

INTEGRITY • EXCELLENCE • INNOVATION

Arizona Archery Enterprises

Thank you for your interest in AAE. This is an exciting time to be involved in archery. The growth has been extraordinary, including the youth market which has grown substantially. Archery is a great sport for the younger generation.

I am very proud of AAE and our dedicated team. Great people are the driving force in any progressive company, and I think of us as a family. AAE's team is passionate about archery and what we do—from engineering to production to customer service; we strive to be the best. We take our leadership seriously in this dynamic and changing industry.

Our partners, both manufacturers and shooters, are some of the finest in the industry.

Every year I think archery equipment has evolved to its maximum potential. Every year I am proven wrong. That, combined with the continuous increase in precision of today's archers, results in amazing accuracy. This has put more pressure on manufacturers to produce equipment that exceeds the archers' expectations. AAE strives to do just that. New, innovative products are continually being developed. Every year we make small changes to our existing products where we see an improvement is possible. It may only be adding an engraving mark on one of our rests or slightly changing material in one of our vane lines to improve the toughness, but we never stand still.

Good luck and good shooting!

AAE's Mission: AAE values people, operates with integrity, and strives to exceed our customers' expectations. This is achieved with excellence and innovation in all that we do.

Hot Rodz Target Stabilizers

AAE's Cruiser and Nitrous stabilizers offer benefits and features unlike any other stabilizer on the market. The bars have a small .700" O.D. that is as stiff as the top tournament bars available, and have internal dampening for a smooth shot.

Both models also feature a Hidden Weight System. Each Front Bar comes with a one ounce cap and a 2-ounce internal insert. The standard 1-ounce black cap can hold 2 additional hidden brass weights, for a total of 5-ounces. The optional 4-ounce stainless steel cap increases the front weight capacity to 9 ounces without

changing the O.D. of the bar. This greatly reduces the wind profile of the stabilizer. Back Bars/Side Bars feature a larger diameter weight system incorporating a 6-ounce tapered weight that increases the leverage factor of the weights and maintains a smooth wind profile. Weights are sold separately.

CRUIZER

The **Cruizer** is a very stiff, vibration resistant bar that is a perfect match for the archer wanting a smooth feel. This blend of stiffness and feel is achieved with the bar constructed from a proprietary outer layer of 100% high modulus carbon.

Hidden Weight System (HWS)

Internal 1-oz. brass weights (2 pk.)

Optional 4-oz. Stainless Steel and 1-oz. Aluminum Black Caps

NITROUS

The **Nitrous** is for the archer that wants the ultimate tournament bar. It is constructed from a proprietary blend of ultra stiff high modulus carbon, making it the stiffest and most forgiving of any bar available.

Big Rig

8-oz. Big Rig Cap

WINDBAR

NEW!

The Hot Rodz Wind Bar is made out of AAE's industry leading hi-modulus carbon. It is designed to allow archers the opportunity to greatly minimize the wind profile of the front stabilizer in severe wind while maintaining the maximum MOI (Moments of Inertia) the archer needs to hold in extreme conditions. When properly balanced, the wind bar will not

affect the arrows impact point as a result of the stabilization change from the archers standard front bar to the wind bar. AAE's proprietary Hidden Weight System allows the archer to add or subtract weight without affecting the wind profile of the bar. When every point counts, changing to the Hot Rodz wind bar could make all the difference. Available in Cruiser and Nitrous.

The Hot Rodz Big Rig was created for those archers that use over ten ounces on the front. The Big Rig end cap weighs in at a stout 8-ounces! Combined with the 2-ounce insert in the stabilizer bar, and the ability to add four more ounces internally utilizing AAE's proprietary Hidden Weight System, the archer can reach an amazing 14-ounces up front without compromising the wind profile. The Big Rig can be used on any model Hot Rodz featuring the Hidden Weight System.

Back and Side Bar Weights

Black Target Weights

Stabilizer Specifications

Front bar lengths: 27", 30", 33"

- Front bars come with one 2-oz. Insert Weight and a 1-oz. outer Black Cap that will hold up to 2 additional hidden weights.
- Other HWS components sold separately.

Back Bar/Side Bar lengths: 10", 12", 15"

- Back Bars/Side Bars come with one vibration ball.
- 1-oz., 3-oz., and 6-oz. tapered weights sold separately in Stainless Steel or Black.

Back Bar 6 oz. Tapered Weight

Hot Rodz 3D & Hunting Stabilizers

HTX Hunting Stabilizer

The HTX is the only stabilizer that allows the hunter to adjust the length and balance all in one. It adjusts from 5" to 8" by unscrewing the core and turning it around. Total weight is 8 oz. Available in Black, Lost Camo® and Mixed Pine. Additional Weights available separately: 1 oz. (2 pk.), 3 oz., and 4 oz. tapered weight.

Lost Camo

Black

Mixed Pine

Hot Rodz-HR Sling

The HR Sling is super durable and very easy to adjust. Available in seven colors; Brown Camo, Orange, Black, Green, Blue, Pink, and Red.

Made in USA

Western Hunter Stabilizer

Whether out West chasing high country mulies or in a stand shooting across a corn field at that white tail of a lifetime, you need a bow that is balanced. Most hunting stabilizers provide an adequate amount of front weight but do nothing to counter balance quiver and sight weight. AAE developed the Western Hunter to allow the hunter to balance the bow just like a tournament bow. A balanced bow reduces torque and makes for a more accurate shot. It comes with two carbon rods, 8" and 10", 5 oz. of adjustable weights, one bracket, and two vibration dampening balls. Available in Black, RH/LH. Additional weights sold separately: 1 oz. (2 pk.), 3 oz., and 4 oz. tapered weight.

DOA and ProDrop Compound Fall-Away Rests

Black

PRO DROP

Randy Ulmer

Limb or Cable Activated Fall-Away Rest

The most accurate and stable limb-driven fall-away rest on the market is now the most versatile as well. The new and improved ProDrop can quickly and easily be converted from a limb-activated to a cable-activated fall-away in a matter of minutes. The Pro Drop's stainless steel axle rotates on twin stainless steel sealed ball bearings for the ultimate in accuracy, dependability and longevity. The Launcher Arm stays up longer, increasing the time the arrow is on the rest which leads to more accuracy. The ProDrop also features a

shortened "Drop time," allowing for maximum clearance. The Whale Tale launcher utilizes a proprietary urethane to over mold the ultra-forgiving spring steel launcher. The activation cord is braided stainless steel to minimize stretching. AAE's Limb Sandwich allows for upper or lower limb mounting. The ProDrop is micro-adjustable both horizontally and vertically, making it easy to set-up and tune. Included is our Launch Pad to deaden any arrow or rest noise Available in RH/LH.

Standard Mount: Black, Lost Camo®
Hoyt Tec Mount: Black, Lost Camo®
Mathews Mount: Black, Lost Camo®
Extended Mount: Black
Carbon Mount: Black

Lost Camo

Lost Camo

DOA

Full-Capture Drop-Away Rest

The DOA features a full-capture cage to prevent the arrow from falling off the launcher on a stalk or in a stand/blind. The DOA has twin stainless steel sealed ball bearings to support the stainless steel axle for accuracy and longevity. Our proprietary trigger mechanism includes a nano-second delay, allowing the rest to stay up longer resulting in added accuracy and forgiveness. The DOA does not cycle when the archer lets down to prevent unwanted noise, the arrow falling off the rest, or the need to re-cock the rest in the heat of the moment.

The Launcher arm is flexible for added forgiveness and minimal arrow noise. Installation is quick and easy using the EZ-Clamp, making attachment to the downward traveling cable extremely adjustable. AAE's Launch Pad and custom cut felt are also included. Available in RH/LH.

Standard Mount: Black, Lost Camo®, Pink
Short Brace Mount: Black, Lost Camo
(for short brace height bows)
Mathews Mount: Black, Lost Camo®

Compound Rests

Lightning II

Magnetic Fall-Away Rest

The Lightning II Magnetic Fall-Away rest is an economically priced fall-away rest with great accuracy and durability. The axle rotates on twin ball bearing assemblies for speed and longevity. Magnets increase the downward speed of the whale tail launcher for improved fletching clearance and ease of tuning. Another plus of the magnetic system is a very light tension on the activation cord that attaches to our eZ-Clamp or the down buss cable. Available in black or Lost Camo®. RH/LH.

Hawk Eye

Full-Capture Limb-Driven Fall-Away Rest

The HawkEye is a full-capture, limb-driven, fall-away rest. It features our flexible DOA launcher arm for increased accuracy. It has a dual bushing system with a precision ground axle and sliding launcher system for simple tuning. Included is AAE's limb sandwich and Launchpad for easy set-up and quiet shooting. The adjustable cage provides full arrow containment. A great rest at a great price. Available in Black or Pink. RH/LH.

lil' freakshow

Full-Capture Fall-Away Rest

The lil' freakshow was created to offer the advantages of a full-capture rest with the accuracy of a launcher blade target rest at a price point every parent could afford. The crew at AAE knew that Jesse Broadwater would settle for nothing less than what he knew would help every young aspiring archer achieve their goals.

Since a very young age, Jesse has been setting the standard by which all other archers are measured, beginning when he shot a perfect 560 Hunter round at the Outdoor Nationals as a youth.

The lil' freakshow is the perfect target rest to get your child headed in the right direction. It also features a dual bushing system with a precision ground axle and adjustable launcher for both accuracy and ease of adjustment. The adjustable cage provides full arrow containment for safety. Available in Black or Pink. RH/LH.

Fall-Away Rest Accessories

Launch Pad—deadens the launch impact of all Fall-Away rests, provides security, and helps locate your arrow before draw.

eZ Clamp—installs quickly and securely to your up or down cable with two Plastite® screws to ensure a firm and safe grip on the cord. Unique set screw provides easy timing adjustment.

Universal Limb Sandwich—is easy to install. The unique set screw design allows for easy timing adjustment of all limb driven rests. Fits all bows.

Stinger Release Rest

The Stinger arrow rest is designed to be an economical, precision arrow rest. It features a dual bushing system with precision ground axles and sliding prong system for both accuracy and ease of adjustment. This simple, sturdy rest can also be fitted with optional launchers. RH/LH.

1995, age 11,
after a perfect 560
hunter round.

Compound Target Rests

Jesse Broadwater's

freakshow

The Ultimate in Precision Arrow Rests

Featuring Jesse Broadwater's Mount Design

The freakshow is the toughest, most accurate micro-adjustable target rest on the market today. It utilizes Jesse "The Freak Show" Broadwater's unique torque tuning methodology, and it comes in either an extended or standard mount. AAE's proprietary hex alignment launcher blade system is also featured allowing the archer to change out the blade without having to re-adjust their tune. The launcher arm rotates for the exact blade angle preferred. Laser-etched adjustment lines and oversized lock-down machine screws ensure adjustments are visible and rest is secure. The freakshow comes with three different launcher blades to help the elite target archer adjust for the perfect tune: standard width; .008" and .010" thicknesses and wide width; .012" thickness.

Launcher Styles

There are several launcher styles to help the elite target archer adjust for the perfect tune. All launcher blades are available separately.

- Freak Blade (FITA arrow) width in .008", .010", or .012" thicknesses
- Standard width in .008", .010", or .012" thicknesses
- Wide width in .008", .010", or .012" thicknesses

Standard Short or Extended Mount

This rest is available in two models: the Standard Short Mount or the Extended Mount, which allows the rest to be set in the optimum position for torque tuning.

Jesse Broadwater

Photo: Ben Van der Velde

Jesse "The Freakshow" Broadwater is the most accurate archer in the history of target archery. When it comes to his equipment, he cuts no corners and only shoots the very best available. Pictured after winning the 2013 NFAA Dakota classic.

Compound Target Rests

ProBlade Compound Target Rest

The ProBlade target arrow rest has been designed with the help of some of the top tournament compound shooters in the world. This rest has been built to meet their exacting standards for accuracy, durability, and ease of adjustment. Each Pro Blade has been CNC machined to very high tolerances. We believe our Pro Series frame is the finest platform for a target rest ever produced. Launcher blades included with the ProBlade are the most common sizes and thicknesses used; Standard width in .008" and .010" thicknesses.

Hex Launcher Blade Alignment System

AAE's proprietary hex alignment launcher blade system is also featured allowing the archer to change out the blade without having to re-adjust their tune.

Launcher Blades

Freak Blade

Standard

Wide

The **Freak Blade** was specifically designed through a collaboration of AAE's engineering team and Jesse "The Freakshow" Broadwater. The Freak blade utilizes AAE's proprietary hex cut out for precise launcher blade replacement. This blade is specifically designed for the skinniest of FITA arrows used for outdoor shooting. The arm length, width and depth of the fork cut were tested and evaluated by Jesse and our team resulting in the most accurate launcher blade in the industry.

The **Standard Blade** is the most versatile of all the launcher blades. The width allows for a wide range of arrow sizes while maintaining the fork length and depth of cut this blade has become famous for. This blade also utilizes AAE's proprietary hex cut out for precise launcher blade replacement.

The **Wide Blade** was specifically created for use with large diameter indoor and 3D arrows. The wide blade maintains the proportional fork and depth of cut length while scaling up to support the largest of arrows. This blade also utilizes AAE's proprietary hex cut out for launcher blade replacement.

Adhesives

Max Bond

Max Bond is specifically formulated for our Plastifletch Max and Max Hunter vanes. This glue also works well with Elite Plastifletch and most other plastic vanes. Max Bond is a high-viscosity liquid that is easy to work with and penetrates well when using our tough Elastimax material. Whether you are fletching carbon or aluminum, this is the toughest glue available. Packaged in a .7 oz. (20-gram) or 2.0 oz. (59-gram) bottle.

Max Impact

Max Impact is AAE's superior insert adhesive designed for high impact applications. Max Impact is blended with rubber to increase its ability to withstand and absorb sudden high loads. Works great on inserts. Packaged in a .7 fl. oz. (20-gram) or 2.0 oz. (59-gram) bottle.

Fastset Gel

Fastset Gel is a cyanoacrylate adhesive specially formulated for gluing AAE nocks and Elite Plastifletch to both aluminum and carbon shafts.

Its higher viscosity makes application easier and bonds Plastifletch to the shaft instantly, creating a strong, permanent bond that must be cut to be removed. Available packaged in a 3-gram tube, a 9-gram tube, or a bulk box of 25.

Max Clean Arrow Wipes

NEW!

AAE's Max Clean Arrow Wipes are a quick and easy method of cleaning arrow shafts for proper fletching adhesion. No more spilling liquids or smelly chemicals in your house or shop when prepping arrow for new shaft or re-fletching projects! Max Clean Arrow Wipes can be used on all forms of carbon, aluminum, and crested arrows.

Max Clean Arrow Cleaner

Max Clean is a concentrated, eco-friendly powder that dissolves in water, removes oils, and changes the pH of the surface of the shaft. Each capful will clean about 200 arrows. Works on all types of arrow shafts. Included is enough powder to clean 500 shafts. Available in standard 3-oz. size or 8-oz. bulk that mixes in a large container.

AAE Epoxy

AAE Epoxy is a two-part epoxy for gluing nock and point inserts and all aluminum inserts into aluminum and carbon shafts. It is also an excellent all-purpose epoxy that retains a very flexible bond. The syringe is designed to dispense equal amounts of resin and hardener to maximize strength. Packaged in a 1.7 oz. syringe.

Jason Corley

Jason Corley

all the time

Nocks and Arrow Components

Plastinock

AAE's Plastinocks have a double snap design that gives a positive string fit but allows the arrow to leave the bowstring smoothly. Longer ears and an angled throat design keep the nock on the bowstring at any string angle. Its thin base gives the nock a perfect blend to the arrow shaft. Available in:

- Four sizes: 1/4", 9/32", 5/16", and 11/32"
- Eight colors: White, Black, Red, Blue, Flu. Orange, Flu. Ruby, and Flu. Green
- Packaged in bags of 100 or bulk bags of 1,000

Arizona Z-Nock

The Arizona Z-Nock uses a snap-on design for a positive string fit resulting in a smooth release from the bowstring. The main difference between the Z-Nock and the Plastinock is the Z-Nock's larger finger pinch area, allowing you to nock your arrows quickly and easily. The angled throat design keeps the nock on the bowstring at any string angle, and the thin base blends perfectly to the arrow shaft. Available in:

- Four sizes: 1/4", 9/32", 5/16", and 11/32"
- Eight colors: Flu. Green, Flu. Ruby, Flu. Orange, Blue, Red, Black, and White
- Packaged in bags of 100 or bulk bags of 1,000

Fiberglass Nocks

The Fiberglass Nock is designed for entry level fiberglass arrows. Available in:

- One size to fit 17/64" shaft diameter
- Colors: Green or Orange
- Packaged in bags of 100 or bulk bags of 1,000

Moon Drivers

Moon Driver plugs are for crossbow bolts. Moon drivers have a half-moon shape for string engagement, and are made by high-tolerance injection molding. Available in:

- Moon Driver sizes: 2117, 2216, and 2219
- Color: Green
- Packaged in bags of 100 or bulk bags of 1,000

Max Stealth • Max Hunter • Pro Max • Plastifletch Max

MAX STEALTH

Note: All vanes printed with the Hoyt logo are only available to Hoyt approved dealers.

NEW!

AAE's new MAX Stealth vane offers the whisper quiet shape of our 2.6" Elite Plastifletch vane with the durability and flexibility of our proprietary MAX material. The MAX Stealth also features the ultra stable, air channeling "ribbed" design the MAX line is famous for. This combination results in an extremely quiet and accurate vane that every archer and crossbow hunter will appreciate.

One size: 2.7", .50" high. Available in eight colors: Bright Green, Hot Pink, Fire Orange, Sunset Gold, Black, Yellow, Blue, and White. Packaged in display packs of 100 or boxes of 500 bulk.

MAX HUNTER

AAE's Superior Broadhead Vane

If the vane has Max in the name, use Max Bond glue.

Max Hunter is unlike any other high-profile, 2" vane on the market. It is made of a unique proprietary material that is not only extremely durable, but soft and flexible, allowing a high degree of helical, or fletching wrap, around the smallest-diameter shafts. The vane also offers exceptional bonding capability (when used with our Max Bond glue) and a unique rib design that channels air for increased flight stability and accuracy. It is the ultimate broadhead vane for serious performance and ease of use.

One size: 2.10" long × .580" high. Available in eight colors: Bright Green, Hot Pink, Fire Orange, Sunset Gold, Black, Yellow, Blue, and White. Packaged in display packs of 100 or boxes of 500.

AAE PRO MAX

AAE's Pro Max vane is a 1.7" long × .460" high profile vane designed to be the perfect size for 3D and mechanical broadheads. We used the superior design of our Max Hunter vane, scaled down for improved bow clearance. Made from our super tough Max material for durability. As with all AAE vanes, Pro MAX vanes have a primer/activator applied during manufacturing for the best arrow adhesion. Available in eight colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Sunset Gold, White, and Yellow. Packaged in display packs of 100, and boxes of 500.

Plastifletch Max

Plastifletch Max has a perfect width base for great adhesion and proper shaft fit. It's designed with a thinner (.018") section to keep it light and flexible. The first vertical section of the vane is thicker for added vane stiffness and durability. Ribs channel the air vortex, making the vane control the arrow more efficiently. "Elastimax" material surpasses all other vanes with its toughness, durability, and adhesion. The Plastifletch Max 2.0 shield-shaped vane adds another size for archers who want a 2" low profile vane.

Available in two sizes: PM-16, PM-2.0 Shield.

Eight colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Sunset Gold, White, and Yellow.

Packaged in boxes of 500, and display packs of 100.

Take it to the MAX

WAV • Elite Plastifletch • Quickfletch

AAE's WAV vane is the most accurate and toughest vane for the world class recurve archer. It is designed to be used with any fletching jig, and will stay on your arrow shaft shot after shot. Low profile for riser clearance, ultra thin (.010/.3mm) and very durable. The WAV vane is winning tournaments and world championships.

Available in eight colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Sunset Gold, White, and Yellow. Packaged in display packs of 50 and boxes of 500.

Jake Kaminski

Photo: Ben Van der Velde

Elite Plastifletch

Elite Plastifletch is made from a special proprietary blend of materials that gives it great memory, durability, and instant adhesion. The concave base has an applied activator to improve adhesion and speed arrow assembly.

Tough material, vane to vane consistency and bright colors has made Elite Plastifletch the most widely used vane in the world. Available in five sizes: EP-16, EP-23, EP-26, EP-40, and EP-50. Ten colors: Black, Blue, Bright Green,

Fire Orange, Hot Pink, Purple, Red, Sunset Gold, White, and Yellow. Packaged in boxes of 500, bags of 100. Also packaged in bags of 50 with a 3 gram tube of Fastset Gel.

Max Hunter QuikFletch®

Professionally fletch/crest six arrows in less than five minutes! Max Hunter QuikFletch® will shrink to fit any size carbon or aluminum arrow shaft. Guaranteed not to slip. Choose from AAE's

Max Hunter QuikFletch® in Bright Green and Black, Yellow and Hot Pink, or Fire Orange and White. Max Hunter QuikFletch® is the quickest and easiest way to fletch your arrows. Packaged in a six pack or bulk 25 pack.

AAE is very proud to be teaming up with technical expert John Dudley from "Nock-On TV." Now you can get the same vanes that John has proven as the most accurate on the market for his tournament archery and hunting. Elite Plastifletch 26,

Max Hunter, and Plastifletch Max 2.0 printed with the "Nock-On" signature logo. Available in Bright Green, Fire Orange, Hot Pink, White, and Yellow (40 pk.). "Nock-On" Max Hunter-QuikFletch® available in Bright Green (6 pk. or 25 bulk).

KSL GOLD Finger Tab

Designed by Coach Kisik Lee with an adjustable, ergonomically designed palm plate.

AAE's cutting-edge design of the KSL Gold Tab represents a breakthrough in ergonomics, comfort, and feedback. Every curve, part, and edge has been ergonomically designed to conform to the contours of the shooting hand while prompting correct technique and providing a secure fit. The KSL Gold Tab fits like a glove every time. The leather face and backing on the KSL tabs are replaceable. It features our custom made elastic finger strap for more comfort. The KSL tab plate comes in either brass or anodized aluminum. The brass will give the archer the added weight in the release hand for extra stability. The Palm Plate is made from a hard composite material allowing for increased adjustability to find the precise feel

GOLD Aiming Aperture

The Gold Aiming Aperture has an .019"/.5mm super bright fiber optic aiming dot. The small aperture results in a more precise aiming window down range. The thread attachment is an 8-32 thread. Orange, Blue and Green fibers are included.

GOLD Micro Plunger

**NEW
CARBON
STEM!**

Available in red, silver, blue, and black.

Jake Kaminski at the AAE AZ Cup

The Gold Micro Plunger has been designed for the most discriminating archers. Incorporated in the design are several features and improvements that will help you adjust your plunger to achieve the arrow flight and accuracy you need for world class performance. With the help of Olympic Silver Medalist Jake Kaminski, AAE has created a new ultra-light weight carbon stem that reacts faster than any plunger ever made. Combined with our Signature Teflon® sleeved stainless steel barrel, accuracy gains are unparalleled. AAE and Jake have also developed a new stem tip using aerospace materials that lasts incredibly long while not damaging carbon or aluminum arrows. Available in Black, Red, Silver, or Blue.

GOLD Micro-Clicker

AAE's Gold Micro-Clicker is the only micro-adjustable clicker made. The Micro-Clicker is designed to give all recurve archers a precision draw length adjustment. The Gold Micro-Clicker allows you to make precise adjustments while shooting and is fully adjustable to fit different bow and arrow lengths. Each click is .005" per click. It mounts under the sight and is slotted for easy adjustment. The Gold Micro-Clicker blades are made of nickel plated spring steel. Available in RH/LH.

Recurve Rests

Free Flyte™ Elite

The Free Flyte™ Elite is a CNC machined version of our popular Free Flyte™ arrow rest. This rest can be mounted with the conventional side plate or the riser can be drilled and tapped for ultimate stability. The dual magnet system allows for both inward and outward movement of the arrow support arm. There are two positive locking vertical and horizontal adjustments that allow each archer to set up this rest to fit any bow and make quick, positive changes for each set-up and arrow diameter. This is the ultimate finger style rest for the serious target archer or hunter. The Free Flyte™ Elite rest must be used with a plunger. We recommend using either the Master Plunger or our Gold Plunger for an unbeatable combination. Patent No. 5,503,136. Available in Black. RH/LH.

Free Flyte™

The Free Flyte™ is two rests in one! Position the magnet one way and the arrow support arm becomes a flipper style rest. Reverse the magnet and the support arm folds away upon release for perfect clearance. Ideal for hunting, target, and 3-D shooting, the Free Flyte™ can be used for either release or finger shooters. Patent No. 5,503,136. RH/LH.

Free Flyte™ Micro

The Free Flyte™ Micro is an upgrade of our popular Free Flyte™ rest. We have added a very simple horizontal micro-adjustment and positive lock. This handy adjustment is especially helpful to the target shooters trying to super tune their equipment, or the bowhunter looking for perfect broadhead flight. Patent No. 5,503,136.

Champion II

The Champion II rest is designed for elite finger shooters. This rest fits on the inside of the sight window, eliminating the need for screws or bolts. The opposing magnets give a very light tension on the arrow support arm similar to our Free Flyte™ and Free Flyte™ Elite rests. This simple and totally adjustable rest is easy to set up and tune, yet provides the same time-tested accuracy as our other finger shooter rests. RH/LH.

NEW!

Super Flyte™

This unique rest has a versatile mounting bracket for easy installation, an adjustable hex rod for deep center cut bows, and a removable spine point for use without a plunger. The arrow cage has been added as a safety feature for the beginning or young finger shooters, allowing the arrow to stay contained if it happens to fall off the support arm during the draw or shot. This is the perfect rest to put on your training bows in church camps and youth clubs. In addition, this reliable rest has a replaceable support arm for quick changes in the field. RH/LH.

Super T-300™ Hunter

Black Lexan® backed with self adhesive foam tape. Stainless steel spine point, plus Teflon®-coated replaceable support arm.

Super T-300™ Target

White Lexan® backed with self adhesive foam tape. Stainless steel cover plate, plus replaceable support arm.

T-300™ Hunter

Silver metal backed with self adhesive foam tape. Teflon®-coated replaceable support arm.

T-300™ Target

Silver metal backed with self adhesive foam tape. Has a replaceable support arm.

Tabs and Accessories

Elite Adjustable Finger Spacer Kit

AAE's Adjustable Finger Spacer will adjust in thickness from .400" to .600" with a soft cushion rubber external surface that allows you to shoot comfortably all day long. The Adjustable Finger Spacer fits AAE's Elite Tab. Black or Pink.

SMALL MEDIUM

SMALL MEDIUM

TWO FINGER UNDER

Elite Finger Tab

The Elite Tab is used by most top competitors due to its versatile arrangement. Its anodized aluminum plate and completely adjustable ledge are enhanced by the unique features of replaceable faces and backing. The Elite Tab comes with the original Elite Tab Ledge & Elite Tab Finger Spacer. Available in Super Leather or Hair. Sizes: Small, medium, large, or extra-large. Plate colors: Black or Pink. RH/LH

Super Sling

This durable finger sling is made with soft nylon and flexible vinyl components for an accurate fit. One size fits all. Available in Black, Blue, Red, White, and Yellow.

Student Tab

AAE's two and three finger under tab was designed especially for students who want to take their archery shooting seriously. The plate is made from a lightweight material and uses our Super Leather face. This affordable tab is made for shooting light poundage bows and is made for either the right or left handed shooter. Both Two and Three Finger Under tabs are available in Small & Medium sizes. Blue, Green, and Pink come in small, and Orange and Yellow in medium.

Jay Donahue in the AAE Booth at IBO World

J-Bar™

Designed by top competitors, the solid, one-piece anodized aluminum J-Bar™ is ideal for compound or recurve shooters. It comes with a stainless steel adapter bolt and choice of flat or 17° angle. Available in Black.

Arm Guard

The AAE Arm Guard is designed for the elite target shooter. It is a very thin, very tough arm guard that is contoured to fit snug and secure. This guard gives maximum protection and maximum string clearance and is vented for hot days on the shooting line. Available in Black, Blue, Hot Pink, Orange, Red, White, and Yellow to coordinate with your equipment or clothing.

Stable Lock/ Quick Detach

The Stable Lock is a quick detach system for your stabilizer. It's very easy to use. Just one quick twist and it's off. Made of anodized aluminum. Available in Black.

Plungers and Clickers

Master Plunger

A stainless steel barrel with smooth action Teflon® sleeve enhances this superb plunger. A replaceable tip and two sizes of tapered springs contribute to the finest micro-tune possible. Available in Black, Blue, Pink, Red, and Silver.

Long Master Plunger

This long variation stainless steel barrel with smooth action Teflon® sleeve is specifically designed for deep center shot bows. A replaceable tip and two sizes of tapered springs contribute to the finest of micro-tunes. Available in Black, Blue, Pink, Red, and Silver.

Master Lok Plunger

Specifically designed for wrap-around rests, the extra long and heavy stainless steel barrel with smooth action Teflon® sleeve makes this our most versatile plunger. Two sizes of tapered springs are included for accurate tuning. Available in Black only.

Master Plunger Colors

Available in Black, Blue, Pink, Red, and Silver. *Master Plungers are not designed for wrap around rests.*

Adjustable Magnetic Clicker

The Adjustable Magnetic Clicker fits under the sight mounting block and is easily adjustable for arrow length or clicker positioning. The dual magnet system provides a positive sound and feel unlike any other clicker. The lower positioning of the clicker rod reduces visual interference with the sight at longer distances.

Extended Clicker

The non-slip Extended Clicker design features a solid, one-piece mounting bracket noted for its ease of adjustment. It also incorporates three magnets; one in the rod holder, one in the channel and the third at the bottom of the striker rod. Working together they help eliminate bounce-back and vibration after the shot. Black and Pink.

Magnetic Clicker

The Magnetic Clicker incorporates our dual magnet system into a clicker designed for the target or IBO shooter using light weight carbon or aluminum arrows. Very light side pressure against the arrow, plus a positive sound and feel, make this clicker unique. The clicker mounting plate fits under the sight block. The clicker wire can be bent and adjusted to fit all bows. The clicker can also be reversed for compound shooters using a long overdraw.

Lube Tube

AAE's Lube Tube makes pulling arrows out of any target easier than ever. Just push the arrow

point through the cap to lube. The no-odor lube will not affect arrow flight. The container is reusable with refill lube available separately. Available in black only.

Technical Bowhunting

Technical Bowhunting was written to change the way you think about shooting a bow, choosing equipment,

setting up gear, making tough shots in the field, and dealing with buck fever and target panic by delivering powerful advice and anecdotes. The book includes tips to help unlock your skill and potential as an effective archer and bowhunter.

Written by expert bowhunter Joe Bell, technical archery writer and longtime editor of *Bow & Arrow Hunting Magazine*, includes interviews and tips from some of the sport's greatest pros, including Chuck Adams, and Randy Ulmer.

Fletch III

Fletch III makes fletching simple. It is easy-to-use, accurate, portable, and affordable. Build identical arrows every time!

The Fletch III by AAE is an arrow fletching tool designed for archers and bowhunters who want simplicity and accuracy at an affordable price.

Fletch III features a fixed 1-degree offset and fits arrows .240" to .370" in diameter (ACC diameter to 25 aluminum diameter).

Each component is specifically designed from materials that enhance that component's function. For example, glue won't stick to the clamp because it is made of a highly rigid material containing Teflon® and silicone.

The X-Stand/Arrow Holder is designed for different sizes of arrow shafts. It is labeled "L" (large diameter) and "S" (small diameter) indicating which side of the stand to use.

Mag-Clip

The Mag-Clip is a handy, two section key chain system with strong magnetic fasteners. This accessory is useful for keeping archery accessories attached to you or your side quiver. Works great with arrow grippers, as a key chain, or for many hunting accessories. Packaged individually in eight colors: Red, Black, Blue, Bright Green, Dark Green, Orange, Pink, and Yellow. Or by the bucket—25 Mag-Clips per bucket in assorted colors. Mag-Clips can be custom imprinted with your company's logo. Contact AAE for more information.

Pro String Server

The Pro String Server features a heavy-duty anodized aluminum body

and a unique double-bar tension system. The self-centering washers contribute to even tension when serving.

The replaceable, no-fray thread guide not only simplifies the threading process, but increases the smoothness of the serving process. This tool will produce the finest serving you have ever had.

The Original

Gorilla Grip Arrow Puller

The Gorilla Grip is a must have for any 3D shooter. The Gorilla Grip is made of solid natural rubber for superior grip on all types of arrows and it's the easiest and most comfortable puller on the market. Its large diameter has been designed for maximum grip strength. Available standard with a spring clip or Elite with our Mag-Clip.

NEW COLORS!

Slippery Slide Guide

The Slippery Slide Cable Guide incorporates a tough Teflon®-filled material along with an innovative design that allows for attachment of the activation cord from any fall-away rest. The set screw secures the activation cord and allows for tuning the rest in minutes. Black, Grey, Green, Pink, Red, Orange, Blue, and White.

Arrow Straightener

AAE's Arrow Straightener is an extremely strong and rugged precision instrument made from hard anodized aluminum. The .0005" indicator allows a person to straighten an arrow to the tightest of factory standards.

Completely adjustable precision bearings enable the very tips of the shaft to be straightened. The Delrin® straightening pad will

not mark or dent the arrow. This tool will pay for itself after straightening a few dozen arrows.
