

2012 PRODUCT GUIDE

What champions are made of
PROFESSIONALISM
POWER & PASSION

W&W
WIN & WIN

Essentials for victory!

Shooting power cutting through the wind created by WIN&WIN technology.

New epoch of upgraded accuracy and stability!

Feel the speed and power of it!

WIN&WIN has been composed of the members with passion and experience who have put KOREA archery on the top of the world since 1980's. We are eager to produce our products aiming for the best as if each were a coach preparing for the Olympics sincerely and an archer were in the competition seriously. WIN&WIN products have already proved the quality through the victories in the World Championships and in the Olympic games by establishing new world records repeatedly. However, we will not be satisfied with the results. On the contrary, we will try harder as if we started just now.

WIN&WIN Carbon Technology

WIN&WIN CARBON TECHNOLOGY

Functional advanced composite technology

WIN&WIN's Innovative engineering work optimizes the manufacturing process and the carbon material combinations with high-tech and the most efficient tooling and molding method. In this way, we improve the quality of each bow as well as the expectation of athletes.

PRODUCTION ENGINEERING

Long experienced professionals specialized production technology and their scientific approach to the detailed analysis and passion make world's best carbon products.

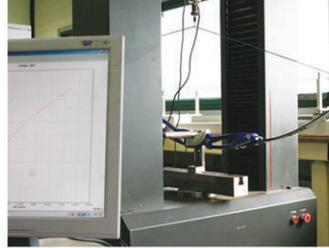

WIN&WIN BOW TECHNOLOGY

Each department tries their best to apply what is true and to select the most proper material and way to make the world's best bows ever made.

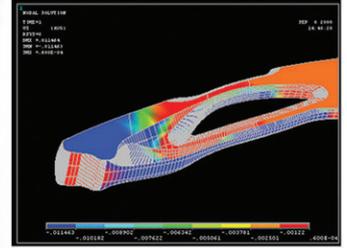

High speed filming

Equipment to test a bow strength

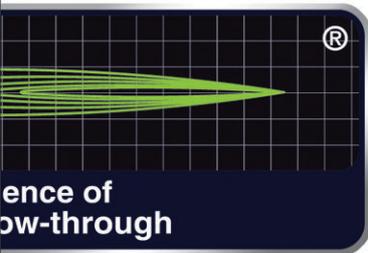

CATIA, UG, Pro-engineer
Modeling engineer/tool makers

FEM simulation for composite
and metal structure

TAKE NOTICE OF "STRING FOLLOW-THROUGH!"

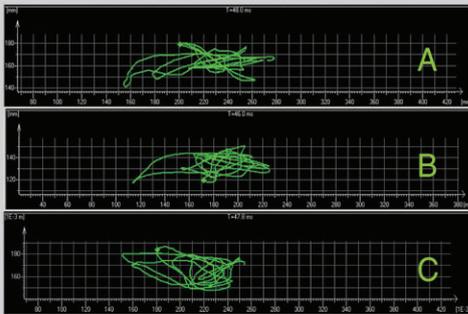

Performance of the bow is decided by accuracy, stability, arrow speed and a super smooth feeling at the moment of the shot and is known as the most important for shooting. 'String follow-through or string reaction during the shot is a major indicator to show these elements.'

- **Better Speed**
(Stronger against wind) Energy travels efficiently from limbs to the arrow.
- **Better Arrow Grouping**
(Should increase the score) Accuracy and consistent stability of the limbs at the moment of shot execution.
- **Better Shooting Feeling**
You feel virtually no stress from a powerful string shot at the moment of release.

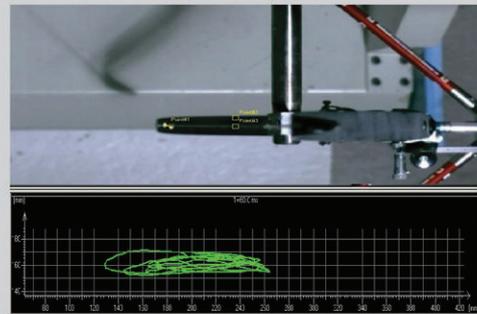

The new INNO bow gives you amazing advantages as the string follow-through is very stable!

Normal Aluminum Bow

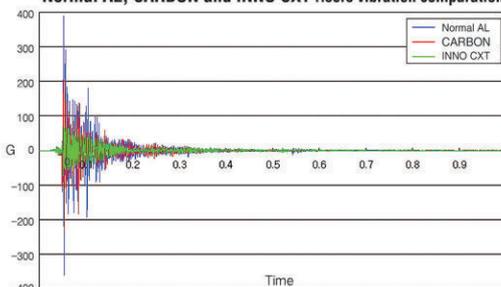

The following pictures show the string movement of most of today's bows. You can see that the first string movement is very unstable during the shot on the first picture. Even after the arrow is launched, the string is moving very irregular back and forth or left and right. Thus both limbs move separately which shows a highly unbalanced system.

NEW INNO Bow

However, clearly the New INNO bow(INNO CXT) has solved these problems. Please look at the following graph which shows a very regular movement of the string. This shows that the archer's form will stay constant until the end of the shot and the movement of the archer is reduced substantially.

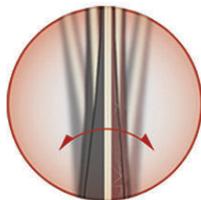

Normal AL, CARBON and INNO CXT risers vibration comparison

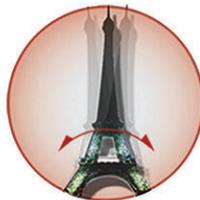

WIN&WIN's INNO CXT carbon riser maximizes the properties of carbon. The INNO CXT carbon riser minimizes the unnecessary limb movement from the archer's release and makes bow movement extremely stable while absorbing the vibration with efficiency and far more quickly than any other bow made today.

Chart: Comparison of vibration absorption between an aluminum, INNO and INNO CXT risers. (Blue graph shows an aluminum riser's shock and vibration absorption, red is the INNO Carbon and green is New INNO CXT carbon riser.)

BARRELED DESIGN / TOWER EFFECT

Barreled design

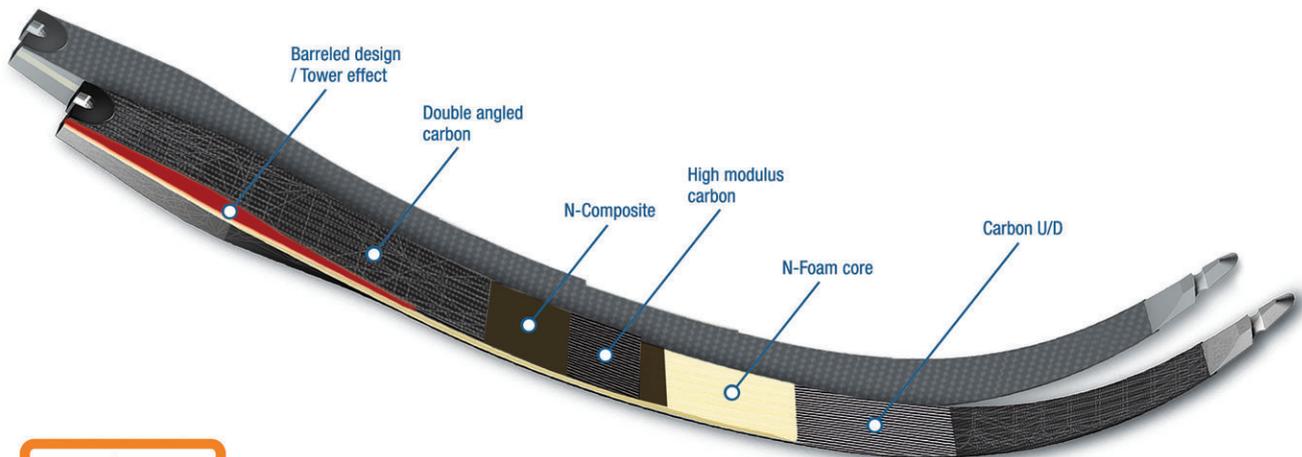

Tower effect

Barreled design / Tower effect : Patented WIN technology, #424568

Barreled bottom design creates innovative tower effect which means effective shock absorption during the shot and increased accuracy by removing unnecessary movement.

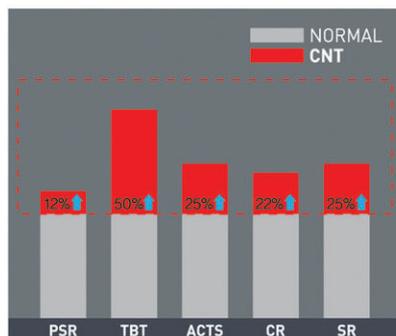

WIN&WIN NANOTUBE TECHNOLOGY

INNO EX with Nano technology which is only from WIN&WIN makes the most stable, accurate and durable limbs. Carbon nanotubes infusion is the strongest and most stable substance known to exist. The superior mechanical properties of carbon nanotube resin produces stable and accurate limbs with increased durability and shock resistance. WIN&WIN nanotechnology experts to develop molecularly bonded carbon nanotubes combined in the first bow ever. New INNO EX limbs provide higher durability, stability and accuracy for archers.

Carbon NANOTUBE Technology

Carbon nano-materials(carbon nanotube and graphite nanofiber)are innovative materials in the 21st century. These materials that are as small as 1/10,000 of a human hair and superior mechanical, chemical, physical and magnetic properties have been being spotlighted as next generation materials.

EX-Composite

EX-Composite is added nano technology.

This adjustment made at the molecular level, significantly strengthens and enhances the stability of the overall carbon matrix.

EX-Foam core

A new material used to attach the high modulus carbon in strategic points inside the limbs. Nanofoam core provides durability, smoother and enhanced overall feel.

Convenient center-shot adjustment system
Royal cross carbon

INNO CXT RISER

Unique design of the world best bow

INNO CXT carbon riser maximizes the properties of carbon.

The INNO CXT carbon riser minimizes the unnecessary limb movement from the archer's release and makes bow movement extremely stable while absorbing the vibration with efficiency and far more quickly than any other bow made today.

WIN&WIN engineering also solved simple problems such as twisting and bending during the molding process. Now it is possible to have virtually perfect limb and riser alignment with WIN&WIN bows.

SPECS

INNO CXT	23 inch	25 inch	27 inch
MATERIAL	Carbon Graphite / Carbon

EX NANO TECHNOLOGY

Innovative nano technology engineering for maximum torsional stability and precise control.

INNO EX POWER LIMBS

The most advanced recurve limbs in the world.

EX - Composite

N-Composite is added nano technology. This adjustment made at the molecular level, significantly strengthens & enhances the stability of the overall carbon matrix.

EX - Foam core

A new material used to attach the high modulus carbon in strategic points inside the limbs. Nanofoam core provides durability, smoother and enhanced overall feel.

SPECS

MATERIAL	Nano Foam Core / High Modulus Carbon
POUNDRAGE	28 ~ 48lbs

INNO EX PRIME LIMBS

WOOD CORE that is selected very seriously is adopted for INNO EX PRIME LIMBS for stability.

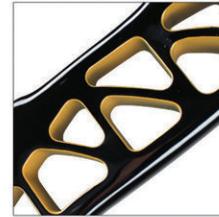

Shooting Feeling

The INNO EX PRIME Wood core limbs allow the archer to focus on a stable feeling while at full draw and a sense of power right at the moment of shooting. This also allows for a stronger focus of concentration and a very stable shot.

SPECS

MATERIAL	Nano Wood Core / High Modulus Carbon
POUNDRAGE	28 ~ 48lbs

The ideal grip
Balance weight bushing

INNO AL1 RISER

Most advanced aluminum riser

The stylish INNO AL1 riser features a simple alignment system with perfect balance for ultimate accuracy and consistency. INNO AL1 is so stable and comfortable to shoot and with its 25" length, there is no lateral twisting. You have a serious bow ready for the world stage. The riser weighs 1320g and comes in painted.

SPECS

INNO AL1	25 inch
MATERIAL	Forged Aluminum / cut by machine
MASS WEIGHT	1320g
TYPE	RH / LH
COLOR	BLACK/ GOLD, RED/ WHITE, BLUE/ WHITE, BLACK, RED, BLUE, WHITE

RCX-100 RISER

Are you looking for a light, high performance carbon riser? Then, It is the ideal solution RCX-100 riser made by Royal Cross Carbon and Carbon U/D. It is designed by two carbon frames so that it can maximize the strength of the carbon riser greatly at the moment of shooting. You can also adjust the center-shot simply without unstringing the bow.

SPECS

The carbon pattern on the surface can be partially shown irregularly.

RCX-100	25 inch
MATERIAL	Royal Cross Carbon & Carbon U/D
MASS WEIGHT	1100g
TYPE	RH / LH
COLOR	RED, BLUE, PINK, GOLD, BLACK

RCX-100 LIMBS

CRS foam core that is developed by W&W engineers maximizes the durability of the limbs and stability in shooting. It ensures the highest speed. In addition, high modulus carbon and 45 degrees carbon system increase shooting stability while protecting the carbon, reinforcing the riser and providing superior anti-twist properties.

SPECS

MATERIAL	Nano Foam Core / High Modulus Carbon
POUNDAGE	28 ~ 48lbs

Aluminum controls
The ideal grip
Balance & Smooth finish

WINEX RISER

The ideal bow for serious shooting

When you firstly pick up an WINEX riser, you know the feel of the grip, the balance smooth finish and stylish design are enough to convince you that WINEX is the appropriate riser for you. The WINEX is so stable and comfortable to shoot and with its 25" length, there is no lateral twisting. The handle weights 2.73 lbs (1280g) and comes in painted.

SPECS

WINEX	25 inch
MATERIAL	Forged Aluminum(6061) / cut by machine
MASS WEIGHT	1280g
TYPE	RH / LH
COLOR	RED/SILVER, BLUE/SILVER, BLACK, RED, BLUE, YELLOW, WHITE

WINEX LIMBS

Royal cross carbon limbs are the secret of the smooth performance of the WINEX limbs. 45 degrees carbon system increases shooting stability providing superior anti-twist properties. Its barreled bottom design also creates effective shock absorption and increases accuracy by removing unnecessary movement. WINEX is available in weight ranges from 28lbs to 48lbs in 2lbs increments.

SPECS

MATERIAL	Royal Cross Carbon
POUNDRAGE	28 ~ 48lbs

ACCESSORIES SERIES

As well as manufacturing the finest quality recurve bows, WIN&WIN makes an excellent range of archery accessories. Our own staff have designed or contributed to many offerings of ours. We also listen to archers and understand their needs. Our products are renowned for their quality, design and reliability. Most of all, they suit archers!

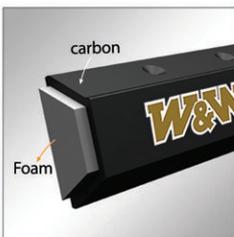

WS600 SIGHT

Available in 4 color : BLACK, SILVER, RED, BLUE

The features of our WS600 Sight are :

- The carbon/foam extension minimizes the sight weight which prevents torque in shooting. In addition, carbon/foam absorbs damaging vibration caused by the shot and makes shooting more stable.
- The unique bolt tuning system gives easy and convenient vertical adjustment.
- The slide bar on the sight head creates a smooth and extremely close measurement adjustment.
- The locking cover system is solid and stable.

HMC PLUS STABILIZER

Recurve archers strive for arrow speed but this results in increased vibration and up until now, stabilizers have not been able to effectively reduce vibration. We have developed a revolutionary new stabilizer called the HMC PLUS stabilizer which specifically addresses this issue, by improving dampening, absorbing shock and controlling torque.

Other stabilizers have an even wall thickness along the length of the rod and this does not absorb all vibration, whereas the HMC PLUS features a unique design-it has a wall thickness of 0.0275" (0.7mm) at the front of the rod and 0.0787" (2mm) at the base. Outer size of the HMC Plus Extender is thicker than the present. Extender and it creates much more effective at absorbing shocks in shooting.

HMC PLUS comes in the long rod-26", 28" & 30", the short rod-10", 11" & 12" and extenders-3", 4", 5" & 6", finished in a smart light color.

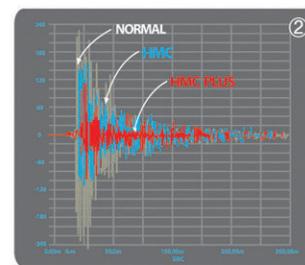

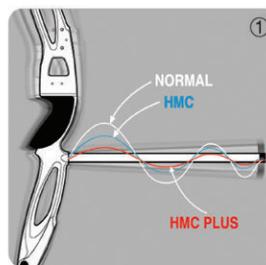

HMC PLUS Long
30/28/26"

HMC PLUS Short
12/11/10"

HMC PLUS Extender
6/5/4/3"

① This vibration graph illustrates how other stabilizers release vibration but the HMC PLUS stabilizer absorbs vibration at the source.

② Other stabilizer (top) and the HMC PLUS (bottom). See how the other stabilizer is the same thickness along the whole rod, whereas the HMC PLUS starts out as a slightly larger wall at the base but gradually reduces to about half the size at the front of the rod.

③ Vibration wave graphic shows how vibration is more effectively controlled on the HMC PLUS because it is absorbed progressively along the entire rod ; with other stabilizers, the vibration is released back into the riser.

CX V-BAR

The CX all carbon V-Bar is a proven performer, being much better at absorbing vibration than other aluminum V-Bars.

The CX V-bar is made with Win & Win's unique 'rolling' technology which has given the CX V-bar great vibration dampening characteristics but reduced the weight significantly over the heavier aluminum V-bar. CX V-bar gives a feeling of stability and smoothness that is not associated with aluminum V-bars.

Comes in three angles 35, 40 and 45 degrees.

WT DAMPER

The WT Dampers are outstanding for controlling dampening and absorbing vibration. The WT Dampers use a special formula of TPU to ensure no vibration and to dampen noise.

MINI DAMPER

It is the most efficient anti-vibration device.
Thread size : 1/4 X 20 / Color Option : Black, Red, Blue, Orange

WK400 CUSHION PLUNGER

The WK400 Cushion Plunger pressure button has a smooth action, is finished in a stylish polished aluminum in either black or silver.

Thread size: 5/16"-24
Adjustable length:
min.17.5mm / max.24.0mm (24mm Pressure point)
min.24.0mm / max.29.0mm (29mm Pressure point)

WK500 CUSHION PLUNGER

WK500 CUSHION PLUNGER is well engineered from quality components, with a good smooth action and micro click adjustments for fine bow tuning. Comes in 4 colors, black, silver, blue and red.

Thread size : 5/16"-24

Adjustable length :

min.17.5mm/max.24.0mm(24mm pressure point)

min.24.0mm/max.29.0mm(29mm pressure point)

CARBON CLICKER

The all carbon clicker is much more exact and ensures the best fit to provide a clear 'click' sound.

Available in three thread sizes : 6-32, 4-40 and M4

BEARING ARROW REST

Accuracy and smoothness

WIN&WIN arrow rest with flipper style arm is a great design incorporating a bearing, it makes your arrow groupings great while providing smoothness and superb clearance in shooting. Stability Minimizing the upper and lower movement providing clear arrow flight.

Color Option : Black, Silver Available in RH,LH

Stable in any conditions with more firmly designed rest.

1. Standing type head

- Comfortable for indoor use
- Suitable for holding an unstrung bow
- Supports a more accurate bow tuning set-up

2. Sitting type head

- Especially suitable for outdoor use
- Excellent stability when placed on grass or on a windy day
- Designed for recurve and compound bows

TY MULTI BOW STAND

Designed for indoor & outdoor uses

The TY Multi Bow Stand was designed for indoor and outdoor uses.

The TY Multi Bow Stand is solidly built, remains stable in all conditions to firmly support your bow.

The TY Multi Bow Stand is light , yet strong and durable and folds for easy storage. Comes in silver flip lock legs, with two types of head.

360 CORDOVAN FINGER TAB

The genuine shell cordovan

The 360 high quality Cordovan Finger Tab was designed with your comfort in mind.

Comes in Large, Medium and Small
Available in RH, LH

WECOUSE CHEST GUARD

Ergonomically designed, especially on the shoulder and the chest to remain secure and consistent shot after shot.

The WECOUSE Chest Guard was designed by archers for archers!

Available in black and white, in two sizes Large or Medium
and in RH, LH

CARBON ARM GUARD

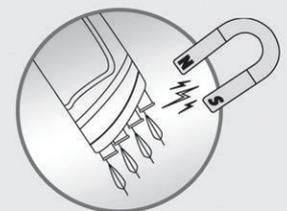

High quality carbon arm guard gives comfortable feel and the smooth surface creates less friction on the string.

A/E ARM GUARD

Our A/E Arm Guard is made of a new aluminum/epoxy material, a one piece design with 2 adjustable straps-one size fits all, comfortable fit and stylish design. Comes in green, blue and red

Fantastic magnetic bottom system
• Arrows are not fallen down

MAGNETIC QUIVER

Aesthetically designed for easy use.

Incorporates an arrow anti-movement system. Includes magnetic bottoms and 4 arrow tubes. (Medium size : 3 arrow tubes)

Sizes : Large & Medium
Color Option : Black only
Available in RH and LH

ABS BOWCASE

- The smart, solid design is comfortable to carry.
- Superb durability and wide space to organize various shooting items

Color : Black, Silver

Inner size : 830 X 330 X 205 (mm)

Outer size : 878 X 348 X 219 (mm)

MULTI BAG

Created by multi bag and can hold water bottles or other items.

STRETCH BAND

The SCAPOWER Stretch Band increases the archer's pulling weight, builds up muscles and develops firmness in the shoulder, improves posture and technique and by regular and consistent use, greater accuracy and stability in shooting. Daily practice for 10 minutes with the stretching band and a break of 2 or 3 minutes, improves pulling back the bow, better shot placement, drawing back and balance with the bow shoulder.

ARROW PULLER

Makes pulling arrows out of targets easily. Comfortably fits in hand and provides a solid gripping surface to safely pull out all types of arrows. Includes a keychain for carrying on a belt or pack.

300g

25g

GRIP MAKER

You can make the custom fit grip easily and fast by yourself with Win&Win grip makers.
