**2018**

# SCOTT ARCHERY

WHETHER YOU ARE AFTER ANTLERS OR HARDWARE,  
SHOOT THE RELEASE THAT SAVVY HUNTERS AND  
TOURNAMENT WINNERS SHOOT. SHOOT A SCOTT.

## YOUR SHOOTING STYLE, YOUR SCOTT RELEASE

### SINGLE CALIPER

The single caliper head is a robust and reliable release. With few moving parts, the rugged design of the single caliper performs in the worst weather. The compact head delivers crisp activation shot after shot.

### DUAL CALIPER

Dual caliper design delivers symmetrical distribution of friction. This means that the loop is released cleaner and with less torque. A wide range of trigger adjustments offer increased options to customize the release for the individual archer.

### HYPERJAW™

Welcome to the next level of archery release aids. Patent pending HyperJaw™ technology from Scott features independent operating jaws. This asymmetrical jaw design delivers unmatched opening response. The result is a clean release that eliminates torque. Every time.

### THUMB BUTTON™

Whether shooting paper, 3D, or bow hunting, some archers prefer hand held releases. These releases depend on the archer's back muscles, leading to consistency in anchoring. Scott leads the way in hand held releases with a full line of thumb button releases.

### BACK TENSION

Back tension releases from Scott use the ideal pivot point for release. Put simply, this means you shoot better with consistent results. With your fingers free to get in the right position, you'll be comfortable shot after shot.

**SCOTT HAS LONG LED  
THE WAY IN ARCHERY RELEASE  
INNOVATION AND TECHNOLOGY.**

**FOR MORE THAN 35 YEARS,  
SCOTT INNOVATIONS HAVE  
BEEN PART OF MANY SUCCESS  
STORIES – BOTH IN FRONT OF  
THE ROAR OF TOURNAMENT  
CROWDS AND IN THE QUIET  
OF THE WOODS.**

#### **ROLLER SEAR™ TECHNOLOGY**

Scott's famous Roller Sear design allows for more trigger options than any other design. Scott's Roller Sear delivers clean triggering. With no travel felt in the trigger.

#### **ADJUSTABLE TRIGGER SENSITIVITY**

With a Scott™ Release, you can adjust trigger sensitivity to your performance. Some like the trigger with a light pull, while others prefer a heavier setting. When you shoot a Scott, the choice is up to you.

#### **KNURLED TRIGGER OFFERS BETTER GRIP**

The knurled trigger on a Scott™ Release gives you a better grip. As an archer, you may be shooting in the summer heat or with heavy gloves in the winter. Either way, the knurled trigger of a Scott Release feels great in the crook of your knuckle or the tip of your finger.

#### **LENGTH ADJUSTMENT**

Some like the feel of a solid swivel connector. Others like the ability to adjust their position. Some prefer the torque free performance of the nylon strap. Scott has you covered with a variety of choices.

#### **RELIABLE JAW DESIGN**

Scott Releases come in a variety of jaw configurations. Choose from single or dual caliper, string loop, thumb button, or back tension releases. Consider the innovative style of Scott's new HyperJaw™ design. No matter your style or preference, Scott has you covered.

## PURSUIT

THUMB BUTTON  
HUNTING RELEASE

It's the moment of truth. You've been chasing this all season. Don't take chances with just any release. It's not about trophies – it's all about the Pursuit.

### FEATURES

- Target inspired multi-sear technology utilized to provide best-in-class crisp trigger feel
- Three and four finger extension included
- Fully adjustable trigger position
- Adjustable trigger travel
- Scott's rope connector delivers infinite length adjustment for any archer
- Ergonomic handle

**NEW  
2018**

# ASCENT

## BACK TENSION RELEASE

The Ascent has a new, aggressive design that delivers comfort and confidence at full draw.

Micro adjustments to travel and click distance deliver performance custom built for you.

## FEATURES

- Patent pending dual sear locking design
- Micro adjustable travel
- Micro adjustable click distance
- Thumb peg for drawing assistance
- Stainless steel bracket
- Ergonomic, heavyweight stainless steel handle
- Available in three standard sizes: four finger large, three finger large, three finger medium

TARGET

## ECHO

### HYPERJAW™ STYLE RELEASE

Scott engineers spend hundreds of hours to develop and test dozens of geometry configurations. The result is a never before seen configuration in archery releases.

### FEATURES

- Patent pending design
- HyperJaw™ Technology - independent jaws eliminate torque
- Off center design delivers high efficiency opening response
- Roller Trigger System for smooth, adjustable trigger action
- Shotgun style trigger has a familiar feel and increased finger placement options
- Ergonomic grip ridges allows for the same placement every time
- True fold back capability so you can tuck the head out of the way

HUNTING

FIELD

# CALIPER

## DUAL CALIPER RELEASE

The Caliper is the original Scott dual caliper release. It continues to stand the test of time. If you are looking for an extremely reliable release in the field, choose the Caliper.

## FEATURES

- The original dual caliper Scott™ release!
- Solid swivel connector with Scott's patented multi length adjustments
- Forward Knurled Trigger for superior grip and versatility

# SIGMA

## THUMB BUTTON RELEASE

The Sigma offers a more comfortable feel with a new, more ergonomic handle. You can feel the difference at full draw, allowing you to be relaxed and confident. The Sigma puts your fingers in optimal performance positions – we call this “finger ergonomics.” Ultimately, the proof is on the podium.

## FEATURES

- Highly engineered for maximum accuracy
- Ergonomic shape provides ultimate feel
- Closed position full radius tapered handle for consistent hand position
- Fully adjustable trigger and travel adjustment
- Machined 440 stainless steel internal components

## BABYHORN

### BACK TENSION RELEASE

The Babyhorn is a scaled down version of our popular Longhorn platform. It keeps your focus where it belongs – on aiming.

### FEATURES

- Three finger design for small hands
- Open ergonomic full radius handle
- Interchangeable thumb pegs included

TARGET

3D

FIELD

# LONGHORN HEX

## BACK TENSION RELEASE

You can't be accurate if you are not focused on aiming. The pivoting roller design allows the archer to comfortably draw their bow without the concern of misfiring, making the Hex the perfect back tension release for the hunter or archer who wants to learn how to shoot a back tension release.

## FEATURES

- Two finger design
- Open ergonomic full-radius handle
- Perfect option for someone wanting to learn to shoot a back tension release
- Pivoting roller design allows the archer to comfortably draw their bow without concern of premature misfiring
- Patented rope connector for infinite length adjustment

FIELD

## PRO ADVANTAGE

### BACK TENSION RELEASE

These hand polished, machined brass shooting machines feature Scott's podium-producing innovation!

### FEATURES

- Three finger design for large hands
- Open ergonomic full radius handle
- Interchangeable thumb pegs included

TARGET

3D

FIELD

# BACKSPIN

## BACK TENSION RELEASE

The harder you pull, the harder it is to fire. The BackSpin release design features a rotating index finger hole that spins which greatly reduces the effects of release "hang-up." This rotating design, combined with an optimized pivot point, results in a release that will help elevate every archer's game. Try it for yourself!

## FEATURES

- BackSpin finger hole rotation technology automatically rotates the release to your optimal fire position, ensuring good form
- Two finger, three finger, four finger, four finger swept
- Minimal finger separation for feel, control
- Ergonomic, full-radius tapered handle
- Interchangeable, stainless steel finger extension

## FOCUS

### BACK TENSION RELEASE

The Focus features an open position, full radius, and tapered handle. Shooters of all levels will appreciate the contoured finger separation. Create the Focus that best fits you with interchangeable extensions.

### FEATURES

- Proven ergonomic design with contoured finger separation
- Open position full radius tapered handle
- Available in two finger, three finger, four finger and four finger swept with exchangeable finger extensions
- Optimized geometry for consistent shot timing

## ANCHOR

### BACK TENSION RELEASE

The Anchor increases the geometry of some of our best-selling hinge releases. Built with heavyweight stainless steel to a reliable feel and ultimate control.

### FEATURES

- Heavyweight stainless steel construction for control and consistent shot timing
- Closed position full radius tapered handle for consistent hand position
- Available in two finger, three finger, four finger and four finger swept with exchangeable handle options

TARGET

3D

FIELD

# HALO

## BACK TENSION RELEASE

The Halo offers a more comfortable feel with a new, more ergonomic handle. You can feel the difference at full draw, allowing you to make a relaxed and confident shot - time after time.

## FEATURES

- Ergonomic shape provides ultimate feel
- Heavyweight brass construction for control and consistent shot timing
- Closed position full radius tapered handle for consistent hand position
- Interchangeable thumb pegs included

NEVER DRAW YOUR BOW WITHOUT AN ARROW, AND NEVER POINT YOUR BOW IN AN UNSAFE DIRECTION.

**RECOMMENDATIONS OF USE**

Your Scott™ Release may be used with a string loop, or directly off the bowstring in combination with an eliminator button or synthetic nocking point.

DO NOT USE ANY SCOTT™ RELEASE IN COMBINATION WITH ANY METAL LOOP DEVICE OR ALLOW THE RELEASE JAWS TO COME INTO DIRECT CONTACT WITH A METAL NOCK SET. Doing so will damage your Scott™ Release.

**LIABILITY DISCLAIMER**

The Outdoor Group, LLC is not liable for any personal injury, death, or property damage that may result from your use of this product. The user of this product assumes all risks of property damage or injury to yourself and others that may arise from its use. Use of this product binds the user to this agreement.
