# VAP TKO

THE ULTIMATE HUNTING ARROW

## PRO SHOP ONLY

### VAP TKO

The VAP TKO .166 micro-diameter hunting arrow incorporates our most advanced carbon engineering to date to create the **deepest penetrating** and most lethal arrow we offer. With MaxxKe™ Technology, **Extreme FOC** balance, and dramatically reduced down range cross-wind deflection, this is **the go-to** arrow for dedicated big game hunters.

# RIP TKO

THE PERFECT COMBINATION OF SPEED, POWER, AND DURABILITY

## PRO SHOP ONLY

### RIP TKO

Hunters looking for the perfect combination of **speed**, **power**, and durability need look no further than the RIP TKO. This .204 diameter shaft is smaller than standard hunting arrows which reduces wind drift and increases penetration while maintaining **extreme durability**. MaxxKe™ Technology also increases kinetic energy during impact, helps the arrow to recover quicker in flight, and ensures your arrow **hits hard** every time you let it RIP.

Frank Noska - Archery Super Slammer  
I have been bowhunting exclusively for 35 years.  
13th person to achieve the Archery Superslam  
5 animals short of my second Archery Superslam  
137 Pope and Young animals in the record book  
23 Boone and Crockett animals in the record book

"I thought I would try Victory Arrows a couple of years ago. To say I have been pleased, would be an understatement! Just 7 days ago I harvested a great Tule elk in California. My VAP arrow passed completely through the bull elk and I am only shooting 62 pounds! With the amount of bowhunting I do, I use nothing but the best equipment available."

VAP HUNTING ARROWS

**THE CARBON ARROW EXPERTS • VICTORYARCHERY.COM**

THE LIGHTEST, FASTEST HUNTING ARROW IN OUR ARSENAL

## RIP XV

The RIP XV was designed and extensively tested for two qualities - **speed** and **long-range accuracy**. Our carbon engineers synthesized different high-modulus carbon formulas to develop this **sub 6 GPI** ultra-light and **super-deadly** arrow. The .204 small diameter shaft leaves less surface area for wind deflection and its lightweight construction delivers extremely flat trajectory over long distances. Coupled with our SHOK insert for better penetration and high FOC the RIPXV is the perfect **extreme velocity** hunting arrow.

# RIP

A SMALL DIAMETER ARROW THAT PACKS A SERIOUS PUNCH

## RIP

Looking for an arrow with the **speed** and **accuracy** of a small-diameter shaft but the durability and kinetic energy of a larger arrow? The RIP .204 small-diameter shaft reduces wind drift and the SHOK insert improves FOC balance while increasing penetration. This is one of the **hardest hitting** arrows in our arsenal to give you the confidence you need to let it RIP.

GRIZZLYSTIK MOMENTUM TDT (THIN DIAMETER TAPERED) FULL-LENGTH TAPERED WOVEN CARBON ARROWS

# PRO SHOP ONLY

## GrizzlyStik

GrizzlyStik and Victory Archery combined forces to produce the finest trophy and dangerous game arrows the industry has ever seen. To achieve this goal, we combined GrizzlyStik's performance enhancing design elements with our precision carbon components and manufacturing techniques. The NEW Momentum TDT (Thin Diameter Tapered) woven carbon arrows are the amazing result!

Momentum TDT arrows are the most efficient arrows we've ever produced. These amazing tapered arrows recover from archer's paradox almost instantly - retaining energy for forward momentum. Since tapered arrows retain more energy they out-perform parallel arrows and deliver deeper penetration, more pass-throughs, and - with the right broadheads - bone splitting lethal penetration that other arrows simply can't match.

• Super Strong Woven Carbon - For unsurpassed structural integrity • A continuous .001"/inch taper from tip to tail - For built in FOC, Weight forward, Strength forward, and Spine Forward benefits • Tapered externally and parallel internally - Allows spine control & fine tuning by allowing cutting from point or nock end

## REVOLUTIONARY • ARROW FEATURES

SPINE ALIGNED - EVERY ARROW DIGITALLY SPINE ALIGNED FOR INCREASED ACCURACY AND SHOT TO SHOT CONSISTENCY

HAND FLETCHED - 100% CUSTOM HAND FLETCHED FOR OPTIMUM VANE ADHESION AND ALIGNMENT

MATCHED WEIGHT - EACH DOZEN WEIGHT MATCHED TO +-0.5 GRAINS FOR PRECISE SHOT CONSISTENCY AND TIGHTER GROUPING

ICE NANO CERAMIC COATING - ADVANCED NANO CERAMIC ARROW COATING IMPROVES PENETRATION AND ALLOWS FOR EASY REMOVAL FROM TARGETS

MAXXKE TECHNOLOGY - ADVANCED 3K CARBON WEAVE FOR LESS TORQUE, FASTER RECOVERY OF ARROW FLIGHT, AND TIGHTER UNIFORM SPINE CONSISTENCY

SMALL DIAMETER ARROW - HIGH MODULUS 100% CARBON FIBER CONSTRUCTION .204 DIAMETER FOR MAXIMUM SPEED & PENETRATION WITH LESS WIND DEFLECTION

"Dan the Man" - Dan Kinder has a passion for hunting dangerous game with the bow. This is Dan's - SIXTH - buffalo taken (2 Cape, 2 Argentinian Asiatic, 2 Australian Asiatic) in just 5 years.....and yes that is a Cape buffalo tattoo on his forearm. GrizzlyStik has outfitted Dan with 950 grain (all in) Momentum TDT arrows tipped with our forged 315 grain Ashby Broadheads for each of his buffalo hunts. For his latest Black Death safari, Dan successfully hunted with PH Evan Sloan of Choronga Safaris.

GRIZZLY STIK HUNTING ARROWS

# VAP

SECOND TO NONE IN CONSISTENCY AND PRECISION

## VAP Competition

The VAP Micro-Diameter target arrow not only parallels the **precision straightness tolerances** of the industry's very best...it also maintains its  $+\/-0.001"$  straightness shot after shot. Offering the competitive shooter **exceptional speed** and **accuracy** with little worry of wind drift, it's almost an unfair advantage.

**100% HIGH PERFORMANCE CARBON FIBER • STRONG & FAST**

## ARROW FEATURES

THE VICTORY ARES AND VICTORY VENUS ARE THE FIRST HIGH-PERFORMANCE ARROWS DESIGNED WITH YOUTH ARCHERS IN MIND. THESE ARROWS ARE CUT TO 29," AND OFFERED IN A 500 OR 600 SPINE, AND AVAILABLE IN SEVERAL **VIBRANT COLORS**. BOTH ARROWS COME WITH REAL GATEWAY FEATHERS, **PERFECT FOR BOTH COMPOUND AND RECURVE BOWS**. FOR ARROW SIZING AND FITTING PLEASE REFER TO A DEALER NEAR YOU!

### YOUTH ARROWS

THE GENX IS A JOINT ARROW DESIGNED WITH **MATHEW'S/MISSION ARCHERY** FOR THE NATIONAL ARCHERY IN SCHOOLS PROGRAM (NASP). IT TAKES THE STANDARD YOUTH SHAFT AND COMBINES IT WITH A STANDARD TIP FOR A GREAT ENTRY-LEVEL, "READY-TO-SHOOT" ARROW - PERFECT FOR THE GENESIS BOW PLATFORM, OR ANY ENTRY-LEVEL TARGET BOW.

### **VICTORY VFORCE JR™**

THE VICTORY VFORCE JR TAKES **PRECISION ELEMENTS** FROM OUR VFORCE ARROW AND RESIZES IT FOR THE **JUNIOR COMPETITIVE ARCHER**. IT IS A STANDARD-DIAMETER, 600 SPINE ARROW WITH A BOHNING BLAZER NOCK AND AN ALUMINUM INSERT WHICH ACCOMMODATES A STANDARD 8-32 THREAD. THE VFORCE JR'S ARE AVAILABLE IN BARE SHAFTS OR FLETCHED WITH A 2" Q2I RAPTOR VANE.

STANDARD DIAMETER BOLT • 100% CARBON FIBER • MAXIMUM POWER

## XBolt

In designing a great hunting crossbow bolt, the team at Victory Archery wanted something that could withstand the power of the latest crossbows, fly true and have the knock-down power needed to get the job done. The X-Bolt Crossbow arrows are optimized with the EFOC (Extreme Forward of Center) design to help stabilize the arrow in flight. The X-Bolt is made with premium parts, so you can rest easy knowing it will perform, including both flat and half-moon nocks and a specially-designed brass insert. Available with +/- .003-inch straightness, the X-Bolt shafts have a weight tolerance of +/- .05 grains. Victory's Spine Alignment process increases the accuracy and they come hand-fletched in Bohning XVanes or Fusion X-II vanes. Good hunting!

# VAP VooDoo

THE WORLDS MOST ADVANCED • CROSSBOW BOLT • LESS WIND DRIFT • DEEPER PENETRATION

## VAP VooDoo Bolt

We've all heard it. That sound when an arrow smacks home on target while we're hunting with a healthy "thump." It's magical. Create your own kind of magic - VooDoo magic, with the VooDoo Crossbow Arrow from Victory, the most advanced hunting bolt on the market. The .166 micro-diameter shaft penetrates deeper and cuts through the wind like no other bolt can. With Victory's exclusive Rail Rider, and oversized nock point, the VooDoo has 95-percent less contact with the rail, meaning the vanes can be helically hand-fletched for faster spin rates and improved accuracy. VooDoo bolts come with AAE Max Hunter® Vanes and Penetrator Broadhead Adapters and are available in 20-, 22- and 24-inch lengths to fit even the fastest crossbows. Unleash some VooDoo of your own and cast a spell on the hunt.

# ACCESSORIES

## APPAREL

**"Hunt Like You Mean It"** T-Shirts are made from a 50-50 cotton polyester blend for comfort and breathability. They are available in Gray, Black, Blue, and Red, and come in size: Small - XXL.

**"Shoot Like You Mean It"** Shooter Jerseys are a must have for the competitive archer. Made from high quality wicking material, they feature a collar, quarter zip, relaxed fit, and are available in size: Small - XXL.

## ADHESIVE

### VICTORY BOND

Victory Bond is a fast setting, high-viscosity cyanoacrylate based adhesive. Vanes, feathers or nocks, carbon, wood or aluminum, it makes no difference, Victory Bond has you covered. This high quality adhesive gives you the peace of mind that what you glue will stay glued. Use sparingly for the strongest bond, and this bottle will fletch hundreds of arrows.

D6A1729

### BLACK FUSION

Black Fusion by Victory Archery is the industry's toughest insert glue. Rubberized particles blended into the adhesive allow the bond to maintain elasticity while providing superior hold. This unique blend ensures the bond between arrow and component never crystalizes or fractures, allowing for repeated high impact revolutions without the fear of failure.

# ARROW SAFETY

## Victory Archery Safety Warning

Victory Archery is committed to safe archery. Archery/hunting requires a high level of skill and caution at all times to avoid personal injury or property damage. Victory Arrows should only be used by those trained in the proper use of bows and arrows or under the supervision of a qualified instructor.

Arrows should always be inspected before each use for signs of damage. Impact with hard objects, other arrows or being shot into a game animal can all cause damage. We recommend flexing each arrow and inspecting for any sign of cracks or splits before each use. Grasp the arrow between the point and nock, flex the arrow along its length so as to deflect it approximately 1 to 2" in an arc and listen for cracking. Never use an arrow with any sign of damage. A cracked or split arrow can suffer catastrophic failure upon release and cause severe injury to yourself or others in the area.

## Practice Safe Archery

After loading an arrow into a bow, never point at any person or property. An arrow can be accidentally discharged and cause severe injury and property damage. Never shoot an arrow without having full visual contact with the target and knowing what is behind the target. Always inspect your bow, arrows and components prior to each use.

## Bowhunting Precautions

When hunting, the possibility of arrow damage increases significantly. This is due to the high likelihood of the arrow impacting various things (roots, trees, fences, posts, rocks, hard ground, bone, etc), possible misuse (improper maintenance, abuse, or care), impact with other arrows, or the angle in which it impacts/passes through an animal. Damage to the arrow can result in sharp and/or splintered carbon fragments which are harmful to humans, especially if ingested. If there is ANY suspected carbon arrow damage please utilize the guidelines listed below.

- 1) Thoroughly inspect the entrance wound, exit wound, and surrounding area prior to removing the carbon arrow in order to determine whether or not there are splinters/fragments imbedded in the game animal.
- 2) Use extreme caution when removing the broken segments of the carbon arrow shaft.
- 3) While field dressing game animals, use care to avoid splinters/fragments of carbon fiber.
- 4) Carefully remove and dispose of any flesh that has the presence or suspected presence of carbon fiber splinters or fragments.

To err on the side of caution is always the best course of action. Victory Archery is committed to safe archery. Use good judgment in determining whether or not something is unsafe, incorrect, or there is a possibility of harm.

## ARROW SAFETY WARNING

Victory Archery is committed to safe archery. Archery/hunting requires a high level of skill and caution at all times to avoid personal injury, death, or property damage. Victory products should only be used by those trained in the proper use of bows and arrows or under the direct supervision of a qualified instructor. After loading an arrow into a bow, never point at any person or property. An arrow can be accidentally discharged and cause severe injury, death, or property damage. Never shoot an arrow without having full visual contact with the target and knowing what is behind the target. Always inspect your bow, arrows, and components prior to each use. Careless handling of arrows or components can result in severe injury. If an arrow has been damaged, or appears to be damaged, dispose of it immediately.

### NEVER ATTEMPT TO SHOOT A DAMAGED ARROW.

#### INSPECT ARROWS FOR DAMAGE PRIOR TO EVERY SHOT

Impact with hard objects, other arrows, or being shot into a game animal can all cause damage. No list is all inclusive; there are many other conditions and situations that may cause damage, so it is crucial to your safety and the safety of those around you that all arrows and components (new or used) are inspected for possible damage. We recommend flexing each arrow and inspecting for any sign of cracks or splits before each use. Grasp the arrow between point and nock. Flex the arrow, away from you or others, along its length so as to deflect it approximately 1 to 2 inches in an arc and listen for cracking. Before shooting, run your fingertip along the entire arrow shaft length, looking and listening for cracks, creases, splits, or any other conditions that could indicate any possible shaft damage. Never use an arrow with any sign of damage. A cracked or split arrow can suffer catastrophic failure upon release and cause severe injury to yourself and others in the area. Before each shot, ensure that the nock is fully seated against the string and that the nock fits tightly into the shaft. Adherence to these recommended guidelines will reduce the possibility of injury and promote a safe and fun archery experience.

## CROSSBOW BOLT SAFETY WARNING

Victory Archery is committed to safe shooting practices. Crossbow shooting & hunting requires a high level of skill and caution at all times to avoid personal injury, death, or property damage. Victory products should only be used by those trained in the proper use of crossbows and bolts or under the direct supervision of a qualified instructor. After loading a bolt into a crossbow, never point at any person or property. A bolt can be accidentally discharged and cause severe injury, death, or property damage. Never shoot a bolt without having full visual contact with the target and knowing what is behind the target. Always inspect your crossbow, bolts, and components prior to each use. Careless handling of bolts or components can result in severe injury. If a bolt has been damaged, or appears to be damaged, dispose of it immediately.

### NEVER ATTEMPT TO SHOOT A DAMAGED BOLT.

#### INSPECT BOLTS FOR DAMAGE PRIOR TO EVERY SHOT

Impact with hard objects, other bolts, or being shot into a game animal, can all cause damage. We recommend flexing each bolt and inspecting for any sign of cracks or splits before each use. Grasp the bolts firmly with both hands between the point and nock. Twist, flex and squeeze the shaft while listening for cracking. Never use bolts with any sign of damage. A cracked or split bolt can suffer catastrophic failure upon release and cause severe injury to yourself or others in the area.
