STABILIZERS

ALUMINUM WEIGHT INCLUDED
(ALSO AVAILABLE IN BLACK)

The Avancée is the perfect choice for recurve shooters of all levels due to its Ultra light design and low wind drag geometry. It uses a very light, stiff Carbon Grid rod with an Outside Diameter of .640 Thousands of an Inch. It also includes a fully adjustable 7/8" Doinker Supreme and D.A.W.G. weights at the Distal end. The Avancée' also features a Doinker Thumb Spur hole at the base of the stabilizer that allows you to tighten the stabilizer firmly to the bow.

HUNTING DISH STABILIZERS

The Mini D.I.S.H. Hunter is a combination of some of our most popular designs and is a perfect choice for any Bow Hunter that wants the ability to off set the weight of their bow mounted quiver, sight, and rest by just positioning the three hole Mini Hub to the opposing side of the bow. It is available in four great colors that include Flat Black, Next G-1, Next Vista and Lost Camo.

DDMH

6" Doinker DISH Mini Hunter, 8.5oz

DDH10

10" Doinker DISH Hunter, 9.9oz

The Doinker D.I.S.H. family has become a very popular stabilizer recently due to the many benefits in it's design, not only in it's ability to off set weight distribution but also it's dampening features of the Flexible weight hub and the internal Doinker it is suspended from. It is now available for the hunters that are after something a little more light in weight with it's Small six hole weight design and lighter internal Doinker. It is also available in three very universal camo patterns that include Next G-1, Next Vista and Lost Camo.

DOINKER®

DOINKER DISH

The Doinker D.I.S.H (Distal, Interrupted, Stabilizer, Hub) is an all-new concept in stabilizer utility and performance. The super-sized Hub acts like a Doinker on steroids as it champions bow torque, noise, vibration and shock. The Patent Pending Hub employs our proprietary Interrupted Transfer Polymer and is the most effective Doinker we have ever constructed. Adding to this stabilizers unique concept is its 4.5-inch flexible, variable weight disc that uses our proprietary STACK Weights to weight the forward end. By putting the weight at the distal end of the stabilizer, shooters are able to aim steadier and make the most of a stabilizer's two main functions: stabilization prior to the shot, and dampening after the arrow is released. The Doinker D.I.S.H is exceptionally unique in its design and affords complete weight customization from a feathery 6 ounces, up to a robust 2 pounds, 14 ounces! A complimentary quick disconnect allows you to effortlessly mount and dismount the D.I.S.H for easy transport and travel.

Though the look is unorthodox - its performance is unmatched. The new Doinker D.I.S.H has been designed with hunters and target archers in mind, functioning equally well when shooting in the field or at the range. Fasten a Doinker D.I.S.H to your bow this year and experience shooting that's truly out of this world.
