2014 Product Guide

About Us

What's New

43 years ago, Stanislawski® Archery Products changed the way we shoot. With the invention of the triggerless backtension release, Mel Stanislawski defined a category of release aids that would all be generically referred to as STAN®'s.

Over the next several decades STAN® style releases would win more tournaments than any other type on the market and continues to do so today. The same basic half moon/hinge dump design pioneered by STAN® in the 70's is still copied, repackaged and marketed as new. Only STAN® continues to originate new ideas to help archers shoot better scores.

This year is all about the trigger and the new Just X series of release aids incorporates the most sophisticated sear system ever created.

As always, thank you for your trust and confidence, we sincerely appreciate it.

NEW for 2013 the JustX with open or closed hook options

Trigger Releases

The JustX was designed for those archers looking to squeeze every last ounce of speed out of their setup. The new, compact searing mechanism accommodates a shorter neck and allows a complete range of handle sizes that cover small, medium, large, and extra large hands. Its compact design also makes it ideal for shooting with today's more common shorter axle to axle hunting bows.

Perhaps the coolest new feature is that the trigger travel and tension adjustments are completely independent from one another. Adjust one without affecting the other at all! And it offers an ultra wide range of trigger tension adjustments without changing any springs!

Just X sears are made of enhanced 440C stainless steel then hardened to 60 Rockwell and finished with our proprietary polishing process. They are designed to offer the same greasy smooth functionality as their predecessor all in a smaller, melt in your hand package.

The Just X incorporates Stanislawski's revolutionary ErgoFit™ technology allowing the user to cross train while offering a familiar fit and feel regardless of release style. That, combined with exceptional user adjustability produces a no-travel feel to your shot and a wide range of trigger pull adjustments... without changing any springs!

Just X

A patent pending innovation from Stanislawski that allows for easy and safe training. Learn proper shot execution without worrying about losing an arrow! Build confidence in your technique before attempting a shot!

Just X

Completely independent travel and tension adjustments
Changing one has no effect on the other!

Ultra Wide Tension Adjustment Window.
..... and you NEVER have to change a spring.

Multiple Size and Finger Configuration
SM, Med, LG, and XL sizes, three or four fingers with deep sweep handle.

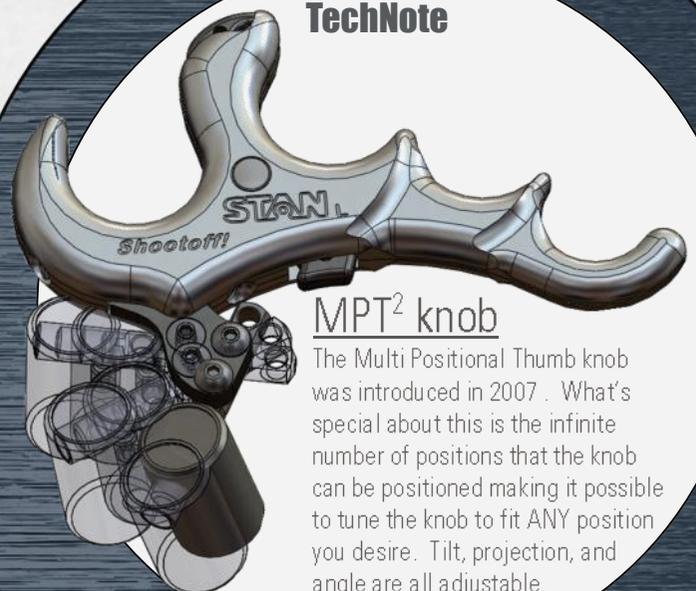

All new Just X micro adjustable sears
Ultra crisp, smooth, and accurate, always zero travel.

ErgoFit™ Cross Training Technology
All STAN® handles have a similar fit and feel.

Open or Closed hook.
You choose which way you want it

MPT² Knob
The final touch on the perfect fit

TechNote

MPT² knob

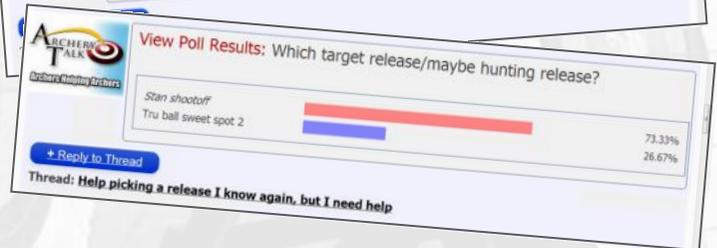

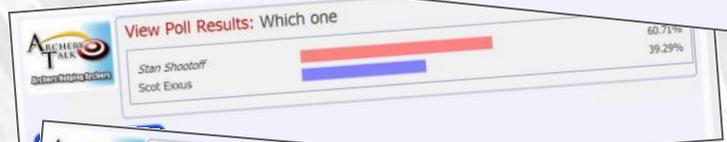

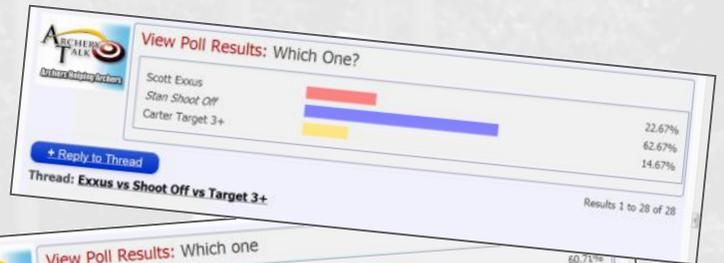

The Multi Positional Thumb knob was introduced in 2007. What's special about this is the infinite number of positions that the knob can be positioned making it possible to tune the knob to fit ANY position you desire. Tilt, projection, and angle are all adjustable.

Trigger Releases

The SX2 and shootoff! were launched in 2008 and 2009 respectively; they share our *silkpath*[™] sear mechanism. Exceptional adjustability in both fit and function has led to them becoming the most popular trigger release on the market today. Poll after poll shows that most archers trust their shot to Stanislawski. Give us a call and let us explain why.

More and more hunters are using thumb button style release aids for hunting. The SX2 and shootoff! come in a complete blackout version for maximum concealment.

SX2 / shootoff!

	SX2	Shootoff!
Huge Trigger Travel and Tension Adjustment Window More adjustment than any other and you NEVER have to change a spring.	✓	✓

<i>silkpath</i>TM micro adjustable sears The crispest and most accurate double sear system ever made	✓	✓
ErgoFitTM Cross Training Technology All STAN TM handles have a similar fit and feel.	✓	✓
MPT² Knob The final touch on the perfect fit	✓	✓

*silkpath*TM searsTM

*silkpath*TM sears were introduced in 2008 in our popular SX2 release. Made of enhanced 440C stainless steel then hardened to 60 Rockwell and finished with our proprietary polishing process, these sears provide years of service. The *silkpath* searing system uses a unique fitting method to provide extreme repeatability. That, combined with user adjustability produces a no-travel feel to your shot and a wide range of trigger pull adjustments... without changing any springs.

Backtension Releases

MOREX™ Sear

STAN's® all new **MOREX™** sears are the most advanced hinge based sears on the market offering a new level of precision in the market pioneered by Mel Stanislawski. Like all our sears, **MOREX™** sears are crafted from enhanced 440C stainless steel. These sears are carefully CNC machined in our New York factory.

MOREX™ sears are hardened to a brutal 60 Rockwell then polished for an ultra smooth finish. The result is a smooth release no matter how heavy the setting. Whether you like your release set hot or heavy, these sears offer a silky smooth break with the reliability and consistency you can only find in a STAN®. Call 315.258.9269 to learn how you can start getting more X's!

Patent Pending

**TRAINER
LOCK**

A patent pending innovation from Stanislawski that allows for easy and safe training. Learn the back tension technique without worrying about getting a fat lip! Build confidence in your technique before attempting a shot.....backtension shot execution is now within your reach!

MOREX *sear releases*

Proprietary Trainer Lock Technology

The most realistic and effective safety system on the market, just insert the locking pin and start learning.

Multiple Size and Finger Configuration

Medium and large sizes, three or four fingers configurations.

MOREX micro adjustable sears

The cleanest and smoothest hook and moon sears on the market

Optional "clicker" Hook!

An innovation pioneered by Stanislawski way back in 2008! This unique system allows you to go from a click or regular style WITHOUT changing your release setting!!!

Available in either a quick .006" or a bit longer .010".... and the size is engraved on them for easy identification!

ErgoFit™ Cross Training Technology

All STAN™ handles have a similar fit and feel.

Fully Adjustable Pulling Post

The final touch on the perfect fit!

Rope or D-Loop

Shoot from a rope (not included) or go directly to the D-Loop

TechNote

ErgoFit™ Technology is the gateway to cross training. Anatomically precise finger holds with declining body thickness result in a fit and feel similarity across our entire line while leaving just enough changes to keep you from anticipating the shot.

Feeling the jitters? Put the SX2 down and pick up a BlackJack. Are gusty winds interfering with your use of a hinge? Put it in your pouch and pull out a trigger or better still an Element resistance activated release. The fit and feel provide you with a familiarity that won't take you out of your groove, yet the different mechanisms are sure to give you a level of control never before possible.

MOREX

Resistance Releases

Element

Launched in 2010, the STAN® Element is a tension release aid that will take your game to the next level the moment you get your hands on it! Consistency yields accuracy and accuracy is the ultimate goal in our sport.

In the past, products in this category have been very inconsistent in terms of how much weight they require to fire. Some were just plain uncomfortable and others had complicated, temperature sensitive, and unreliable hydraulic mechanisms.

Our engineers at STAN® crafted countless prototypes before settling in on precise geometries that blend crisp, smooth function with exceptional user tolerance. The result was STAN's proprietary **SMOK-IN' X** sears which offer an exceptional range of adjustability without requiring the user to change any springs. The result is an ultra consistent, simple, and bullet proof release aid.

Sears are important. After all, they are what makes a release function. But sears alone are nothing unless they are packaged in a comfortable, forgiving handle that fits your hand perfectly. The Element employs STAN's® proprietary ErgoFit™ Technology and MPT² knob system; the result is a handle that melts like butter in your hand.

All told, the result is the most repeatable, adjustable, comfortable, and accurate resistance activated release aid on the market. Call 315.258.9269 now for more information.
