2016 CATALOG

YOU MAY NOT KNOW WHAT IT MEANS, BUT YOUR BOW DOES.

It's about achieving peak performance from your archery equipment, whether your sights are set on a 3D target at the local range or a trophy whitetail in the heart of the Midwest.

Peak performance that can only be gained through better balance, increased stability, less torque and reduced vibration.

Peak performance that breeds consistency and ultimately greater shooting confidence.

Bee Stinger Stabilizers are engineered to deliver the advantages your bow needs to achieve its peak performance- to achieve its **MAXIMUM MOMENT OF INERTIA.**

HUNTING STABILIZERS

GIVING YOU THE CONFIDENCE TO CONNECT

You've practiced, you've prepared - you're ready. And with a Bee Stinger hunting stabilizer, you know your bow is ready too. Featuring machined aluminum end caps, stainless steel weights, Ultra Stiff 100% Carbon Rod, and Sims Internal Dampers your Bee Stinger is engineered to help you acquire targets faster, hold steadier, diminish torque, reduce vibration and finish on target. Now, you know you can make the shot because you know you've got a Bee Stinger.

SPORT HUNTER XTREME

TAKE YOUR NEXT SHOT TO THE XTREME

This season, take your shooting to the Xtreme! The Sport Hunter Xtreme was engineered to help provide superior stabilization while conquering shot-induced vibration, resulting in the ultimate hunting stabilizer. The Sims Internal Damper and De-resonator combine to effectively minimize vibration transferred from the riser to the stabilizer upon release of the arrow. The individual 1 oz. end-weights allow users to customize their stabilizer to meet the ideal balance requirements of their particular hunting bow. Together, it equals added confidence to make your shot of a lifetime.

PRO HUNTER MAXX

BALANCED UNDER PRESSURE

When you're ready to draw back on that trophy of a lifetime, the last thing you need is a wandering pin. The Pro Hunter MAXX is engineered to keep you steady under pressure while reducing vibration. Its patented design delivers maximum moment of inertia, providing greater shot control and the confidence you need to drive your arrow home. The Pro Hunter MAXX features three independently removable end weights for customized balance and performance. Sims Internal Damper and De-Resonator perform double-duty on shot-induced vibration, assuring ultimate control before, during and after the shot.

SPORT HUNTER XTREME SYSTEM

TOURNAMENT PROVEN, HUNTER APPROVED

For years, world-class target archers have known the benefits of combining front and back bar stabilizers for superior balance and shot control. Now, Bee Stinger brings this same stabilization strategy to the hunting world with the Sport Hunter Xtreme System. The system features a longer front SHX stabilizer, a shorter back SHX stabilizer, both mounted to the NEW Elite side arm for maximum adjustability. Together, the SHX System provides maximum balance and stabilization, assuring maximum moment of inertia. Feel the difference in your hand and with regular use, shot groupings will tighten at extended distances.

TARGET STABILIZERS

WHERE CONSISTENCY LEADS TO SUCCESS

Human error — it can mean the difference between standing at the top of the podium or the bottom; winning gold or silver — and for the Pros, it's the difference between making a living or simply earning enough for gas money home. A light torque of the bow, a little shake in the sight picture — turns a 12 into a 10. That's why the World's leading target archers depend on Bee Stinger target stabilizers to help tame human error.

Shot after shot, Bee Stinger target stabilizers provide the superior balance and rock-solid stability needed to acquire targets faster, hold steadier, and deliver repetitive performance. Technically speaking, Bee Stinger target stabilizers work to neutralize the negative effects of human error and allow the bow to achieve the "maximum moment of inertia" — the closest point of perfection for the bow as the arrow is released.

But what does it all REALLY mean? **CONSISTENCY**. Because within the realm of archery, consistency doesn't just win the day — it rules the world.

PREMIER PLUS

MATCH GRADE PERFORMANCE

The tournament-proven success of the Premier Plus Series is a testament to quality construction. Built with a proprietary high modulus carbon, Premier Plus stabilizers provide extreme rigidity for maximum stabilization. Each Premier Plus target stabilizer includes independent weights for customized balance. Experience greater down-range accuracy and more consistent overall shooting with the Premier Plus. The choice of World Champions, Premier Plus target stabilizers deliver “match grade” performance.

INCLUDED WITH THE 20" WIND BAR:

- (6) INDEPENDENT 1 OZ. WEIGHTS

INCLUDED WITH THE 24", 27", 30", 33", 36" STABILIZERS:

V-BAR THEORY OF USES

V-Bar, side-rod or back-bar...no matter what you call them, they are an essential tool to achieve optimum stabilization. Using the same carbon technology as our front stabilizers, Bee Stinger cuts no corners when it comes to materials. To off-set counter forces and maximize stabilization, put as much or as little end weight as desired. Create a symmetrical or one side counter balance, our accessories give you numerous options.

MOUNTING HARDWARE

QUICK DISCONNECTS:

The Bee Stinger Quick Disconnects allow archers the ability to quickly and conveniently remove the stabilizers as needed while providing the most rigid coupling to the bow. This maximizes the bar's effectiveness by eliminating a weak point in the stabilization system. Replacement pins available for all Quick Disconnects and brackets.

V-BAR BLOCK MOUNTS:

The V-bar block mounts allow archers to run either 1 or 2 V-bars off the bow. Adjustable V-bar block mounts also provide adjustment for up/down or in/out positioning for customized balance and stabilization. Machined teeth on all adjustable models assure a tight fit and no slip.

ELITE SERIES: The ELITE SERIES V-bar mounts feature integrated Quick Disconnects for the front stabilizer and rear V-bars. Strong, simple, less weight and easily disassembled for transport.

CUSTOM ACCESSORIES

DE-RESONATORS: LIMBSAVER

The De-Resonator allows archers to cancel much of the resonant vibration that occur in some bow set-ups. Simply move the De-Resonator up or down the stabilizer bar to the desired location.

ENHANCERS: LIMBSAVER

The Enhancer is used on the end of the front bar to offer vibration Damping as well as a soft feel when placing the bar on the ground.

FREESTYLE COLOR KIT:

Take your stabilizer system to the next level with a custom color matched accessory kit.

STABILIZER EXTENSIONS:

When you need a little "extra," the Bee Stinger™ stabilizer extensions provide the option to lengthen your existing stabilizer for further customization.
