

ELITE™

THE WORLD'S MOST SHOOTABLE BOW

2015

ELITE

THE WORLD'S MOST "SHOOTABLE" BOW!

THANKS TO AN EXCEPTIONALLY EFFICIENT TWO-TRACK CAM SYSTEM, ELITE HAS BEEN ABLE TO FOCUS ON BOW "SHOOTABILITY" WHILE OTHER BOW MAKERS SACRIFICE SUCH TO CHASE SPEED. IF TOURNAMENT CHAMPION/ EXPERIENCED HUNTER, LEVI MORGAN WAS "BLOWN AWAY" BY THE SHOOTABILITY OF AN ELITE BOW, IMAGINE HOW IT WILL FEEL TO YOU!

1. LATER TO PEAK

As you begin to draw, you'll notice an ELITE bow eases you up to peak weight. Spreading the required effort makes drawing easier, especially in cold weather after hours on stand!

2. LESS TIME AT PEAK WEIGHT

ELITE also lets you "off the hook" sooner, which means you spend considerably less time at peak weight during the draw cycle.

3. SOLID BACK WALL

With draw stops both top and bottom that stop on the limb, you get consistent draw length and a hard, solid back wall. This means enhanced repeatability and consistency.

4. LESS HOLDING WEIGHT

High let-off means extreme comfort at full draw. It means a steadier aim. It means being able to hold longer, without letting down.

5. HUGE "DWELL ZONE"

ELITE bows also feature a huge "dwell zone" (the amount of creep allowed before the bow wants to jump out of your hand). This allows you to hold longer and focus on aiming without fighting a jumpy cam.

6. "NOTHING TO IT" SHOOTING

Best of all, at release you'll hardly feel a thing. It's amazing! But, don't just take our word for it; shoot an ELITE and experience "Nothing To It" shooting for yourself!

DRAW CYCLE COMPARISON

In their collective quest for speed, bow makers have seemingly forgotten about the importance of the shooting experience. Not ELITE. Visit your local ELITE dealer and shoot an ELITE bow against the others. You'll quickly find out what we mean by "shootability"!

ELITE Archery's exclusive, new Pro Kote™ protective finish is a special blend of proprietary composites, pigments, agents, and modifiers that yield a high-density, ultra-durable, extremely chip-resistant coating with anti-friction properties. Unlike other metal finishing options, Pro Kote™ performance finish is corrosion resistant, stands up to long-term abuse, resists UV damage and will not fade or chalk even after extended use, extreme weather conditions, or prolonged UV exposure.

In turn, this ultra-premium, non-reflective, matte coating provides significant benefits over industry standard metal treatments such as traditional powder coat and aluminum anodize and is designed to maintain tight tolerances, resist scratching and eliminate chips.

For 2015, every ELITE bow's cams, modules, cable rod and limb pockets will be treated with Pro Kote™ protective finishes in a true match to our time-honored Patriot Brown or Sniper Gray components. As a compliment to its durability, Pro Kote's matte finish is bowhunter friendly; absorbs light and is non-reflective, so there's no need to worry about reflective components spooking game.

WINNER'S CHOICE

The World's most advanced and reliable bowstrings

Winner's Choice is the recognized leader in bowstring technology. That's why they're standard equipment on every ELITE bow! All ELITE bows come standard with Winner's Choice bowstrings made of BCY-X, the very latest ultra-high-performance bowstring material. The new BCY-X bowstring material is a patented construction blended with 83% SK90 Dyneema® and 17% Vectran®. BCY-X provides the ultimate combination of stability, great arrow speed and abrasion resistance with no creep and minimal fuzziness! Once again, ELITE stays ahead of the curve when it comes to innovation and premium high-performance componentry.

SHOOTABILITY

10 THINGS YOU'LL LOVE ABOUT AN ELITE™ BOW

Shootability is what separates an ELITE bow from all others. It is the result of constant INNOVATION, exquisite fit and finish, proven technology, and components made by recognized LEADERS in their field. Here are 10 things you'll love about an ELITE bow that, together, make ELITE the world's most SHOOTABLE bow!

1. The Riser Cage™ increases riser strength (30%) and stiffness (19%), reduces vibration

You'll immediately notice the distinctive cage-like structure on each ELITE riser. This sophisticated configuration dramatically enhances overall riser integrity and performance. Riser strength is increased by a whopping 30%. Riser rigidity is increased a significant 19%. The end result is more accurate shooting as well as reduced vibration or buzz. And, all of this with no added weight!

2. Two-track cam system reduces cam lean

ELITE's two-track cam configuration provides one track for the string and another for both cables. Because this structure is inherently narrower, it brings the cable load closer to center, reducing the opportunity for cam lean.

3. Linked cams – it's all about available power

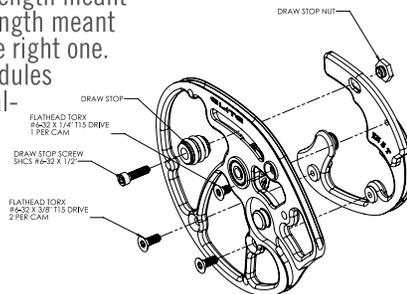

Unlike the two-cam systems of yesteryear in which the cams rotated independently, the two cams on an ELITE bow are "linked" to each other. This ensures synchronization. The two-track cam system is different because the two cams are linked, which contributes to the power stroke and results in more available power.

4. Symmetrical cams mean straight and level nock travel

Symmetrical cam design, where cams are identical in shape and weight, means that once tuned, an ELITE bow will give you straight and level nock travel. That's vital for long-range fixed-blade broadhead flight or consistent accuracy in competition.

5. Patented module system offers quick draw-length change, consistent efficiency among draw lengths

It used to be, optimal cam performance at every draw length meant building draw-length-specific cams. Changing draw length meant changing out cams, assuming your dealer even had the right one. Of course, this took time and had associated costs. Modules offered quick draw-length change, but they were typically designed to reach peak performance only at popular draw lengths. This meant that if you had a shorter draw length you paid a steep price in lost efficiency, and lost fps – up to 15 feet! ELITE's patented module, designed specifically for a two-track cam system, offers quick draw-length change and maximum efficiency performance at each and every draw length.

6. Three-layer laminated limbs are reliable, repeatable and consistent

Thin and/or split limbs are fashionable. The question is, are they practical? ELITE uses three-layer laminated limbs that are known to be "bomb-proof." They offer repeatability, consistency and are a big reason ELITE can offer the Limited Transferable Warranty.

7. When you buy an ELITE™ bow, it's already custom-fitted with the latest anti-vibration technology:

- Limbsaver® Broadband™ dampener – one on each limb
- Limbsaver® String Leeches – two on each string
- Limbsaver® Suppressor rod dampener
- Custom Elite™ string suppressor – arrests the string on the shot

8. Adjustable, rubber-coated draw stops ensure consistency

The draw stop posts on ELITE's cam engage the compression side of the limbs, ensuring you will draw to the same point each and every time. This solid back wall breeds consistent shooting and eliminates "over-drawing," which can be a tendency in the heat of the moment and can alter speed and trajectory, a problem especially at longer distances.

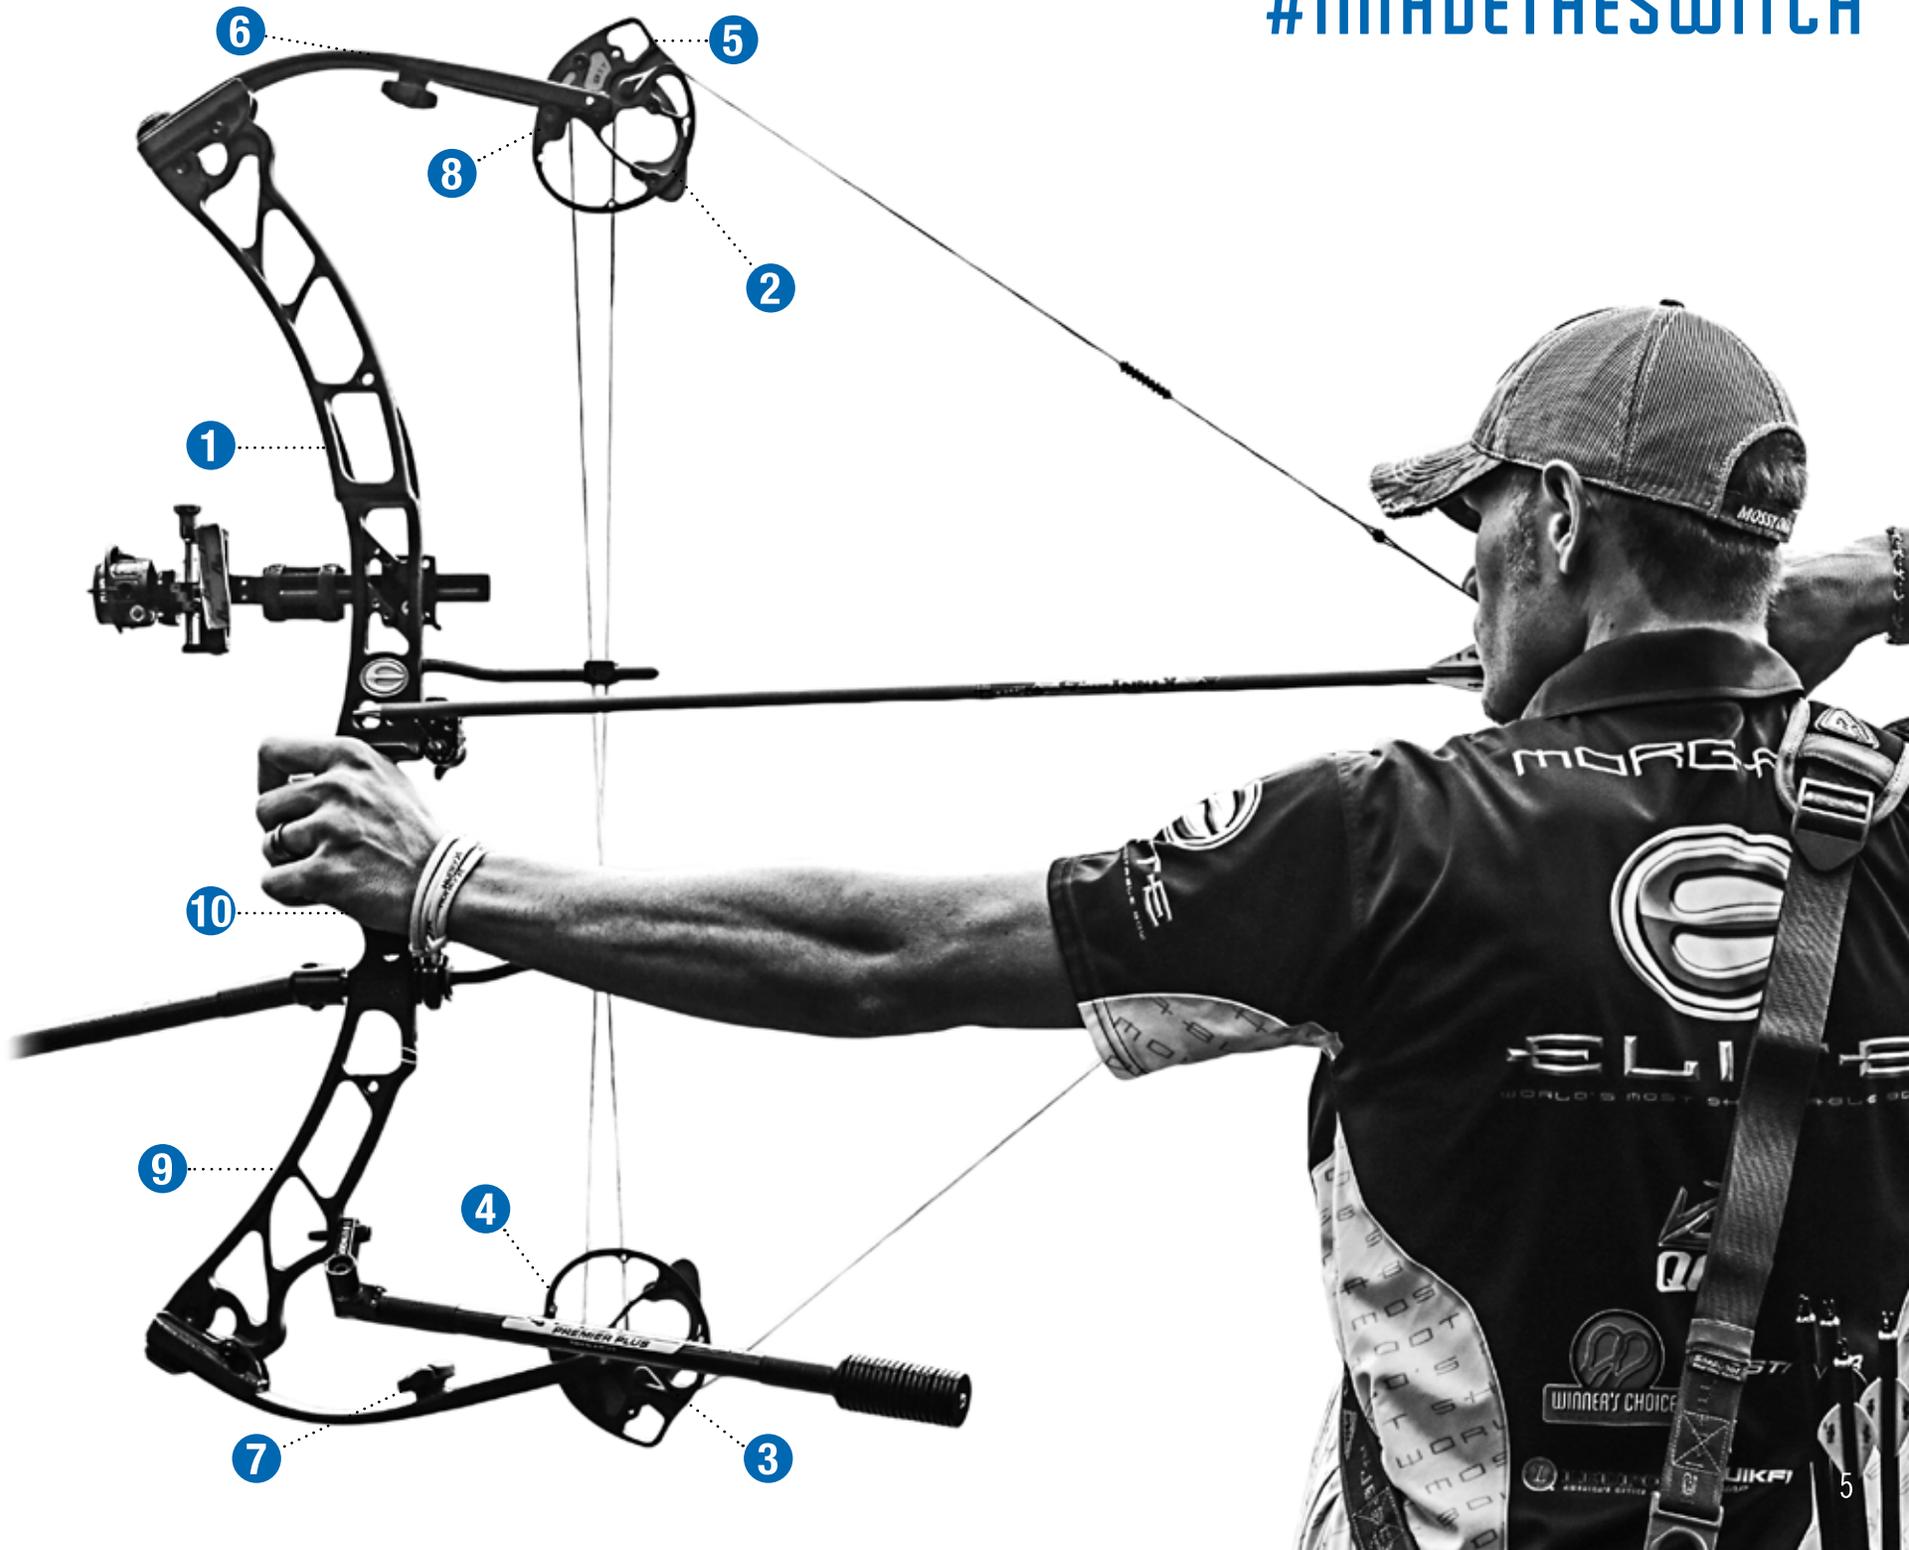

9. Fit and finish matches performance

ELITE offers never-before-achieved shootability and exceptional performance. But there is more. You'll also notice a high level of fit and finish. The tolerances are tight. Everything is fully radiused. An ELITE bow is a work of art!

10. Two-piece wooden grip draws rave reviews

Perhaps the first thing you will notice on an ELITE bow, even before you get a chance to pull one back, is the unique two-piece wooden grip. It looks great and feels even better.

#IMADETHESWITCH

NEW

The New ELITE Synergy™ is defined by “Shootability”. Delivering an unparalleled shooting experience, the Synergy™ is a true hunter’s bow that leaves nothing to sacrifice. At 33 ½ inches axle-to-axle, the Synergy™ rests in a sweet spot between the Energy™ 32 and 35 with incredibly **stable** geometry that’s perfect for hunting and 3D archery. Its mid-sized measurements allow for a steady hold on the range and extreme maneuverability for those tricky tree stand and ground blind shots that require creative set up. Supported by ELITE’s exclusive **Riser Cage™** design, the Synergy’s backbone provides **balanced** energy distribution to the bow’s beyond parallel limbs and Synergy™ two-track cam system. Launching arrows up to an impressive 325 fps I.B.O., the Synergy™ maximizes the critical combination of **speed** and smooth into one “Shootable” package everyone will love to bring to full draw.

INDOOR

The only thing more impressive than the Energy™ 35's specs is its 2014 resume. What is possibly the "most accurate bow ever" the Energy™ 35 graced the top spot on more ASA and IBO podiums than any other bow in 2014 - while maintaining the hunt for a top finish at multiple other shoots through out the year. Speaking of the hunt, with its increased stability, wide range of draw options, silky-smooth Energy™ cams and ELITE's exclusive Riser Cage™ the 35 is perfect for those in pursuit of trophies in the field and on the range, making it the ideal combination of versatility and shootability.

ENERGY™ 35

"The Energy 35 has been my go to bow since the first day I shot it. . . From indoor & outdoor competition, to every hunt I go on, the 35 has adapted to every situation perfectly and performed better than I could have imagined a bow would. If I could only buy one bow to shoot the rest of my career, without hesitation I would choose the Energy 35!"

Levi Morgan – Pro Shooter, Elite Archery

For the female archer who's filled with outdoor passion, ELITE's Spirit™ is the first bow in the line specifically designed for women. The Spirit™ instills ELITE™ shootability and performance into a smaller-framed bow that's lighter weight (less than 4lbs.) and offers a smaller grip and riser. Powered by the fierce Spirit™ Cam system this bow maximizes dynamic energy, while minimizing vibration and shock. The Riser Cage™ increases riser stiffness and rigidity to boost energy transfer and deliver a bow that's performance-driven and without sacrifice.

QUIVERS

4-arrow hood shown.
6-arrow hood available.

I-PIECE QUIVER

The 1-Piece Quiver is available in both 4-arrow and 6-arrow models. A cam locking lever mechanism not only locks the quiver securely in place but allows for easy, one-handed removal and attachment. Horizontal adjustment allows you to maneuver the quiver close to the bow to maximize bow balance. This quiver accommodates all arrow diameters as well as all broadhead styles, fixed or mechanical.

- 6061-T6 machined aluminum construction
- Unique clamping design
- Available in 4-arrow or 6-arrow configurations
- Accepts both fixed and mechanical broadheads
- Extremely rigid and quiet
- Fits all popular hunting arrow diameters

Ninja

6-arrow hood shown.
4-arrow hood available.

2-PIECE QUIVER

The ultralight 2-Piece Quiver offers rock-solid mounting and a low-profile design. Like the 1-Piece Quiver, it allows you to adjust for minimum accessory clearance and maximum bow balance. The lower gripper has more than 4 1/2" of vertical adjustment to accommodate all fletching lengths and styles.

- 6061-T6 machined aluminum construction
- Extremely lightweight, rigid and quiet
- Adjustable for low-profile attachment
- Gripper height adjustment of 4 1/2"
- Available in 4-arrow or 6-arrow configurations
- Accepts both fixed and mechanical broadheads
- Fits all popular hunting arrow diameters

STABILIZERS & SLINGS

7 1/4"

DOINKER®

STABILIZERS PARTNERED WITH THE BEST

ELITE Archery has partnered with Stokerized Aiming Solutions and Doinker® to create a high-end, technologically advanced stabilizer for your ELITE™ bow. Doinker® A-Bomb Dampeners with ITP Technology, coupled with the natural dampening properties of the solid acrylic rods used by Stokerized Aiming Solutions, eliminate unwanted bow torque, noise and vibration.

- 6061-T6 aluminum and acrylic rod construction
- Doinker® A-Bomb and acrylic absorb and dampen vibration
- Laser-engraved ELITE™ logo
- Available in 7 1/4" (6.6 oz) and 11" (7.4 oz) lengths

Ninja

11"

CUSTOM BOW SLINGS

- Fully adjustable sling with semi-rigid rope system that does not flop or fold
- Angled mounting bracket puts sling at a perfect 40-degree angle
- Available in Ninja, Realtree® Xtra®, Realtree® Max-1® and Realtree® AP® Snow

ULTRA REST HDX & GRIPS

ELITE Archery is proud to offer a top-of-the-line QAD Ultra rest HDX that is customized to fit all ELITE™ bows. It features preset elevation and centershot adjustments for ELITE™ models as well as Pro Kote™ performance coating – exclusively used by ELITE™ Archery.

- Custom mounting arm fits all ELITE™ bows
- Available in Pro Kote™ Patriot Brown (shown) or Sniper Gray
- Preset elevation and centershot adjustments for all ELITE™ bow models
- Total arrow containment
- Super-fast drop-away speeds guarantee fletching clearance
- Available in right and left hand

PREMIUM HARDWOOD GRIPS

- Transitional grip with wider face for added surface area
- Fitted to accommodate any Elite bow dating back to 2006 (except Victory) with specific Spirit model available
- Available in low or medium wrist
- Gray or Brown laminate

LEVIMORGAN

"I've spent my whole life shooting a bow for fun. ... now its my job, both competing and hunting. ... lucky for me, Elite keeps my job as fun as it ever was by making the most dependable bow in the world as well as the easiest bow to shoot...I love my job!"

SAMANTHAMORGAN

"As a woman I'm not as physically strong as most guys as well as my draw length is shorter than most. ... so I need a bow that is easy to draw and at the same time has enough speed to compensate for both of those things. ...Elite gives me everything I need plus, simply put, hits the mark day after day!"

DARRINCHRISTENBERRY

"My Elite bows make me better, period! Whether I'm shooting spots, 3D or sitting in a tree stand, I know I have equipment that I can rely on and that I am very confident in. Shootability, dependability and consistency.....Elite has it!"

MIKEPOLLARD

"Making the switch to Elite has made me a better archer. I was more confident than ever no matter which tournament I was shooting. To tell you I'm excited about the additions to the line up this year would be an understatement! #TeamElite"

GARRETTAYERSMAN

"Shooting an Elite bow puts shooting and hunting both into a whole new perspective for me. The trust and confidence that I have with the Elite bows is more than any hunter and shooter could ask for. From knowing the equipment will perform optimally and precisely, to the comfort of feeling like the bow was made for me."

KEVINKOCH

"I haven't shot a bow as much fun to shoot as the Elite's. They are the smoothest and most accurate bows I have ever shot. I make more consistent and accurate shots over and over with these bows. By far, Elite makes the best bow on the market."

ADAMHAYDEN

"Whether I am in a tree stand on a frosty morning in Mid-November or in a Pro Pressure Point Shoot Down during the dog days of summer, my Energy 32 is in my hand. The accuracy and the shoot ability of the Energy 32 makes it simple to go from one season to the next, with the same bow"

ERICGRIGGS

"Any bow can be shot accurately out of a machine or if shot the exact same every time, but I am very human and I'm going to have human error. The shootability and forgiveness of my Elite bow provides me an incredible level of confidence in knowing that I can still maintain the highest level of accuracy even in those very "human" moments."
