

“We dared to question our own rules, and in the process, discovered a whole new system for superior accuracy and unrivaled feel.”

- Matt McPherson

Get an exclusive look inside the Mathews® test facility and the creation of the NOCAM ST™ Technology in the “FEEL THE FUTURE” film at [mathewsinc.com/NOCAM](http://mathewsinc.com/NOCAM)

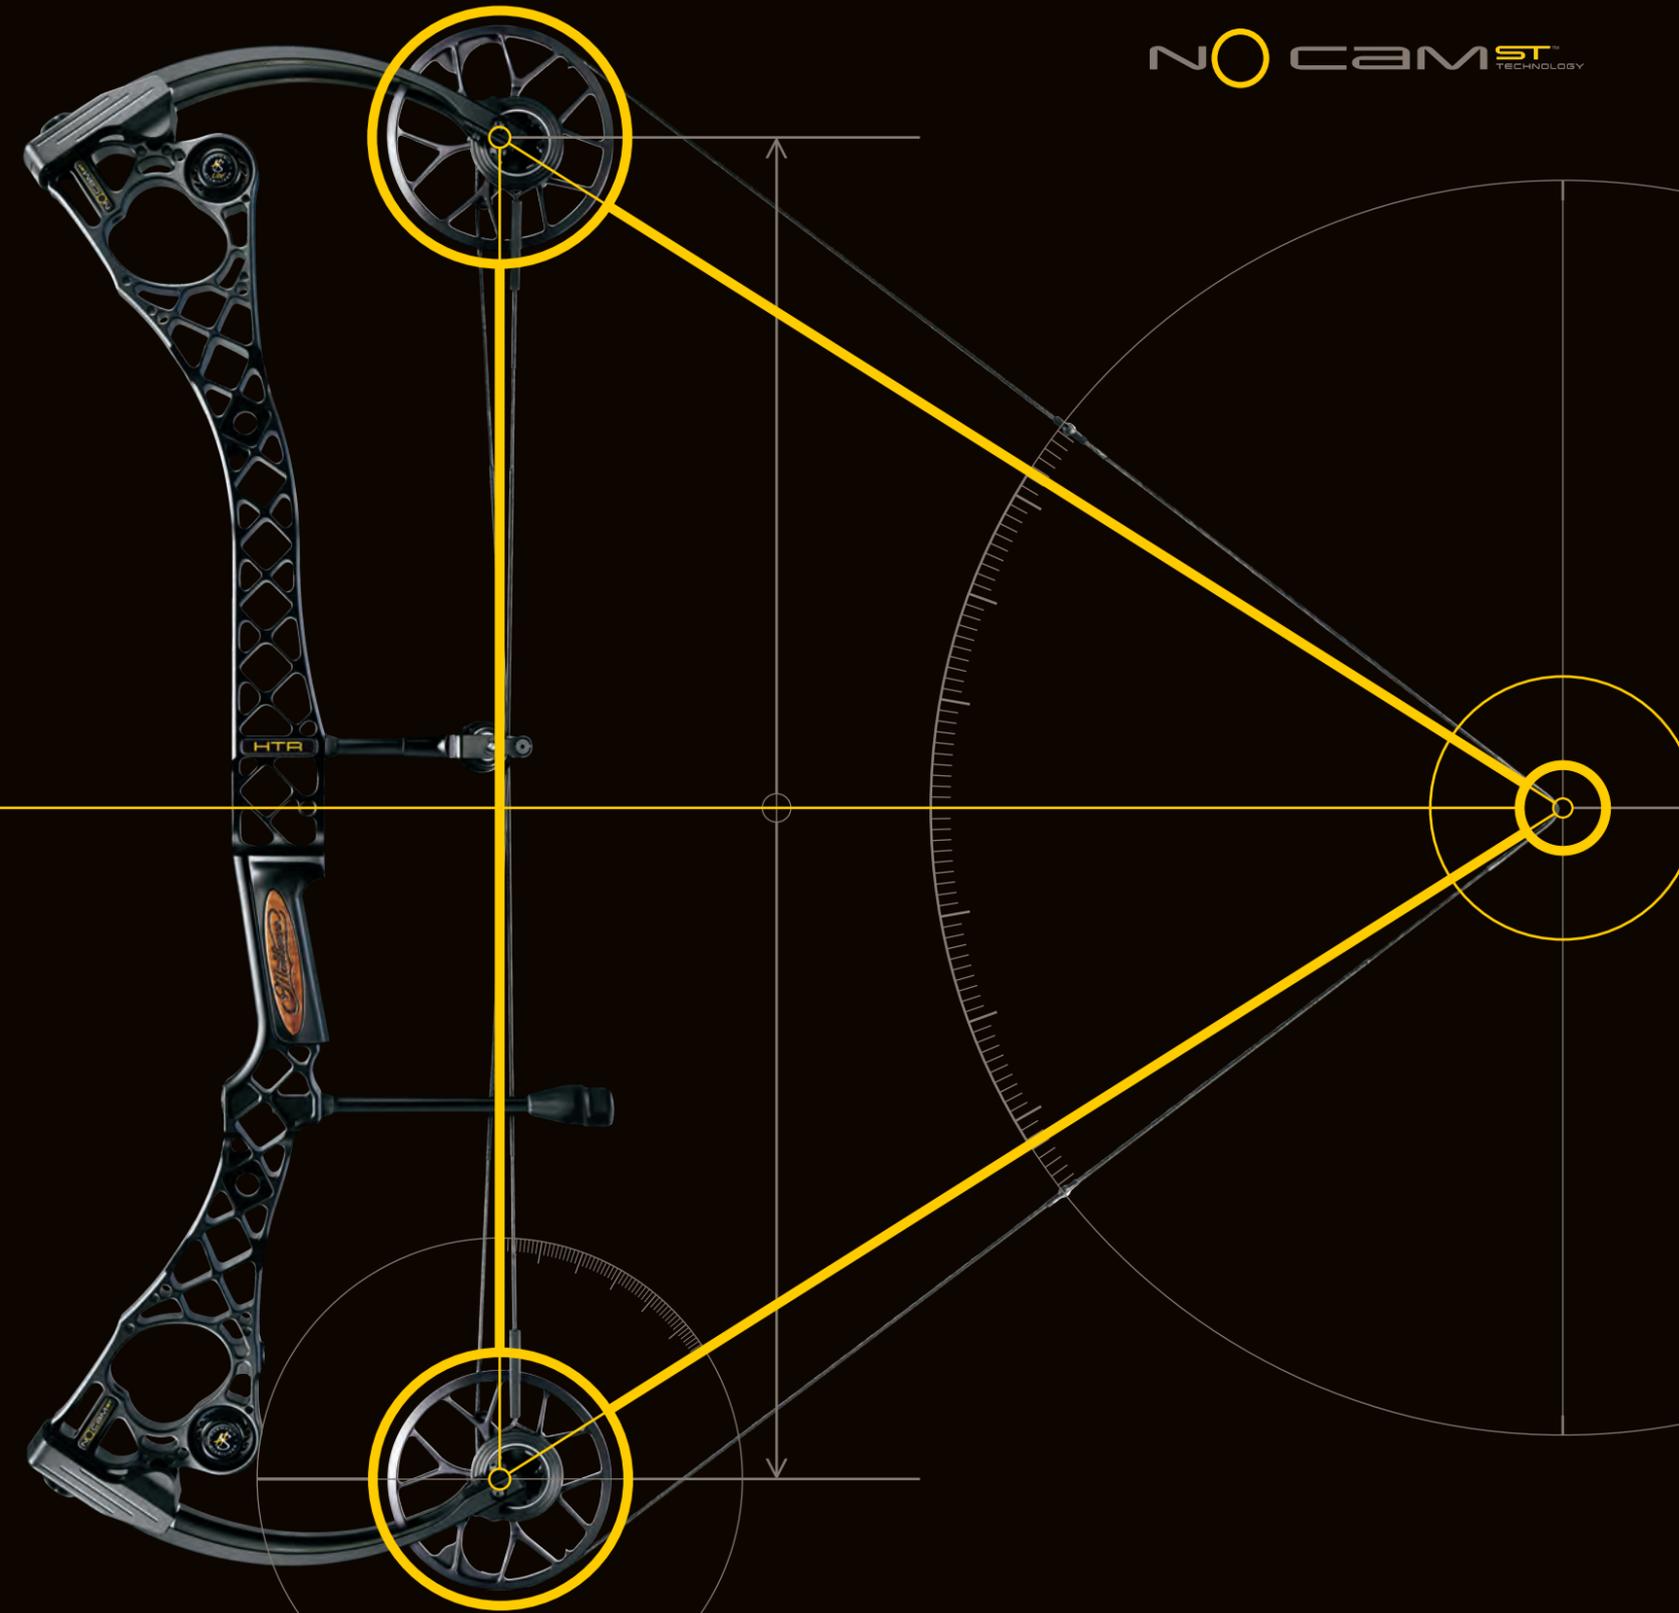

# ACCURACY

N O C A M S T™  
TECHNOLOGY

Our revolutionary **NO CAM ST™** Technology utilizes two circular and concentric string tracks, allowing the string to travel at a constant distance from the center of rotation during the shot cycle. This eliminates the common camming action on both top and bottom string tracks, creating a balanced and synchronized system with straight and level nock travel for superior accuracy.

NO CAM ST™  
TECHNOLOGY

# FEEL

**NO CAM ST™** Technology delivers a radically smooth draw cycle with incredible efficiency. This means that more energy is transferred into the arrow rather than being left in the bow to be experienced as post shot sound and vibration.

TECHNOLOGY

**NO CAM ST™**  
TECHNOLOGY

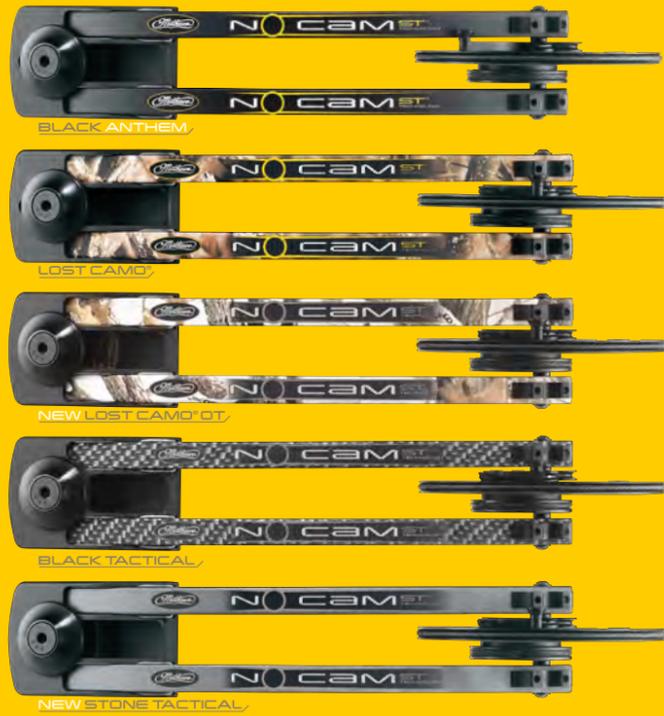

F E E L T H E F U T U R E

The 2015 NO CAM™ HTR is engineered for accuracy and delivers a radically smooth and balanced feel. **NO CAM™ HTR**

# NO CAM™ HTR

The NOCAM ST™ Technology put every other component into question when designing the new NOCAM™ HTR. The result is a truly integrated system featuring shorter, more rigid quad limbs, a less reflexed riser, twin Harmonic Stabilizers™ and our patented Focus Grip™. RockMods™ come standard on the NOCAM™ HTR and are available in 65%, 75% and 85% let-off. (See spec chart on page 19). Choose between five exclusive finishes, including the new Stone Tactical and Lost Camo® OT.

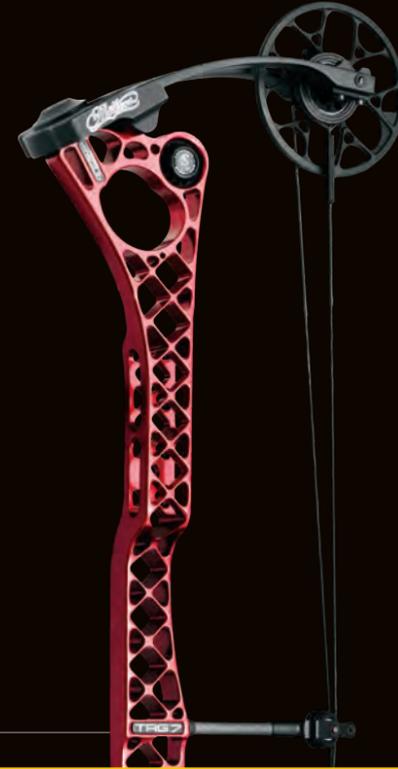

D E S T I N E D F O R G L O R Y

With the perfectly balanced and accurate NO CAM ST™ Technology, the NO CAM™ TRG is sure to carry on the winning tradition of Mathews® compound target bows. **NO CAM™ TRG**

# NO CAM™ TRG

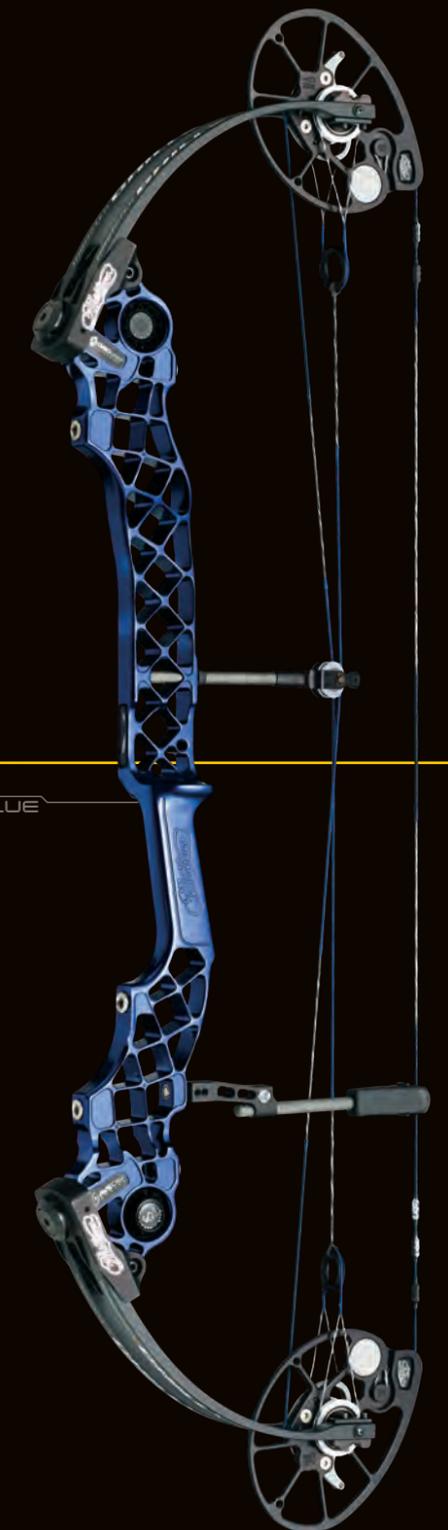

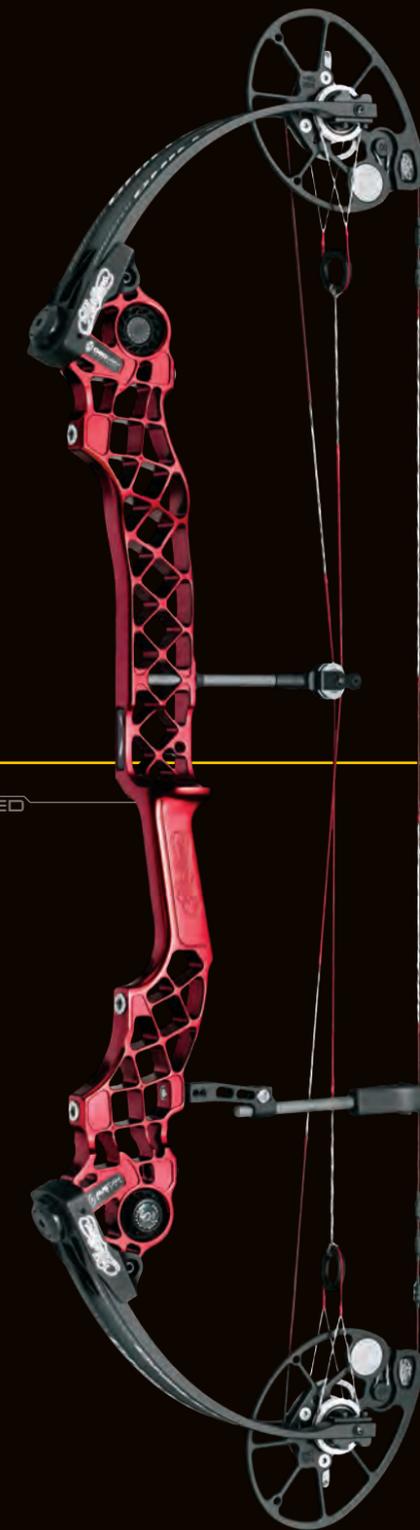

NO CAM ST™ Technology created such a balanced and accurate bow that it drove the design of a new and improved target bow. In addition to the NO CAM ST™ Technology, the new NO CAM™ TRG features a less reflexed riser with new cut-outs for added strength and stability. Twin Harmonic Stabilizers™ are also tuned to the system. It's available in 7, 8 and 9 inch brace heights and four exclusive finishes. RockMods™ provide a solid back wall and further customization in terms of let-off (65% or 75%). With all these options, setting up a bow to fit your own personal preferences has never been easier. (See spec chart on page 19 for details.)

# MONSTER CHILL X PRO™

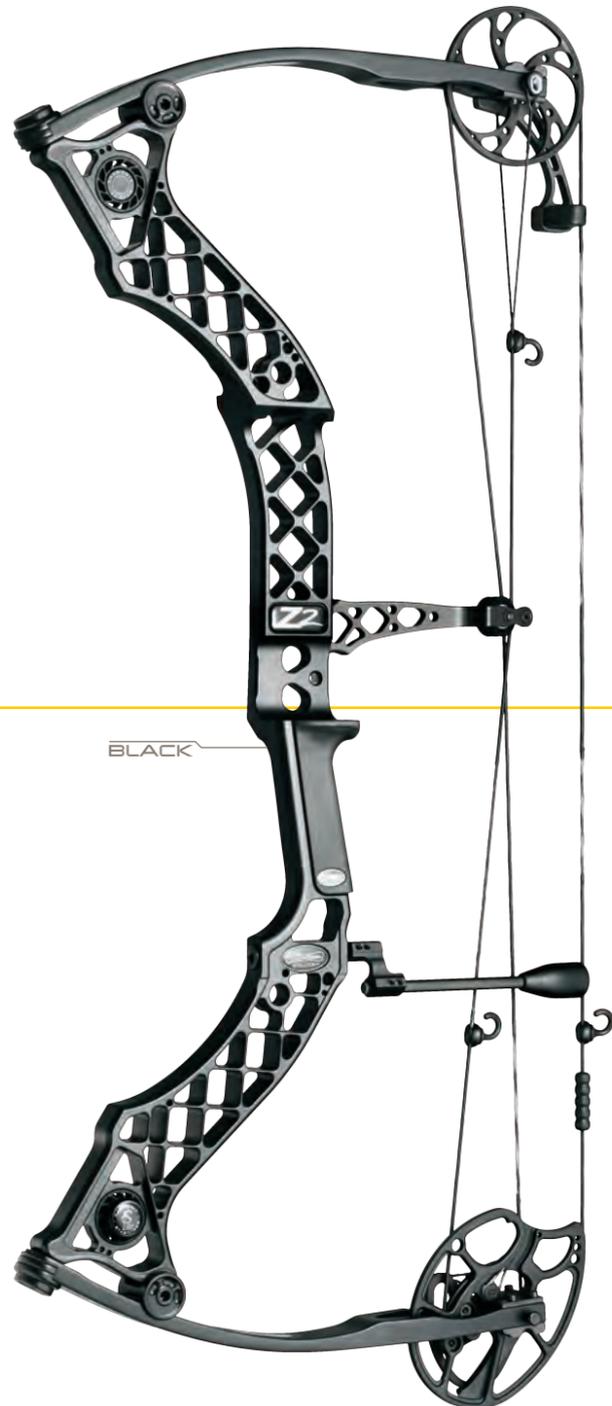

Based on the proven Chill X™ design, the Pro takes this hybrid bow a step further. Now featuring an integral grip that competitive shooters demand along with RockMods™ for a solid back wall and custom let-off, the Chill X™ Pro will be a powerful ally in any competitive shooting arena.

# Z2™

Based on one of our most popular Solocam® bow designs, the new Z2™ is compact, lightweight and agile. It features a Reverse Assist™ Roller Guard for a silky smooth draw, a generous brace height for added forgiveness and speeds up to 330 fps. Now updated with our popular Focus Grip™ and available in our latest concealment pattern, Lost Camo® OT, the Z2™ is an excellent value for bowhunters.
